TERMS & POLICIES

SALES POLICY

Farris Brothers sales policy is to sell and ship directly only to **Retailers who stock and resell the merchandise** we distribute. These retailers must have a **permanent business location with consistent business hours** and be open to the public. Farris Brothers reserves the right to refuse to sell to any dealers who fail to meet these criteria.

CREDIT POLICY

A Farris Brothers credit application must be completed and on file before any business transaction can take place. Credit limits will be based on the information provided on the application, security provided and financial statement (if provided). All limits are subject to change based on changing credit worthiness. If an account becomes delinquent, terms will be changed to COD until credit is re-established. In the event of an insufficient check, future shipments will require pre-payment or COD Cash Only. If an account becomes delinquent and fails to establish a reasonable payment plan, it will be turned over to a third party collection agency. A 25% collection fee will apply along with any additional court cost and attorney fees if incurred. A \$40.00 processing fee will be charged each time a check is returned unpaid.

MINIMUM ORDER

New accounts require a \$1000.00 opening order. There will be no minimum order requirements for current accounts; however, a \$7.50 handling charge will be added to all orders less than \$100.00.

TERMS

- A) Open terms are available to customers with approved credit. Standard terms are Net 30 days.
- B) Dating terms are often available at shows and during seasonal booking programs. Dating terms are available only to dealers whose accounts are current and have a sufficient line of approved credit. Any invoices 30 days past due will carry a service charge of 1½% each month (18% annually). Any invoice that becomes 90 days past due will carry a 3% service charge in addition to the 1½% monthly service charge.
- C) **COD CUSTOMERS** – Customer may pay for order via **ACH DEBIT** or **FAX CHECK** in order to avoid COD fees and COD PROCESSING fees. ACH Debit orders may be shipped once processed. All Credit Card payments will be charged a processing fee of 2.75%.

FREIGHT POLICY

UPS

Less than \$100	\$7.50 handling charge + Freight
\$100 to \$750	Add Freight
\$750 to \$1,250	Full Freight Allowed if paid within terms on all items that do not incur UPS additional handling fees. Items that trigger these UPS fees will be subject to a \$15 fee per carton – this fee is non-deductible.
\$1,250 & above	Full Freight Allowed if paid within terms.

COMMON CARRIER / TRUCK LINE

Less than \$1,250	Freight Collect
\$1,250 & above	Full Freight Allowed if paid within terms (except O2 items)
\$2,500 & above	Full Freight Allowed if paid within terms (except O3 items)
\$4,000 & above	Full Freight Allowed if paid within terms
* COD Common Carrier orders are subject to a 5% to 7% carrier collection fee.	

- All closeout merchandise will be shipped Freight Collect. All sales of closeout merchandise are final.
- All hazardous material handling charges will be charged to the dealer receiving the shipment.

PRICING POLICY

ALL PRICES IN THIS CATALOG ARE SUBJECT TO CHANGE WITHOUT NOTICE. Items will be shipped at prices prevailing at time of shipment.

SPECIAL ORDERS / DROP SHIPMENTS

Orders for items not stocked in our warehouse may be ordered through our **Special Order** program. These orders will be factory drop shipped under the following conditions:

1. Factory and/or Farris Brothers minimum requirements must be met.
2. All orders must include requested ship date and a cancellation date.
3. Dealer pays all shipping and surcharges charged by the manufacturer.
4. Orders for merchandise not stocked by Farris Brothers are non-returnable.
5. Terms on all special orders and drop shipments are Net 30 days to qualified accounts unless otherwise specified.
6. COD accounts must pre-pay or arrange payment with Farris Brothers credit department.

PICK-UP ORDERS

Please call or fax Pick-Up Orders a minimum of twenty-four (24) hours prior to the pick-up.

SHORTAGES

It is the customer's responsibility to count and inspect all shipments. Carton shortages must be noted on the delivery document. Farris Brothers customer service department must be notified immediately of any shortage. **Claims older than 5 days will be denied.** Carriers' agents must inspect pilfered cartons before any credit can be issued.

DAMAGED MERCHANDISE

Merchandise damaged in transit should be recorded on the freight bill or separate delivery document and must include the driver's signature. Should there be apparent or suspected damage and the driver will not acknowledge this in writing, **REFUSE THE SHIPMENT** and contact our Customer Service Department immediately. Before a carrier will process any claim, its representative must inspect the merchandise and the shipping carton. You must sign the bill of lading as damaged or short at the time of delivery. **DO NOT DISCARD OR DESTROY ANY CARTONS. Claims older than 3 days will be denied.**

RETURN POLICY

Please contact your salesperson for return authorization. If you are not serviced by a salesperson, please contact our Customer Service Department. Please have the correct invoice and item number(s) available.

Packing slip or invoice numbers are required for the following:

- Authorized Non-defective Returns
- Merchandise Damaged In Transit
- Billing Error(s)
- Merchandise Shortages

All non-defective returned goods must be re-saleable as new in original unmarked factory packaging with any price labels removed.

Merchandise sold in minimum quantity packs must be returned as same, except in cases of damaged or defective goods.

All non-defective returns are subject to a 15% restocking charge unless return is due to Farris' error.
Please contact our Customer Service Department within five (5) working days regarding shipping errors.

Any special order/non-stock item(s) must have factory authorization for return. These items are not to be returned directly to Farris Brothers. We will be happy to assist you with these returns.

Select items must be returned directly to the manufacturer.
Please see your sales rep or contact Customer Service for further information.

Prices are subject to change without notice.

Farris Brothers is not responsible for errors in printing as a result of typing, proofing or misinformation of products supplied by manufacturers. Farris Brothers is not liable for Vendor out-of-stock, discontinued or back ordered items.

GENERAL TERMS AND CONDITIONS AND PERSONAL GUARANTEE

The undersigned promises to pay for all purchases in accordance with the terms of sale on each invoice. If the undersigned's account becomes delinquent, the undersigned agrees to pay all collection costs, charges and expenses (including reasonable attorney's fees) incurred in collecting the amount. The undersigned also agrees to pay interest at the rate of 1½% per month (18% Annually) on any amount delinquent over 30 days. I represent that the information on this form is true and is given to induce Farris Brothers, Inc. to extend credit to the applicant. My company and I authorize Farris Brothers, Inc. to carry out an investigation of credit as they see fit, including contacting the trade and bank references listed below and obtaining credit reports. I have read the terms and conditions above and agree to them in full. An officer or owner of the above named corporation or of the above partnership or sole proprietorship must sign below. We impose a surcharge of 2.75% on credit card transactions which is not higher than our cost of acceptance.

PERSONAL GUARANTEE: By signing this application, I acknowledge that I personally guarantee the payments for all the items purchased on credit by this company or corporation.

PURCHASE AGREEMENT: Any dispute or conflict involving the purchase, sale or use of any product sold or distributed by Farris Brothers, Inc. shall be decided under the laws of Mississippi regardless of where it was manufactured.

Zenon MG-LTX

Abu Garcia's lightest and most compact low-profile baitcasting reel ever made, the Abu Garcia Zenon MG-LTX Casting Reels combine the new SLC spool concept with hybrid ceramic bearings to create the ultimate finesse baitcasting reel. Weighing in at just 4.5 ounces, MG-LTX casting reels reduce weight without sacrificing strength by leveraging Abu Garcia's one-piece X-Mag Alloy Frame and C6 carbon side plates. Perfect for casting lightweight finesse-style baits with ease, the IVCB-4 braking system offers fine-tuned adjustments by using a unique four brake block configuration with an external adjustment. Equipped with eleven total bearings, 2 CeramiLite spool bearings greatly improve casting distance, while 8 high-performance corrosion-resistant (HPCR) bearings and one roller bearing in the handle deliver exceptionally smooth retrieves. Fitted with a custom lightweight bent carbon handle and carbon star drag, the ergonomic shape fits into your hands like a glove and the EVA handle knobs provide all-day casting comfort. Complete with a lube port for easy maintenance, the Abu Garcia Zenon MG-LTX Casting Reels are designed with high-end features to elevate every angler's ability.

75th Anniversary

Keeping in the theme of our 75th anniversary, B'n'M is offering our best reel yet, the 75 Reel. It's completely machine milled with no plastic parts. The 75 Reel is 7+1 BB, has a reversible handle for right or left-hand retrieve, and a 4.9:1 gear ratio – all at a great price and the quality you'd expect from a 75-year-old company.

Saltist HB Level Wind

Saltist LW feature 5 ball bearings (2CRBB+2BB+2RB) for smooth performance and a 6.1:1 or 6.4:1 gear ratio depending on the model. Line per handle turn retrieve rate is 35 or 47.2 inches per rotation while reel weights range from 18.5 to 24 ounces. The series also accommodates impressive line capacities ranging from 12/420 to 40/310 for mono and from 40/260 to 50/630 for Daiwa J-Braid. Max drag runs from 15.4 pounds for size 20 and 30 reels to 20-pounds for size 40 and 50 models.

Sealine LW Line Counter

Sealine SG-3B Line Counter Reel is a must-have component for your big-water arsenal. With its Direct Drive built-in line counter, this versatile reel series provides the accuracy needed to manage your presentation with precise control of line-out and relative lure depth settings. The Sealine SG-3B is built tough, with its 1-piece composite frame and machined aluminum spool; an automatic self-engaging clutch allows you to simply turn the handle to set or begin your retrieve. 3-bearing system enables smooth winding, even under load; dependable Ultimate Tournament Carbon Drag (UTD) system. Comes with either a counter-balanced single handle or a "walleye-style" dual-paddle handle.

Coastal SV TWS 150

Daiwa Coastal SV TWS Reel Baitcast 8Bb 7.1:1 Ratio 125/16. A new-sized bait-caster designed for light tackle, inshore, saltwater enthusiasts, the COASTAL SV TW 150. Ideal for Gulf Coast redfish and speckled trout specialists where, small plastics and popping cork set-ups are popular. With the reel's many features, it will easily crossover into many inshore saltwater applications on any coast. The reel is small, compact and palmable. It has a deeper 150 Size Spool in a 100 Size Reel Body. The SV Spool is strong and capable of tolerating the increased pressures of braided line. The T-Wing System allows the line to pass freely, without friction, through the level wind's eye, on a long cast. The small reel is substantial and stout built around an Aluminum frame and Aluminum side plate.

Coastal TWS

Daiwa designed the Coastal TW80 with its advanced Hyper Drive Design. Our HYPER DRIVE DESIGN is comprised of four key technologies – HYPER DRIVE DIGIGEAR, HYPER DOUBLE SUPPORT, HYPER ARMED HOUSING and HYPER TOUGH CLUTCH. HYPERDRIVE DIGIGEAR – a brand-new gear design makes the teeth of the gears more efficient at transferring power, therefore making the gear set feel smoother, more powerful and also reducing gear noise. HYPER DOUBLE SUPPORT – a two bearing support system for the reel's pinion gear means no flex and an ultra smooth retrieve/ gear rotation. HYPER ARMED HOUSING – the reel features an aluminum frame and sideplate for maximum rigidity and precision performance of the internal components. HYPER TOUGH CLUTCH – a redesigned and reinforced clutch mechanism increases durability & performance. Another bonus for the Coastal 80 is its UTD (Ultimate Tournament Drag) system, which includes impregnated drag discs that are about 30 times more durable than typical discs, considerably increasing effective drag power while also reducing start-up resistance.

Tatula 300

Daiwa unleashes the new Tatula 300, a true 300-size reel for throwing big bass baits. Daiwa's progressive product development team redesigned the new Tatula to bring anglers a slightly larger option perfect for a variety of applications including outsized, deep-diving crankbaits, swimbaits, A rigs, and more. In short, it's the perfect option for anglers fishing large presentations for even larger fish. What really makes The Daiwa Tatula 300 so special is the inclusion of the T-Wing System level-wind. When you take the reel out of gear it allows for less resistance on the line, allowing the line to cast further. Daiwa's spool lets anglers finely tune the spool tension while the T-Wing System level-wind opens up line feed, working together to cast longer, more accurately, and provide stress-free control when chunking into the wind, skipping baits or casting large lures. The T-Wing System is also very efficient at reducing backlashes on the 300-size reel with large spool. It does this by reducing the angle of the line coming off the spool and spool speed, providing efficient operation unlike anything on the market in this reel class. The new Tatula 300 also features Daiwa's patented Magforce magnetic casting system which is located on the exterior of the reel making adjustments easy to make depending on wind conditions and the rods you're fishing.

Tatula TU80

Designed for finesse bassin', the Daiwa® Tatula® 80 Baitcast Reel is the perfect choice for throwing lighter lures on 10-12 lb. fluorocarbon or 8-20 lb. braid. Extremely compact and palmable, it's built on an aluminum frame, with aluminum handle-side sideplate and a super-lightweight 32mm, 7075 aircraft-grade aluminum spool. Hyperdrive gearing ensures smooth cranking and fluid rotation; Daiwa's T-Wing System level-wind opens up the line feed for unhindered casting and retrieving. Equipped with Magforce braking, a 7+1 ball-bearing system, rugged carbon drag, & a full-sized 90mm swept handle.

Back Bay Saltist

The Saltist Back Bay LT Reel employs our revolutionary HARDBODYZ design – utilizing an aluminum metal alloy, giving maximum strength and minimizing weight. These design features combine to create one of the lightest, strongest reels on the saltwater market. The Magsealed main shaft employ a magnetic oil that repels intrusion from salt water without compromising performance. The machined aluminum alloy DigiGear™ assures smooth, rugged performance with digitally milled gearing to maximize the efficiency of the gear-tooth interaction. Ideally suited for 8- and 10-pound test mono and equivalent braid, the Saltist Back Bay LT is Daiwa's state of the art interpretation of the perfect light tackle backwater spinning reel.

Procyon AL

The Procyon AL reel series features an aluminum body that allows more less body and frame flex providing better support on the gears and bearings allowing increased torque and power while also allowing longer life to the gears. The Procyon AL also features an air rotor engineered to be very rigid, especially at high drag pressures with little flex. The Procyon AL also has generous cut-outs in its engineering design, which reduces the weight of the rotor. The new reels also showcase a tubular air bail that reduces weight and offers more rigidity than standard wire, so you get less flex and bending or breaking. The tubular air bail is also manufactured with thicker material that feels good on the fingers when flipping the bail by hand.

Procyon MQ LT

The Procyon MQ LT features a one-piece monocoque Zaion V body that allows less body and frame flex providing better support on the gears and bearings and allows increased torque and power while providing longer life to the gears. The Procyon MQ LT features an Air Drive Rotor engineered to be very rigid, especially at high drag pressures with little flex. The Procyon MQ LT also has generous cut-outs in its engineering design, which reduces the weight of the Air Drive Rotor. The lighter the rotor, the less inertia it takes to spin around the reel. This makes it much easier to crank the handle. The new reels also showcase a tubular air bail that reduces weight and offers more rigidity than standard wire, so you get less flex and bending or breaking. The tubular air bail is also manufactured with thicker material that feels good on the fingers when flipping the bail by hand. Another element of the series is DIGIGEAR® technology, digitally for considerably better gear meshing increase smoothness and gear wear. Anglers will also find Daiwa's distinctive Advanced Tournament Drag (ATD™) a benefit for setting the hook and fighting fish. When you set the hook, the reel instantly adds drag resistance, and then as the fish starts pulling drag, the ATD drag curve automatically returns to your prescribed setting. The design of the spool's lip allows the line to exit the reel at a much tighter cone-shaped angle, meeting the guide train with less resistance & force, alleviating wind knots and allowing for longer casts.

WARNING
Cancer and Reproductive Harm • www.P65Warnings.ca.gov

Fuego LT

FUEGO LT is ZAION V carbon-fiber body, not a nylon-based plastic that you see in other manufacturers' reels at this price-point. The new FUEGO stands alone in the marketplace at this price. You also get some weight reduction (3%-5%) as a result of this material design change. Fuego also uses an AIRDRIVE ROTOR that reduces quite a bit of weight. Daiwa also incorporated a solid AIRDRIVE BAIL versus a tubular design. The reason for that is the metal we're using is very strong, rigid, and doesn't bend – yet, it's thinner and lighter. Our goal was to reduce the weight of the rotation, which reduces the weight of the reel as well. It also makes it easier to turn the handle.

Exceler LT

Daiwa uses a carbon fiber body called ZAION V. The new version is 3%-5% lighter than our current EXCELER for comparable sizes. It also comes with an AIRDRIVE ROTOR & AIRDRIVE BAIL like our version on the EXIST – are tubular but they're not on the EXCELER. We went to a solid bail wire for its rigidity and resistance to bending during normal use, the thinner, smaller wire is also lighter, which reduces the weight of the rotation, thus reducing the weight of the reel. Its machined aluminum handle is a comfortable, strong connection to the main gear of the spinning reel. And the retooled EXCELER is extremely smooth utilizing 5 ball bearings and 1 roller bearing to maximize performance.

Free Swimmer

The Free Swimmer features an Air Rotor that stands out for its balance, toughness, and sensitivity. Its arched profile and 15% weight reduction compared to standard rotors offers optimal winding smoothness while eliminating vibration thanks to a lowered center of gravity. Its waterproof, carbon Automatic Tournament Drag (ATD) system uses an improved drag grease with low viscosity at rest that becomes more viscous immediately after drag start-up. The result is a super-smooth drag with low initial inertia and beast-stopping power. The Free Swimmer is available in both 3,000 and 5,000 sizes, with an alloy sideplate features Digigear technology. Compared to most of the competition, the gears are between 20% to 40% larger and have a bigger tooth pattern, resulting in longer gear life, up to three times that of competitive reels. Machined Aluminum Screw-In Handle with a Power Round EVA knob for generating extra leverage, plus an O-ring sealing system to ensure high-quality saltwater performance.

Free Swimmer EX

Free Swimmer EX features an Automatic Bite N' Run clutch at the base of the body, allowing anglers to instantly disengage the spool so line can peel off with little or no resistance while the bail is closed. Simply pull down on the lever to place the reel in free-spool mode and flip it back instantly to reengage when a fish grabs your bait. A small Tension Control Knob at the back of the reel makes it easy to adjust spool tension to control the speed at which line plays out. With the Free Swimmer EX, though, it's easy to cast energetic live bait away from the vessel, so it can swim freely where you're most likely to draw a strike. Fishing live-lining Gulf Coast hardtails or sardines, feeding big baits to tarpon in the Florida Keys, targeting huge cobia in the mid-Atlantic region or swimming big bunker in Northeast waters for cow stripers, DAIWA's Free Swimmer EX provides that extra edge. Using the tension control, you can moderate the speed your offerings swim, slowing overly active live bait to keep them centered in the strike zone. The ability to free-line with a closed bail also adds an extra degree of safety since you never have to keep a finger to a braided line to hold your bait in the perfect position.

Emcast Bite N' Run

The EMCAST Bite N' Run feature allows line to pay off the reel when a gamefish takes a live or natural bait. Once line is paying off the reel, the refined Auto Clutch will put the reel in gear allowing a solid hook set. It is much more controlled than simply opening up the bail, the traditional method used when fishing natural baits with spinning reels. The reel sizes vary from a 2500 Series to a 5000 Series making the versatile reel line suitable for many different applications in many different fisheries. The reel designs are in the LT Concept of light yet tough. The Carbon Light Body is substantially lighter yet just as strong as traditional materials. To further the concept, the Air Rotor is also lighter yet just as strong. A slick Machined Aluminum Handle is powerful yet comfortable to the hand. When a gamefish is taking a bait offering & the reel is put in gear, the ATD or Advanced Tournament Drag System, utilizing a proprietary grease, allows the smooth payoff of line no matter how long the run. A 5.2 to 1 Gear Ratio shades the reel toward pulling power.

BG

The BG series ranges from ultralight fresh-water actions to heavy big game saltwater models. With a strong black Anodized Machined Aluminum Housing and a solid screw in handle this reel is extremely rigid. The BG reels also feature an all-aluminum frame and features Digigear technology. Compared to most of the competition, the gears are between 20% to 40% larger. The gears also feature a larger tooth pattern, giving the gears a much longer gear life and durability than competitive reels. Tests reveal a gear life that is one to three times the length of competitive reels.

Eliminator

The Eliminator Series of Spinning Reels range from a compact 2500 series reel holding 6-pound test to a beefy 8000 series reel that can pack on the 30-pound test. The reels are also Well Suited For Braided Line Applications. The reel body is constructed utilizing the Hardbodyz Concept. The Aluminum Frame and Sideplate combine to form a strong rigid housing for the state of the art Digigears cut to smooth, precise standards. The attractive yet durable Anodized Finish is scratch and corrosion resistant. The Air Rotor design is 15-percent lighter yet more precisely balanced than competing reels. The stout Aluminum Spool can carry the increased pressures of braided line and houses buttery smooth, long lasting Felt Drags. Slide-in handle for easy left or right hand crank conversion. Suitable for fresh and saltwater applications.

Legalis LT

With a stark, modern appearance, the handsome reels are modestly priced with an abundance of design and engineering features. The LT body (light yet tough) is constructed from a carbon-based composite that is much lighter than conventional materials yet very durable. With a much greater strength to weight ratio, the reels are lighter and can be handled without fatigue over the long course of a full day's fishing. The spool design features the Advanced Ballistic System or ABS. This technology utilizes a reversed taper to pay out line in bigger loops reducing outgoing friction and improving casting distance. The oversize spool also holds more line and can exert more pressure on hooked gamefish. The Air Rotor and Air Bail are carbon composite designed lighter and stronger than conventional designs. Smoothness of operation is assured by 6 ball bearings and a roller bearing. Rarely in the spinning reel market can you find a reel modest in price yet loaded with state of the art technical and design features. The Daiwa Legalis LT is that reel.

Regal LT

Daiwa REGAL LT 2000D Spinning 9bb 1rb 5.2:1 – The Regal LT is the latest manifestation in Daiwa's storied Regal Line. The redesigned reel embraces the LT Concept of light and tough. The True Carbon Frame reduces weight and size yet is as rigid as conventional materials. The reel weight has been reduced from 7.9 ounces to 6.7 oz. in the 1000 series and 10.6 oz. to 7.6 oz. in the 3000 series. The Air Rotor System improves balance and rotation and reduces rotor weight by 15 percent. Reel performance is silky smooth with 9 ball bearings and 1 roller bearing. Few reels in this price range have 9 ball bearings. The Machined Aluminum handle is swept back and the knob is oversized and ergonomically designed. Available in 1000 to 3000 series sizes, it is a versatile line of workhorse reels, designed to put anglers of all skill levels in the high tech world of spinning reels.

Revros LT

The new REVROS LT incorporates the LT Concept of light but tough in a proven reel design. The spinning reel's weight was reduced by 2 ounces in the 2000 model and a hefty 5 ounces in the 4000 model. The Light Composite Housing greatly improves the strength to weight ratio while still providing a solid framework for the powerful gearing. The Machined Aluminum Handle smoothly transfers power to the main gear. The Air Rotor System is 15 percent lighter than comparable rotors.

Crossfire

The new LT cuts as much as 20 percent of the reel weight from the old Crossfire design. The solid ABS Aluminum Spool resists flexing and distorting and is deep enough to hold plenty of line yardage. The heart of the reel is the cold forged and precision milled Digigears. The state of the art manufacturing process optimizes the meshing between the main and pinion gears. Daiwa's innovative proprietary grease makes the Advanced Tournament Drag System (ATD) one of the smoothest on the market. The fit and finish is complete with a smart Machined Aluminum Handle that optimizes grip and provides positive torque to the main gear. With reel sizes ranging from 1000 to 5000 the new CROSSFIRE LT line is comfortable in freshwater or light saltwater.

DF Saltwater

The all-new Daiwa DF18000 is an improvement on the heavy-action spinning reel popular with so many jetty and surf anglers as well as diehard catfish fishermen. It's a no-nonsense workhorse designed to sink barbs and simply catch fish. The DF18000 features all-new cosmetics and a new rubber touch handle. It also features a stainless-steel main shaft, fully anodized corrosion brakes, and 3.4 gear ratio. The weight is close to 30 ounces and it has a fairly high retrieve thanks to the diameter of the big spool. It holds a good deal of line with 39.4 inches per crank. Its monofilament capacity is an astounding 460 yards of 20 pound test and 320 yards of 30 pound test; for J-Braid, the spool holds 600 yards of 50 pound test and 450 yards of 65 pound test. Maximum drag is 33 pounds.

Soleus XCS – Gun Metal

The Soleus XCS is outfitted with two Spool High-Speed bearings, which provide you with longer and smoother casts – all controlled by a fine-tuned internal centrifugal braking system. Targeting largemouth bass at a local lake, smallmouth bass in heavy current, or even peacock bass in the Amazon? This reel has you covered with 20lbs of drag! The Soleus XCS is the big brother in our Soleus lineup. It includes all of the same great features as the Soleus but boasts a larger 105mm handle and large EVA knobs that are soft to the touch and will not slip. Along with the larger handle, it has a lighter overall weight of just 6.4 ounces. We achieved this by using duralumin components, such as the hard-anodized duralumin worm shaft – which is both lightweight & strong. 10lb or 12lb fluoro? 50lb or 65lb braid? Each reel has a line memory system that won't let you forget what is on your spool. Saltwater proof!

Team Lew's Pro-Ti

Lew's is pleased to unveil the ALL NEW design of the Pro-Ti baitcast reel. With the Pro-Ti, Lew's is launching much more than a reel with robust features; we are launching a full experience from cast to catch – unprecedented palming comfort and control, the perfect cast and remarkable retrieval smoothness. Lew's hardened aluminum Speed Gears® has awakened a new level of operational smoothness to the modern baitcast reel, resulting in an exceptionally quiet and effortless retrieval. The premium P2 Super Pinion® is built for a robust gear stability to extend gear life and offer the angler competition-level durability. With the innovative recessed brake dial, the Pro-Ti yields a level of fishing comfort and control that is simply without peer among low profile reels.

Team Hyper Mag

The all-new HyperMag Casting Reel is constructed with an upgraded one-piece magnesium frame design that offers an unparalleled ergonomic feel when palmed. Complementing the contemporary magnesium frame are C40 carbon side plates and JDM-style Winn knobs on a 95mm bowed carbon handle to minimize weight and maximize visual appeal. Set in the center of the body is an aircraft-grade Duralumin double anodized drilled and chamfered u-shape spool that is enhanced with Lew's innovative Speed Knot quick line attachment. An 11-bearing system composed of stainless steel double shielded ball bearings works in tandem with the hardened anodized aluminum Speed Gears to deliver an unbelievably smooth cast & retrieve. Additionally, a carbon fiber drag system dishes out a whopping 20 lbs of max drag to easily turn the head of the biggest predator prowling your lake. A recessed brake dial with 4-pin SpeedCast externally Adjustable Centrifugal Brake system puts precision control of your equipment in the palm of your hand. Completed with their patented Speed Keeper retractable hook-keeping system, the Lew's HyperMag Casting Reel brings the latest technology and innovative features to your favorite casting rod.

Tournament Lite LFS

The Lew's Tournament Lite LFS Baitcast Reel is lighter, faster, and stronger. Key to the extreme light weight of the Tournament Lite is the wildly popular TLT1SH Tournament Lite Palm LFS one-piece aluminum frame with C45 carbon side plates, paired with an aircraft-grade double anodized Duralumin 34mm spool. The reel weighs in for the fight at only 5.3 oz. This is a critical benefit for all-day fishing, particularly in heavier applications. The Tournament Lite LFS boasts Lew's hard aluminum alloy Speed Gears, which were cut on high quality Hamai CNC gear hobbling machines, and the battle tested P2 Super Pinion bearing supported pinion gear. This smart engineering ensures precise alignment, an exceptionally smooth operation and, critical for top-level equipment, extended gear life. What truly sets this reel apart is its first-class performance on the water. The Zero Reverse one-way clutch system and the 27 position QuietCast Adjustable Centrifugal Braking system deliver unbelievably smoother and longer casts, a remarkable advantage when battling adverse winds – and an absolutely necessary feature for any competitive angler. With money and reputation on the line with every cast, you simply do not have time to battle backlashes and short casts.

HyperSpeed LFS

Fastest in the Team Lew's line up, the HyperSpeed baitcast reel has a 9.5:1 gear ratio with a screaming 40" RPT retrieve speed to offer high-velocity performance. Ideal for speed cranking big baits and muscling fish out of heavy cover with a lightning-fast retrieve. Housed inside a lightweight, one-piece aluminum frame and side plate is a 10-bearing system with stainless steel double-shielded ball bearings greased with Speed Lube for exceptional smoothness. Lew's HyperSpeed is engineered with Hamai-cut alloy Speed Gears for smooth, effortless cranking power with less wear and longer reel life.

BB1 Pro LFS

The new BB1 Pro LFS Baitcast reel is available in three gear ratios. The PRO1H model sports a 6.2:1 ratio. Most anglers favor the 6.2:1 ratio for deep cranking, though it also performs well with spinnerbaits, swim baits and a bladed jig like the Strike King Thunder Cricket. The 7.5:1 gear ratio makes for an exceptional multipurpose reel perfect for jerkbaits, topwaters and a variety of applications. Anglers looking for a high-speed reel will find the 8.3:1 ratio of the PRO1XH to be ideal. This higher ratio is perfect for fishing applications that require an angler to rapidly take up line, such as when reacting to a frog bite, or pulling in slack before setting the hook on a soft plastic. For pitching, flipping, or even slowly crawling a deep jig or Carolina-rig, the 8.3:1 is a good choice. The 6.2:1 and 7.5:1 gear ratio models are also available in left-hand models.

SuperDuty LFS

The SuperDuty's one-piece aluminum frame and handle sideplate with a premium 11 bearing system, featuring stainless steel, double shielded bearings, lays the solid foundation for one of the strongest reels in the Lew's lineup. Additionally, the P2™ Super Pinion™ bearing supported pinion gear provides precise alignment and solid stability, resulting in smoother operation and extended gear life. The carbon fiber drag system provides 20lbs of drag power to put the angler in control of the fight, while the deep capacity 34mm spool is designed to withstand heavy braid to for strength in hooksets.

Team Pro Skip / Pitch

From the mind of professional angler Andy Montgomery and the engineering team at Lew's comes the new Team Lew's Pro SP Skipping and Pitching reel. The super shallow spool holds 40 yards of 20-pound-test fluorocarbon for faster spool start up and reduced deep spool backlashes. The innovative Knot Slot recesses the spool knot so you have smooth, even line lay. The externally adjustable QuietCast® ACB system includes a special "Skipping Zone" to maximize distance and reduce backlash when skipping a bait under a dock. The result is a reel that has all the performance of a Lew's reel, finely tuned for skipping and pitching.

HyperMag Speed Spin

What sets the HyperMag Speed Spin apart is the extraordinary engineering of the light-weight magnesium body & the high strength magnesium skeletal rotor. Together with the proprietary forged main gear, premium 11 stainless steel bearing system and the new Winn slim design handle knob, these features distinguish the HyperMag Speed Spin as one of the lightest weight high performance spinning reels of the class. Key to the development of the HyperMag Speed Spin is one of the newest members of the Lew's Pro Team, Mark Zona. "The HyperMag Speed Spin drag system has been rock solid and frankly the feature that is hardest to accomplish in a spinning reel, is an exceptional drag system. Team Lew's nailed it with the HyperMag." The smooth sealed carbon multi-disc drag system delivers consistently strong and smooth fish fighting. The HyperMag Speed Spin is available in two models. With both the 200 Series (HMS200) and the 300 Series (HMS300) on the deck of the boat, anglers will be prepared for all applications.

American Hero Tier 1

Built to pay homage to the American Warrior. Forged from the finest raw materials and tested relentlessly in the harshest elements – to deliver nothing short of the best. Team Lew's new American Hero® Tier 1 Spinning Reel is a tournament-ready reel built on a high-performance aluminum frame to withstand the abuse of serious anglers. The Tier 1 is expertly designed for consistent, tangle-free casting, and a smooth, low-torque retrieval. Light enough for finesse fishing, yet with a proven Lew's drag that is powerful enough for fighting big fish. And the Multicam Dip system gives every single Tier 1 reel a unique design. Make no mistake, the team behind Lew's American Hero series is absolutely committed to offering top-level performance gear that excels on the water and puts more fish in the boat.

Sniper

The Sniper Spincast Reel is changing the way you look at spincast reels! The reel features a blazing 6.5:1 gear ratio making it the fastest spincast reel in the world! The 9.9oz Sniper reel brings in an incredible 31" per turn of the handle. The 13 bearing system with Zero Play Anti-Reverse makes the reel unbelievably smooth, and the carbon drag system delivers up to 10lbs of max drag for fighting fish! The aluminum handle with EVA knobs gives you the leverage and comfort you need, while the double anodized aluminum cone, aluminum drag star, and all metal gears ensures the reel will last. The Sniper is pre-spooled with 85 yards of 10lb premium monofilament line, making it ready to fish.

PBF Army

The Favorite Army spinning combo has a unique design that shows off our Favorite Army pride. Built using ultra-sensitive 24-ton Toray carbon blank materials, these Rods employ MLS (Multi-Layer Structure) technology that layers carbon of varying modulus and fiber direction to produce a reinforced construction and improved torsional load resistance. In addition, an X-shaped carbon tape wrapping along the blank provides increased durability and overall power. The guides are made of polished stainless-steel frames with nano-lite rings to increase castability and durability. Coupled with streamlined reel seats that fit comfortably in your hand and reduced weight. The spinning reel is 5.2:1 gear ratio and 5 stainless steel ball bearings make this a combo that is smooth and easy to retrieve regardless of what kind of fish is coming with it.

Laser MG Speed Spool

The 8-ball bearing Laser MG baitcast reel features a one-piece, lightweight graphite frame and sideplates. The palming sideplate is quick and easy to remove for immediate access to the spool. The heart of the reel is the solid brass SpeedGears cut on precision Hamai gear hobbing machines. A durable Rulon drag system delivers up to 15lbs. of drag power, with adjustments made easily using the bowed graphite star located next to the handle. The rod features Lew's proprietary skeletal graphite reel seat to keep the reel secure and in place without jeopardizing sensitivity. The rod's EVA split grip handle reduces weight and makes for all-day fishing comfort. A patented "No Foul" hook keeper stays out of the way during casts and retrieves, but on the ready to safely secure a hook or lure when not in use.

Tundra

You'll often find Tundra combos on a pier, jetty or beach, where heavy casting weights and a tough fishing location is the norm. Catfish anglers also love the Tundra combos for their no-nonsense approach to landing fish. Glass fiber blanks feature reinforced double foot guides on all models. With lengths from 7- to a full 12-feet in length, casting distance an power is the name of the game.

Wrath II

The PENN® Wrath® II combo was engineered to be a versatile all-around combo at an affordable price. Wrath II combos feature EVA grips for fish fighting comfort and control, a two-piece graphite composite rod, and now, PENN®'s ultra tough Dura-Guides which eliminate the possibility of guide insert pop outs providing long lasting durability further protecting your investment. The reels feature a lightweight and corrosion resistant graphite bod with a 2+1 stainless steel bearing system. From inshore waters to the crashing waves of the surf, the Wrath® II combo is up to the challenge.

PROFISHIENCY

Krazy

The Krazy combo is packed with high-end features and bright colors that allow it to stand out from the competition! The rod features a strong 30-Ton Carbon Blank, Fuji reel seat, and a premium cork handle. The reel features a 10 bearing system with Zero Play Anti-Reverse, an easy to adjust external adjustable magnetic braking system, and comes in 6.6:1 and 7.3:1 gear ratios for multiple applications. The aluminum main gear and crankshaft, machined aluminum spool, hard brass pinion gear, and carbon fiber handle with cork knobs make the Krazy Baitcast Combo the combo you need!

Krazy 3

Bring out your inner pro angler with the ProFISHiency® Krazy 3 Baitcast Combo! With its wicked-sharp colors and solid features, this stylish rod and reel set will put you at the heart of contention. The Krazy 3 reel specifically targets bass with a bevy of pro-style features, starting with its magnetic braking system for casting accuracy and blazing 7.3:1 gear ratio. Also: braid-ready aluminum spool; ultra-smooth 7+1 bearing system with instant anti-reverse; premium carbon fiber drag system; precision aluminum drag star; and 95mm carbon-fiber handle with rubber knobs. The rod is great for a number of bassin' techniques: crafted on a quality 1-piece IM8 graphite blank with medium-heavy action, it's both strong and sensitive. Features durable stainless steel guides with aluminum oxide inserts, clear low-profile reel seat for comfortable palming, and a split-grip handle with cork grips. Ready to rock!

Next Gen Flash

The eye-catching ProFISHiency® Next Gen Krazy Series Baitcast Combo is specially crafted and appropriately sized for the up-and-coming angler who's ready to advance to casting gear. The casting reel is built with a smaller profile and a shallow spool, to better fit the hand and minimize the troubles (i.e., major backlashes) associated with learning to cast and to use the adjustable magnetic braking system. Overall, this is a very smooth, fun-to-fish reel, with a quality 10-bearing system and quick retrieve. The system-matched rod is built on a 5'6" IM7 graphite blank with medium-heavy action; light enough to handle and short enough to control, this rod has the strength to overcome any "blips" in the learning curve.

READY2FISH[®] Panfish

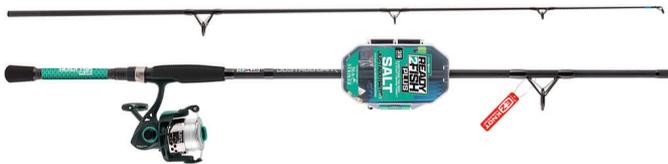

This comprehensive rod and reel kit includes all the equipment and supplies you need to go fishing. The "No Knots" fishing system features a snap that's already tied onto the fishing line. Simply thread the snap through the guides, place your weight and hooks, add your bait and you're ready to go. New anglers will enjoy the simplicity of the smooth-spinning reel, which comes pre-spooled with monofilament line. The high-density EVA split-grip handle ensures all-day fishing comfort. Includes a 48-piece accessory kit that's loaded with essential fishing lures and other tackle.

ZEBCO

Big Cat

Zebco's Big Cat spinning combo is durable and ready for any tussle with a huge catch. A match for any catfish, this combo is built with all-metal gears, a smooth, multi-layered drag stack, and a ball bearing system in the reel, while the rod provides even more durability with a strong fiberglass rod and double-footed stainless-steel guides. A high-visibility rod tip and 25lb hi-vis line increase awareness of movement under the water to help anglers snag a catfish with ease.

Saltfish Bait Alert

The lights get brighter and the batteries last longer on Zebco's patented Bite Alert™ system that provides both visual and audio indications when a fish begins to tug the line from the reel spool. Bite Alert™ has always had a loyal following among serious-minded users of hearty size 60 spinning reels, but batteries often fell short on longevity. Now it's improved because there's only one battery instead of two, and it lasts much longer. Plus, the light is now green instead of red, making it more visible to anglers that often chase catfish at night. Zebco has also worked hard to improve the performance and ease of use of the strike sensitivity adjustment. This 60sz combo features a 7' medium-heavy action rod with a high-vis green tip. Pre-spooled with 20lb line. Requires one CR2032 battery (included).

Big Cat

Catfish are the second most fished-for freshwater species in America behind bass, and Zebco is launching an impressive offering of beefed-up rods and reels called "Big Cat" to accommodate the serious value-minded anglers who passionately pursue them. The tip guides on all "Big Cat" rods are made of stainless to minimize insert pop-out, and high-vis glow tips aid in seeing the slightest bite. The Big Cat XT™ spincast reel features a stainless metal front cover and titanium nitride plated stainless steel spinnerhead. Pre-spooled with 25lb line.

Veritas PLX

Introducing the next generation of Veritas rods with Powerlux® 100, which increases the rod's strength by 15 percent while also reducing the rod's overall weight by 5 percent. The new Veritas rod family gives anglers the performance, sensitivity, and durability they need to win, whether they're fishing for fun or for a paycheck. The Powerlux 100 resin system evenly distributes nano particles between each carbon fiber to enhance the rod's performance and strength by preventing cracks in the blank material. The Powerlux technology helps produce rods with higher break strengths and improved impact and fracture resistance. The Abu Garcia custom designed reel seat delivers hypersensitivity around the exposed blank sections and improves comfort for all-day fishing. Coupled with titanium alloy guides with zirconium inserts and closed cell EVA split grips, the Abu Garcia Veritas pushes the limits of high-performance fishing rods.

Black Diamond Jig Pole

THE ULTIMATE LIVE IMAGING ROD! The all-new Black Diamond Jig Poles are the standard for live image enthusiasts! These rods feature IM6 Graphite, stainless steel guides, carbon fiber reel seat, and genuine Portuguese cork handle. The Black Diamond series features 2 sizes: 16ft/3pc and 18ft/3pc. The 18ft features a 3.2 counter-balance weighted handle for better balance and handling. Counter-weight plates are removable in order to customize your balance.

Pro Staff Trolling Pole

Use these rods for pulling crankbaits, jigs or live bait in open, clear water. The additional length will keep you far enough away from the crappie to prevent shadowing or spooking. As with the rest of this series, these rods feature an upward reel seat on the 21 inch EVA handle to allow ease of use with any rod holder. They have a lot of backbone for the most aggressive trolling depth at any speed. 100% graphite.

Diamond Graph Jig Pole

The Diamond Jig Pole Series is available in 8, 10, 12 and 14ft lengths (all 2-pc construction). This jig pole is made from high modulus graphite that provides a stiffer backbone and maintains tip sensitivity. This perfectly balanced pole uses high quality aluminum oxide frames with stainless steel inserts. This is one of the best-looking jig poles on the market due to its gleaming royal blue color and gold and silver accents along with its 100% real carbon fiber handle.

Buck's Sharp Shooter

A continued quest for the perfect rod for dock shooting lead us to the Sharp Shooter Deluxe 6. This rod has been field tested by our pro staff for the last year. The one piece blank is made of extra stiff 98% graphite that provides longer and more accurate "shooting" of jigs as small as 1/64. The micro tip eyelet reduces line wiggle.

Heaton Signature

We redesigned the Sam Heaton Signature Series into the Sam Heaton Super-Sensitive. Same terrific action, but now with great burgundy color, brass plated guides and a Portuguese cork handle. Made of IM-6 graphite 40 million modulus blanks, these rods are especially designed for crappie and panfish.

Little Lucy Crappie

The Little Lucy is our latest introduction in the Ultra-Light category. It's perfect for tight spaces (like under trees and in your trunk), and Lucy makes bream fishing feel like you're tangling with a Florida bass. It's a great starter rod for your little fishing buddy, too! A great looking rod with easy-visible gold finish and smooth-flowing guides.

The 410

A Lot Of Power Packed Into An Affordable, Small (M)-UI Rod! The all new 410 is a medium-ultralight, fiberglass rod that packs a lot of punch. This rod will provide a lifetime of enjoyment catching crappie and bluegill at your favorite fishing hole. Unlike most other rods of this type, the 410 is a one section rod which provides greater strength. And, this rod has more backbone allowing better hooksets. EVA handle. Ceramic-insert guides.

Back Bay Inshore

The Back Bay series of rods were designed and tested using the harsh and sometimes unforgiving conditions of Back Bay fishing. These spinning rods were engineered with Coastal fishing in mind and then made versatile enough to crossover into many other markets. Rods were designed with heavier power ratings to excel at both live bait fishing and casting lures. If you are in the market for a series of dedicated inshore rods designed and tested for fishing the back bays, then you owe yourself a look at Daiwa's all new Back Bay series rods.

Tatula XT

The Daiwa Tatula XT Casting Rods deliver tournament-proven performance at a price that won't break the bank. Daiwa's Zero G design makes the blanks incredibly lightweight, while also providing serious hook-setting power, and Daiwa's exclusive HVF carbon blank technology delivers incredible sensitivity, as well as, optimum actions for a variety of techniques. The blanks also feature Daiwa's X45 Bias graphite fiber construction that helps them resist twisting for less stress on the rod, greater strength, and increased hook-setting power. Premium Fuji Aluminum Oxide Guides span each blank and offer serious durability as well as increased casting performance. Fuji ACS Reel Seats provide a comfortable base for your reel, while also remaining lightweight, and EVA split grip handles balance out each rod perfectly. Perfect for a wide range of bass fishing applications, the Daiwa Tatula XT Casting Rods do it all for a great price.

Aird Coastal

The Aird Coastal Inshore Series are designed for smaller game with faster actions and lighter bends but still bear the strength to subdue bigger fish on light line. The spinning designs are rated from 6- to 12-pound, 8- to 17-pound and 10- to 20-pound, the perfect ranges for light tackle enthusiast. The blanks are constructed with the Braiding-X Technology for a sensitive bend with the durability of a heavier rod. Lightweight Aluminum Oxide Guides augment the refined bends. Classic Cork Handles provide a firm grip and handsome look. The look, feel and performance of the handsomely designed Aird Coastal Inshore Series makes them perfect for a wide range of light tackle and finesse applications.

Tanacom Dendoh

The Tanacom Dendoh Rods are a beautifully designed series of 10 deep drop rods representing the culmination of Daiwa's offshore "Dendoh Style" rod development. The powerful Glatech Blank Construction sandwiches uni-directional fiberglass between 90° inner and outer layers of graphite. The result is an incredibly resilient blank with the backbone and lifting power needed to control and move strong fish. Daiwa's popular Powerlift Grip increases comfort and grip while allowing maximum pressure. The Alps Swivel Tip Top Guides avoid unpleasant surprises right at the transom. The Seaguide Aluminum Oxide Ring Guides are strong while allowing minimum resistance whether paying out or retrieving line. The rod is finished with an Alps Anodized Aluminum Curved Butt End and Aluminum Reel Seat. If deep drop fishing is your game then you owe yourself a look at the new Tanacom Offshore Deep Drop Rods. Well-built with quality parts, this series of rod will occupy your rod holders for a long time to come.

Harrier X Jigging

The HARRIER X is a multi-purpose rod designed for the hottest new techniques in jigging with flutter and knife-type jigs as well as traditional treble hook jigs. In southeast and northeast fisheries, ideal for all types of bottom fish jigging. The HVF Carbon Technology constructed blank is lighter and stronger than conventional materials, well suited for the demands of coastal fishing. The blank is tough, durable and light in the hand. The X-45 Bias blank material resists twisting making the rod load up evenly resulting in a more powerful bend. The Fuji Tangle-Free K-Guides with Alconite Rings are durable and pay out line freely. The sturdy EVA Grip provides a sure, strong hold on the rod. The FUJI Back-stop Reel Seat keeps the connection to the rod strong and won't loosen during regular use. Available with a light, yet strong graphite built GRC Butt Cap that lightens the rod without compromising strength. A convenient Hook keeper provides a safe place to hook the jig. A 5-Year Limited Warranty backs up the quality construction.

Beef Kitty Catfish

Daiwa Beef Kitty Catfish Rods are long, and unmatched in strength and durability. These long rods will cast nicely to help you get into deep waters where the big ones live. The Beef Kitty series features lengthened shrink tube handles for a comfortable grip and increased leverage when the big one is on. Most importantly, these rods include a brilliantly designed glow-in-the-dark tip for easy bite detection at night.

Micro Magic

Designed on the Micro Guide Concept for an overall lighter rod, as well as, significantly improved casting distance and accuracy, the micro guides also offer a substantial improvement in balance and sensitivity. The new proprietary 0.7mm Artus High Gauge 316SS Ring Lock Micro Guides with hyper-lite braid-proof inserts deliver increased durability, and also feature a new double-foot elevated stripper guide that adds additional strength and facilitates a smoother transition of the line from the reel for increased casting distance and accuracy. Advanced Sensi-Touch blanks made from the highest quality multi-modulus pre-pegs create an extremely lightweight and durable rod. Comfort grip Fuji reel seats form a lightweight, ergonomic base for your reel & premium cork grips deliver all day comfort.

Slab Series

The Slab Series, rods have weight saving, ergonomic grips, a light weight guide system, a aerospace grade carbon material and resin system. The higher modulus, higher tensile material results in a blank that is lighter, stronger, and more responsive. Even with constant innovation, we remain true to our roots. Experienced craftsmanship and the finest components available – all backed by decades of first hand fishing know how.

BB Frogging

The HALO BB Frogging Rods are made with a high modulus graphite blank that provides exceptional strength and sensitivity. The Halo BB Frog Rods come in three lengths and actions to suit any angler's preferences. Whether you prefer a shorter rod for precision casting and better "walk the dog" ability or a longer rod for greater distance and power to get them out of the junk – we developed these rods with ONLY Frogging in mind. We designed these rods with a fast action to easily create the perfect frog action, to generate more bites relying on the BB Frog Rod's fast tip to drive those double frog hooks with max penetration and lots of backbone handle even the biggest fish with ease. The grip is made of high-quality cork, which provides both comfort and durability. The reel seat is made of premium materials and is designed to keep your reel firmly in place even under the strain of a fully loaded fish and all the weeds that come with it.

HFX Pro

The Halo HFX Pro comes with Toray graphite blanks that deliver ultimate sensitivity in casting and spinning models from 6'10" to 7'11" in medium to extra heavy actions. The HFX's stainless steel guides are built to handle even the toughest braided lines but still super sensitive for the lightest fluorocarbon, rely on our Align guide system that ensures perfect alignment of guides from handle to tip. The Halo-exclusive 4-Finger reel seat offers an exposed blank design to allow fingers to feel the slightest bait touch. Sensitivity is further enhanced with integrated Sensi-touch cork composite rings that deliver more feel through the grip than conventional foam grips.

Team Lew's Signature

What sets the Signature Series apart from other rods in the pro model space is FOCAS Blank technology. This multi-layered graphite blank production process delivers 75% greater tip strength and overall blank durability. And most critically, this innovative strength design preserves superior sensitivity. Signature Series rods also feature WINN'S generation polymer Dry-Tac ULTRA Grips, delivering complete rod control. All Signature Series rods also feature SEAGUIDE Premium Aluminum Oxide guide inserts, yielding consistently smooth casts and durability with all line types.

XD Crankbait

What makes the XD Series the premier rod for cranking is the Premium HM50 Tour Grade high modulus Graphite rod blank with Carbon Nano Tube construction. The Lew's hybrid construction has delivered a rod with the ideal amount of blank power for securing exceptional hooksets and long casts, while providing a soft tip that is necessary for fish fighting, phenomenal bait action, and dealing with fatigue that often accompanies long hours of cranking. The XD Series is engineered to meet the challenges of heavy cranking, with first-in-class SEAGUIDE X-Frame guides for smooth casting and delicate movement of line that is under constant tension and vibration with each crank of the reel. The Winn DRY-TAC polymer grips, but with new exclusive to Lew's, full length handle grips, for easy two hand casting.

TP-1 Black Speed Stick

The Lew's TP1 Black Speed Stick Rods are built around an impressive high modulus graphite blank that comes in a wide variety of technique specific lengths and tapers. However, it's the rod's components that truly steal the show. Everything in the design of the TP1 Black Speed Stick is geared towards sensitivity. The minimalistic SoftTouch Skeletal reel seat allows the angler's hands to be in direct contact with the blank & if that wasn't enough, the Vibration Transfer Ring brings even more sensitivity to the table.

KVD Cranking

The Lew's KVD Composite Cranking Casting Rods are specifically designed to enhance the performance and hook up ratios of crankbaits. Made with a composite blank construction, the Lew's KVD Composite Cranking Casting Rods deliver parabolic actions that cast crankbaits incredibly long distances to achieve maximum time in the strike zone and maintain constant pressure when fighting fish to increase your landing ratio with treble hooked lures. They also feature a proprietary Full Contact reel seat that increases contact with the blank to transmit more vibration into your hand for increased sensitivity.

Rampage Boat

The Rampage rod is designed to be a work horse for charter boats or anglers that need durability in a variety of fishing situations. Constructed with tubular glass blank for extra strength, the Rampage also features a solid glass tip that helps keep the rod tip from breaking even when high stuck. Each rod features guides built with heavy duty stainless steel frames and aluminum oxide inserts that are perfect for both mono and braided lines. The soft yet durable rubber gimbal is used on select models providing the same function as a traditional metal gimbal without the worries of scratching or cracking the gel coat on your boat. Rubber gimbals also help ease the pain that traditional metal gimbals can put on your body while fighting a fish. EVA Torque™ grips are contoured to fit your hand perfectly and eliminate the rod from twisting while under heavy load.

Battalion II SL Pitch

The Battalion™ II Slow Pitch Rods use PENN's RCB2 construction of a rolled composite core and outer layers of longitudinal glass to provide a lightweight, thin, and parabolic blank that flexes from grip to tip, distributing weight for extra durability. Tangle-Free Fuji® K guides with Alconite inserts, Fuji® reel seats, and tapered EVA grips pair for a technical, sensitive, and premium setup. These parabolic blanks offer sought after durability, balance, and recoil anglers need to work jigs from nearshore bays and sounds to offshore wrecks and bottom structures.

Back Bay Oval Float

The Cajun Thunder Back Bay Oval float is a weighted, nosier, more versatile version of the Equalizer. Two solid brass beads and two large plastic beads replace the eight bead set-up on the Equalizer. The brass beads not only intensify the bait-click, but also transfer weight from the leader to the Cajun Thunder, which enhances the action of live bait or an artificial jig. The added weight also allows for longer casts.

E-Z Crappie Float

This cigar-shaped float comes in 3 sizes that are ideal for crappie fishing. The exciting feature about the E-Z Crappie Float is the slot which allows for easy on and off application. No more cutting your line to add your float. The E-Z Crappie Float can also be used for "Slip Float Fishing." Each pack contains: (1) yellow float, (1) green float, and (1) red float.

Evolution Popping Float

At first glance you would think it's an INTICER, but look closely at its design. It's on a stainless steel wire and it does utilize the same cork body and beads, and it's weighted. The greatest difference is beneath the weight, an eye and swivel were added. This allows you to attach your leader to the bottom or to the top of this cork.

Thill Nite Brite Float

The Thill Nite Brite is the answer to a long-time angling need—a float that triples as lighted float, slip float, and fixed float in one neat functional unit. Unlike many “lighted bobbers” with tangle-prone appendages for slip-bobbering, Feature a through-the-center slider hole—the real slip-float principle.

Heavy Circle Offset Hook

The BKK Offset Heavy Circle Glow is developed specifically for low light conditions, namely for night fishing or deep dark waters. The BKK M-series glow paint on the hook adds attractiveness and visibility to the hook, triggering the fish to bite. In addition to the circle hook design, the offset hook point (reversed) further enhances the hook up rate. When fishing very deep under the surface, the exposed hook point helps to maximize the chances of fish's self-hookups.

Heavy Circle Offset Hook

The BKK Offset Heavy Circle Glow is developed specifically for low light conditions, namely for night fishing or deep dark waters. The BKK M-series glow paint on the hook adds attractiveness & visibility to the hook, triggering the fish to bite. In addition to the effective circle hook design, the offset hook point (reversed) further enhances the hook up rate. When fishing very deep under the surface, the exposed hook point helps to maximize the chances of fish's self-hookups.

Monster Inline Circle Hook

BKK's Monster Circle hooks are specifically developed to target the greatest and strongest saltwater species like bluefin tuna and marlin, both on bait and when trolling. It features BKK's Ultra-antirust coating that ensures superb saltwater corrosion performance out of the package. BKK's needle hook point is extremely sharp and the heavy-duty wire minimizes the chance for the hook to be pulled open. Additionally, its straight hook eye and the in-line hook point design ensure a jaw corner hook up, being for this reason ideal for C&R.

SF Reefmaster Assist Hook

The concept underlying the development BKK SF Reefmaster NP jigging assist hook is to provide anglers with a product that can be used straight out of the box with a high cost/performance ratio. This assist hook comes pre-tied with a high-quality assist cord that consists of 16 braided strands tightly woven together to achieve the required strength and flexibility. The glow binding thread on the hook enhances the attractiveness stimulating strikes even in low visibility conditions. The hook features BKK's signature hook technologies including the Hand Ground hook point, micro ring technology and corrosion resistant bright tin coating.

SF Lentus S Assist Hook

The BKK SF Lentus S heavy slow jigging hook is specifically developed to target deep water fish and is designed with a heavy gauge that can Jbuffer the run of big fish. The hook comes equipped with BKK fluorocarbon assist cord that ensures a proper orientation of the hook, improving its penetration performance and providing a well-balanced flexibility to the cord. Besides, BKK deploys a special forging process that reduces the possibility of the fish's skin being torn off during long fights. Furthermore, in order to secure the line in position, the hook features a flat shank design. BKK's razor-sharp Cutting Delta hook point and the Bright tin coating technology further enhances the hook's penetration performance and corrosion resistance.

Kajiki HD Hook

The BKK Kajiki HD Trolling HG is the ultimate trolling hook for billfish designed for 24kg-37kg class tackle. It features BKK's Hand Ground hook point that delivers superb penetration performance and ensures solid hook ups. The Bright tin coating performs excellently in harsh saltwater environments, maintaining the hook's sharpness over time. The perfectly welded ring and forged hook shank further enhance the strength of the hook. Last but not least, the hook point is slightly turned in, enhancing on the one hand the initial hook up and on the other maximizing the grip to buffer possible jumps of the fish. The Kajiki HD Trolling HG is the go-to trolling hook when going after the world's biggest and strongest fish.

Lone Diablo Inline Hook

The idea behind the design of the BKK LONE DIABLO was to create the perfect single hook for lures. BKK's latest technologies have been put together to give birth to this hook, equipped with top-notch penetration performance, long lasting saltwater corrosion resistance and an excellent strength of the hook structure. The innovative BKK Hand-Ground hook point provides cutting edge sharpness and penetration performance, while the Bright Tin coating technology minimizes the possibility of rusting and the peculiar hook shape maintains the grip throughout the fight. Last but not least, the combination of Micro and Slim Ring results in a slim profile without affecting the strength of the hook. Bestowed the Good Design Award 2017.

Wide Gap-R Hook

The BKK Wide Gap-R bait hook is specifically designed to favor a natural presentation in live bait fishing using bait fish, shrimp and crayfish. The unique bend of the hook creates a really wide gap that allows bait fish to swim freely. Besides, the combination of a the shape (hook point facing the hook shank) and an offset hook point (reversed) contributes to its ability to self-set into the jaw of the fish. The hook features a needle-sharp hook point & a black nickel coating that delivers great corrosion resistance performance in a wide range of conditions.

Siren Worm Hook

The BKK Siren is a worm hook specifically developed for Texas rigging a wide variety of worm baits such as curly tail worm baits, straight tail worm baits and stick baits. A medium gauge wire design makes it suitable for medium weight lines. The round bend ensures an adequate hook gap that allows for a proper hook up even when using bulkier profile worm baits. The combination of Super Slide coating and the needle-sharp hook point ensures great penetration performance and smooth hook ups by decreasing piercing resistance.

Fangs 63 3X Treble Hook

The BKK Fangs 63 UA is an all-round highly versatile 3X-strength treble hook that features BKK's ultimate Ultra-Antirust coating, which provides superior resistance to saltwater corrosion. For this reason, it is particularly recommended in salt water application. The design was inspired by the bend of the traditional O'Shaughnessy, a time-tested structure that has proved to deliver an outstanding hook up rate. The length of the hook shank is suitable for various kinds of lures such as top-water, minnow and crankbait. Thanks to BKK's detail-oriented craftsmanship, the hook comes with needle-sharp hook points that ensure an excellent hook penetration performance.

Viper-41 4X Treble Hook

The BKK-VIPER-41 is a strong and shiny 4x treble hook designed with long and straight needle points and a very aggressive bend. One of the techniques we targeted during the design of the BKK-VIPER-41 was topwater lure fishing. What we wanted to achieve with this hook was a lighter treble that would reduce its impact on the swimming action of the lure, at the same maximizing its penetration and holding power. To reduce the overall weight of the hook and to make it stay closer to the lure we shortened the welded section of the treble, thereby also providing more flexibility to the structure. The point is designed to maximize the hook-up rate when fishing topwater or when targeting fish that suck in the lure, while the aggressive shape of the bend ensures that the hook does not come off when the fish thrashes and jumps out of the water. The BKK-VIPER-41 is coated in Bright Tin to resist even harsh saltwater environments & comes in a wide size range (6 to 6/0) to fit a huge array of lures, from small vibes to big SW stickbaits and poppers.

Superline RB Worm Hook

Gamakatsu new Superline Offset Round Bend is designed with a heavier Superline wire best suited for heavy braided & fluorocarbon lines. This popular design in heavy wire enables anglers to fish any plastic in the heaviest of cover with no worries. The Round Bend offers a larger bite area perfect for any worm presentation while increasing your hook-up ratios. The newly enhanced Z-Bend holds your plastics on hook longer, reducing the number of pull-offs and reducing damage to plastics.

Heavy Cover Worm Hook

The Heavy Cover Worm hook has been built to the highest standards to fight the biggest fish in the heaviest cover. The Heavy Cover Worm Hook with Wire Keeper features our rock solid welded eye, perfect for tying a snell knot with braid. Instead of a bulky heat shrink barb, the Heavy Cover Worm features a small wire keeper. The keeper has a small compact profile and is strategically placed for superior holding power for plastics.

Spring Lock Spinner Hook

The Spring Lock Spinner Hook makes your favorite swim-baits and other soft plastics even more effective by adding flash and vibration to attract fish from even greater distances. The revolutionary design features two retaining wires wound in parallel, making rigging simple and providing even more holding power, so baits won't slip no matter how hard you fish. The new rigging system has innovative features that draw strikes from fish & is built on a premium 2x strong hook to handle large predators.

Octopus Circle Hook

To comply with new angling regulations in the Gulf of Mexico, we've redesigned and reinforced our most popular circle hook. The new 4X Strong Circle Hook is built for the toughest offshore battles. The straight eye, NS black finish and inline point (not offset) complies with the new rules, but doesn't reduce the hook's effectiveness. This is the new "go-to" hook charter captains & professional anglers are using for deep dropping and reef and wreck fishing.

Keeper Hook

The key to the effectiveness of the Mister Twister®™ Hook is the small “Keeper” barb attached to the eye of the hook. It means fast hook-ups and more fish. Solid and virtually weedless. The Keeper™ Worm Hook makes a very effective Carolina Rig. This rig is perfect for covering a lot of water while locating brush piles, rocks and other bottom structure. It is also ideal for fishing large contours like bays or points while searching for specific spots where fish are holding.

Mustad®

Carlisle Hook

The Classic Carlisle Bait hook is perfect for a straight presenting of long baits, such as worms and leeches or grubs. The kirbed hook point gives improved hookset. The hook is popular among Walleye and Catfish fishermen, but also when fishing for Panfish, where the long hook shank allows easier hook removal, avoiding fish swallowing the hook.

Aberdeen Hook

The Classic Aberdeen hook has been an all time favorite with salt and freshwater anglers. This long shanked hook is perfect when using long natural baits, such rag or sand worms or as live bait hook. The “MTL-V1” point combines a more efficient point design with a new sharpening process to enhance the quality. The result is a sharper, sleek new point shape with penetration resistance 50% lower than Classic Hook points!

Aberdeen Fine Wire Hook

A fine wire variation of the fantastic durable all-round Aberdeen hook for a more delicate bait presentation, such as Minnows or worms fishing for Crappies. This 1X fine wire hook features a beak hook point for excellent penetration & strong hook holds. Crappies are very sensitive to color and a change of hook color can trigger a bite. The “MTL-V1” point combines a more efficient point design with a new sharpening process to enhance quality. The result is a sharper, sleek new point shape with penetration resistance 50% lower than standard Classic Hook points.

Big Eye O'Shaughnessy

The Mustad Classic O'Shaughnessy hook range features a large straight eye and a forged hook for great durability and strength. It is a perfect live bait hook fished either as one, two or triple rig, trolling or flatlining for King Mackerel, Bluefish, Wahoo or Barracuda. Use heavy single strand wire or fluoro-carbon line to make your rigs using Pilchards or Sardines as bait. The smaller sizes can be used as trailer hook on spinnerbaits. The "MTL-V1" point combines a more efficient point design with a new sharpening process to enhance the quality. The result is a sharper, sleek new point shape with penetration resistance 50% lower than standard Classic Hook points!

O'Shaughnessy Hook

The Classic O'Shaughnessy hook range has been an all time favorite with saltwater anglers. This forged wire hook is perfect when using long natural baits, such as whole fish heads/tails, squid or crabs either inshore or offshore. Perfect for both slow trolling and stationary fishing. It is a time-tested true all-round hook, which can be used to present any bait for species ranging from Sea Bass, Mahi-Mahi/Dolphin fish, Cod, Bluefish and Striped Bass. The "MTL-V1" point combines a more efficient point design with a new sharpening process to enhance the quality. The result is a sharper, sleek new point shape with penetration resistance 50% lower than standard Classic Hook points! Available in Black nickel, Bronze and Duratin finish.

Wide Gap Hook

The Classic Mustad Wide Gap hook features a slightly reversed hook point that helps keep bait and fish secure after hookset. It is designed for fast penetration being hollowed or rounded out between the tip of the barb and the tip of the point. The outer side of the point is straight. This hook will almost lock itself in the jaw. Perfect for baiting Crawdads, shrimps, worms, yabbies' or shiners. The "MTL-V1" point combines a more efficient point design with a new sharpening process. The result is a sharper, sleek new point shape with penetration resistance 50% lower than standard Classic Hook points!

Mustad®

Wide Gap Croaker Hook

The Croaker Hook is a popular hook for targeting Speckled Trout, but also Redfish, Striped Bass and other estuary or saltwater fish eaters using Croaker as live bait. The wide gap hook is perfect for live baiting with no compromise to hooking and holding abilities. The 1X strong wire hook features a turned-up ball eye and slightly reversed hook point for improved hooking potential. It is designed for fast penetration being hollowed or rounded out between the tip of the barb and the tip of the point. The outer side of the point is straight.

Bait Holder Hook

This strong, forged Mustad Beak Bait Holder Hook features a reversed hook point for improved hook hold. It permits the point to come in contact with the mouth of the fish, without turning. The 1X long shank provides for bigger and longer worm baits. This bait holder hook features two slices/barbs on the shank to better hold the bait in position and obscure the point. The "MTL-V1" point combines a more efficient point design with a new sharpening process to enhance the quality. The result is a sharper, sleek new point shape with penetration resistance 50% lower than standard Classic Hook points!

Ultra Big Gun Hook

The Mustad Big Gun® hook is ideal for targeting strong saltwater species. Perfect for cut bait such as squid or fish chunks. Use it to target Snapper, Snook, Mangrove Jack, Coral Trout using the smaller hook sizes, or aim for King Fish, Tuna, Ling, Conger or Shark with the bigger hooks. The hook features a kirbed hook point for improved hook-set. Coated with Mustad's own Black Nickel finish, which is 4 times as rust resistant as traditional Black Nickel.

Inshore Circle Hook

The Mustad Demon® Perfect Offset Circle Hook with its precision proportioned modified point design, with a 96° angle hook point, ensures a high percentage of lip or jaw hooking. Made for live bait presentation. It features 1X strong wire and making it perfect to target bigger fish. The distinct curved shape of the hook will, when the fish takes the baited hook and swallows it, ensure that the hook travels to the corner of the mouth or lip, resulting in fewer deep-hooked fish.

Assault Wide Gap Hook

Mustad Assault Wide Gap Hook is built for landing lunkers. For versatile applications, these bass hooks are made for high hook-up ratios & secured hook-sets on big fish. The Z-bend and epoxy at the eye holds and protects soft plastics, perfect for wide gap hook applications like Texas and Carolina rigs, while also great when flipping. Mustad's new Tak bend places the point above the eye and at a more level angle with the bait, making the lure flush with the point and improving hook-sets compared to traditional bends. The aggressive bend gets plastic out of the way on a bite for quick penetration while also preserving strength and integrity when fish try to throw the hook. With Mustad's AlphaPoint® hook point technology, precision fishing takes advantage of the slimmer, ridiculously sharp point combined with the durability anglers expect from Mustad. The nano-thin TitanX finish with a sleek gun-metal look supports the sharpness of the hook and the smoothness maximizes penetration.

Assault Heavy Wide Gap Hook

Mustad's Assault Heavy Wide Gap Hook offset the eye and point to allow perfect rigging with soft plastics with ease while holding the bait flush to the point for the ultimate weedless hook. These fish hooks offer the perfect bend for wide gap hook applications like Carolina rigs and Texas rigs as well as flipping thanks to the Z-bend and aggressive AlphaPoint® red epoxy, which are designed to hold & protect lures. The combination of the aggressive bend and Mustad's AlphaPoint® hook point technology culminates for a slimmer, sharper hook that penetrates quickly and efficiently. Using the same Opti-Angle sharpening technique as UltraPoint®, Mustad's latest hook point offers the durability Mustad known for. The nano-thin TitanX finish with a sleek gun-metal look supports the sharpness of the hook & the smoothness maximizes penetration.

Tak-Offset Worm Hook

The Tak-Offset Hook cuts through grass and lands big bass in the weeds. The point is offset from the eye so that bait sits flush and maximizes the action of the lure. The aggressive Tak bend was designed for the ultimate weedless range of hooks. The combination of the Tak bend and Mustad's AlphaPoint® hook point technology culminates for a slimmer, sharper hook that penetrates quickly and efficiently. Using the same Opti-Angle sharpening technique as UltraPoint®, Mustad's latest hook point offers the durability Mustad known for. Inline Triple Grip Hook

Mustad's proprietary inline hook manufacturing techniques create a treble hook designed for perfecting your favorite hardbaits. The Triple Grip® shape's wide gap maximize hook-up ratios & the short shank allows for larger hook sizes on lures without them tangling. Mustad's new AlphaPoint® technology ensures for quick, smooth penetration and solid hook-sets. Finished with Titan Steel, the newest take on the Triple Grip® hook can be fished in fresh or saltwater applications with over 500 hours of saltwater corrosion resistance.

Fin-Acky Weedless Hook

The Mustad Impact™ Soft Plastic hook has a thin wire weedguard that prevents the hook from snagging. Perfect for tube bait soft lures. Rigging the tube lure is easy. Start by opening the weedguard and insert it into the rear of your tube bait. Continue till the tube is all the way through, making a straight presentation. Finish by resetting the weedguard on the point of the hook, never over the barb. Hook features a build-in rear weight for perfect balancing.

Wacky Hook

Wacky Hooks, available with or without a weed-guard, are the perfect hook for down-shooting & drop-shooting natural baits and soft plastics for suspended bass & panfish. The hook gap's sharp-angle bend serves as a saddle that encourages a worm rigged at the middle to seek an optimum position for an enticing horizontal presentation, which makes this an ideal hook for wacky worming.

Jungle Wide Gap Flippin Hook

One of the strongest Bass hooks on the market, 4X-Strong. This hook was designed with a few things in mind, heavy braided line and big baits. Made from Zo-Wire which is stronger than other traditional high carbon steel wires. With the point riding slightly above the eye, this is a true weedless hook. Can be rigged with Flipping baits, swim-baits, & everything else in between. Other Features include a forged shank for added strength and a Silky Gray frictionless finish that encourages superior hook penetration.

Jungle HD Flippin Hook

Designed to be the baddest Flipping Hook on the market! You can have 100% confidence when flipping into the thickest of cover and catching the biggest of fish. 5X strong and comes with a welded eye to hold up with to strongest of braids. The bait keeper is doubled up for extra strength, welded to the shank of the hook, and protected by shrink tube. Zo-Wire, which is 15-20% stronger than other high carbon steel hooks, is used to construct this monster hook. The "V" bend gap was designed to hold fish during prolonged battles with fish. Also features Owner's Silky Gray frictionless finish that encourages superior hook penetration.

Twistlock Weighted Worm Hook

This Weighted TwistLOCK™ hook employs the same hook as the 5132 TwistLOCK™, but also features a non-movable weight attached to the shank. Designed for both fresh and saltwater fishing. The hook's added weight helps to sink or swim the bait into the strike zone. With its TwistLOCK™ Centering-Pin-Spring, baits can be permanently secured by inserting the pin in the center of a soft plastic, which can then be screwed onto the Twistlock™ coil spring to rig perfectly every time! Great for skipping or pitching into deep cover. Open gap allows for more positive hook sets. Features include a 30° eye-bend, XXX-strong forged shank, Super Needle Point, and black chrome finish.

Twistlock Weighted Worm Hook

The weighted version not only helps sink or "swim" a rigged bait down into the strike zone, but helps to increase casting distance. The weight is positioned low on the shank to provide a "keel" effect so that baits rigged weedless-style will swim naturally (as opposed to rolling or flipping when weights are inserted inside soft baits). The weighted version is ideal for Swimming Senkos, swimbaits, flukes & other small profile plastics. With Owner's unique "Centering-Pin Spring" attached to the hook eye, baits can be "permanently" secured by inserting the pin in the center of the nose of a soft plastic, which can then be screwed onto the TwistLOCK coil spring so that any bait will rig perfectly every time! The "Open" gap allows for more positive hook sets. Features include a 30° eye-bend, an X-strong forged shank, Super Needle Point, and black Chrome finish.

Beast Twistlock Worm Hook

This unweighted version has all the features of the Weighted Beast less the weight. The unweighted version is ideal for lighter baits than do not need large amounts of weight to be swam. Due the XXX-strong wire and big gap angle there is a lot of steel in this hook which allows the hook alone to act as the weight on lighter baits. "Clip-On" weights can always be added to the shank to increase the hook's weight.

Beast Twistlock Worm Hook

Beast Hooks with TwistLOCK® Centering-Pin Spring (CPS) are designed for weedless-style rigging of larger plastics like big swimbaits, flukes, tubes & creature baits. With its TwistLOCK® Centering-Pin Spring attached to the hook eye, baits can be permanently secured by inserting the pin in the center of the nose of a soft plastic, which can then be screwed onto the TwistLOCK® coil spring to rig perfect every time! Different size springs are matched to hook size to maximize holding power. Quick-drop shank below eye allows for rigging fat-headed baits, and maximum gap allows for improved hook sets because of better bait clearance. The non-movable weight attached (5130W) not only helps to sink or swim a rigged bait down into the strike zone, but because the weight is positioned so low on the shank, it provides a keel effect. Ideal for both fresh and saltwater fishing.

Flashy Swim Twistlock Hook

FLASHY SWIMMER now with Colorado blades, feature Owner's TwistLOCK Centering-Pin Spring which is a unique setup for rigging soft swimbaits, flukes & other swimming plastics. The spinner blade is attached to a non-moveable weight that keeps a rigged soft plastic perfectly for use as an ideal "search" bait. In lieu of spinnerbaits or crankbaits, the flashy swimmer can be used as an alternative to cover a lot of water in a short time. A multitude of presentations can be achieved by switching baits and the speed of retrieval. The added weight helps sink or "swim" the rigged bait down into the strike zone, while the blade adds a fish-attracting flash. The wire pivots where attached to the weight, but the design of the molded lead keeps the wire and blade riding horizontal during a steady retrieve. Attached to the wire is a Colorado blade, rigged with a dual mini swivel. Other features include a TwistLOCK "Centering-Pin Spring" attached to the hook eye, an "open" gap for more positive hook sets, a XX-strong forged shank, Super Needle Point, and black chrome finish. Available in regular and Beast versions.

Mosquito Hook

Fast becoming a favorite when using the down shot system for bass, walleye and panfish. For light line use, it is self-setting and the perfect hook for windy conditions or turbulent water where it is difficult to keep a tight line. Ideal for rigging small live baits, for nose-hooking soft plastics, & for wacky wormin' (hooking through middle of the worm and letting the ends dangle equally). Features include a black chrome finish and a fine-wire forged shank with offset Super needle Point.

Block Offset Jighead

Built for weedless applications, the Owner Block Head Offset Jighead will allow you to fish a Ned rig in places that you never thought possible. Built around an offset style hook, the Owner Block Head Offset Jighead gives anglers the ability to Texas-rig their soft plastics with the hook point tex-posed for a perfectly weedless profile that slips in & out of cover where the big fish live. It also features a mushroom style head that is ideal for pairing with short stickbaits and other small soft plastics to keep your bait pointed upwards on the bottom and tempt finicky bass into biting. Covered in a durable powder coating, the Owner Block Head Offset Jighead adds a new element to your Ned-rig arsenal.

Inshore Slam Jighead

Designed for inshore species like sea trout, snook, and redfish. Soft baits can be screwed onto the corkscrew keeper for a super hard holding connection. Great for swimbaits and Alabama rigs. The heavier wire hook can withstand big fish and heavy braided line. These heads come in a variety of weights and sizes to accommodate most any soft bait and/or situation. Features include forged shanks, Super Needle Point, Black Chrome finish, and an extra wide gap for superior hooking ability.

Heavy Cover Flippin' Hook

The new Hack Attack Heavy Cover Flippin' Hook has been designed to be the best heavy tackle flipping hook made. It's a super sharp, heavy duty, black nickel Gamakatsu Siwash hook made exclusively for Strike King. It features a small eye that doesn't tear up plastics like regular hook eyes and is sealed closed so your line cannot come out by the shank. It is so strong it won't flex or open up when using braided line and it has a big gap for good hook sets, yet it's dimensions are compact so they can be used in plastic baits with smaller bodies. It also features an injection molded "rebarb" keeper to hold baits in position. Use with heavy rods and strong line and fear no heavy cover or giant bass!

Tungsten Flipping Weight

Ark Tungsten Weights come in a variety of types and feature multiple finishes. The No Chip Matte Black and No Chip Matte Silver color are treated with our special processing so the surface color will not come off. The No Chip Matte Silver color mimics the rocks in the natural environment so it will not spook fish, especially in very clear water. The inserted weights have super durable plastic insert tubes which offer 100% line protection. It has been the only choice for the top level pros. The sizes of the weights are engraved or laser printed on so it will never be mixed in your tackle box.

Carolina Weight

Specifically designed for dragging along the bottom, the Ark Fishing No Chip Tungsten Carolina Weights give anglers all the benefits of tungsten for their Carolina-rig. Made from pure high quality tungsten, the Ark Fishing No Chip Tungsten Carolina Weights are more compact & have a much high density than lead, steel, or brass weights, which results in increased sensitivity to feel subtle bites and changes in bottom composition.

Nail Weight

Tungsten Nail Weights offer premium performance that outfishes the rest. Made from 97% pure tungsten, the WOO! Tungsten Nail Weights are more compact than lead counterparts of the same weight, which allows anglers to add more weight to smaller soft plastics and maintain a compact profile. The WOO! Tungsten Nail Weights also feature heavy ribbing that is made to grip your soft plastics and not fly out during the cast or when fighting a fish.

EZ Sinker Slide

This advanced component for bait rigs allows the line to run freely when a fish allows the line to run freely when a fish mouths your bait, reducing the chance of spooking. It also eliminates the possibility of line damage that can occur from running your line through a molded sinker. Great for fishing in current, as you can attach a lighter dropper line to elevate your bait above bottom debris; if the rig snags, you lose only the sinker; and re-rigging takes only seconds, even at night. Built on flexible wire, & a bass snap & spacer beads.

Cancer and Reproductive Harm • www.P65Warnings.ca.gov

T-Stop Peg

The T-Stops are a long, thin, tapered piece of rubber with a flat nail head at the end. The idea is to push the narrow end into the base of your bullet weight until it sticks out the pointed end and pull it the rest of the way through. Now just stretch the rubber and clip it off at the top of the weight and it will stay securely wherever you want it. The soft rubber peg will not damage the line, like a toothpick can, and the weight can be moved up and down the line easily.

Glass Beads

Glass beads are often used between a weight and the knot you use to tie on any terminal tackle, such as a hook or a swivel to protect the knot from potential damage caused by the weight hitting the knot. Glass beads also give sound to your rig when used this way, since the weight will create a clicking sound when it contacts the glass bead that carries well underwater & resembles the sound of a bait.

Insert Weight

Precision balance is the key to Slug-Go's unique, erratic action. Lunker City Insert Weights, often called "nail weights" are the key to maintaining lure balance and positioning. It's ribbed design ensures that the weight will stay right where you put it, & they are soft enough to be trimmed to size with any line clipper.

Tungsten Worm Weight

Tour Grade Tungsten Worm Weights by Strike King® are insert-free, designed to not fray your line, have an incredibly durable paint coating and will increase your catch-rate. The Tungsten Weights' boat-tail/weight forward shape allow the weights to easily penetrate and fall through cover which will lead to a higher catch-rate. Tungsten's

(continued on next column)

(continued from prior column)

high-density enables a smaller size than comparable lead weights, which makes them less obtrusive to your lure and will help your hook-up ratio.

Tungsten Neko Weight

Tour Grade Tungsten Neko Weights are perfect for changing up the action of the Strike King 3x Elaztech Zero and your favorite soft plastics. Made using a premium tungsten compound, these high-density weights are smaller than lead options in the same size, which allows anglers to add more weight while still maintaining a compact profile. Designed to firmly grip soft plastic so they stay locked in after extended use, Strike King Tour Grade Tungsten Neko Weights feature a heavily ribbed construction to prevent them from flying out during a cast.

Rubber Weight Pegs

Tour Grade Weight Pegs create a compact presentation that allows your Texas-rigs to easily slip in and out of cover. Ideal for flipping and pitching applications, these pegs are designed to restrict weights from sliding up and down your line and press the weight firmly against your soft plastic.

Chatterweight

The ChatterWeight is a small cylindrical attractor inline, between your float and bait. Its holographic exterior flickers and flashes, reflecting light in all directions with the movement of the waves, current, or bait. In addition, the rattles inside the ChatterWeight attract predators such as trout, redfish, & flounder with lifelike sounds that emulate active crustaceans. Even better, fish feel little to no resistance when they take the bait, so they're less likely to drop it.

Ghost Fluorocarbon Leader

Ghost Leaders, featuring 18 inches of virtually invisible "fluorocarbon" connecting hook to swivel, are available in two different styles. Both ideal when rigging natural baits for finicky fish in clear, shallow water over reefs and wrecks. Snelled at the end of the 5214 is an eyeless Mutu Light™ circle hook, and the 5215 features an eyeless SSW™ with Super Needle Point. Both leaders are finished with a barrel swivel, & hooks and swivels have a black chrome finish.

Weight Forward Fly Line

This Weight Forward floating fly line features good flotation, durability and tapers that work well for casting dry flies, nymphs and streamers to trout, panfish and bass. Handling section has a raised bump to help you recognize where to begin the cast. Mid-length head makes line control easy so you get the exact drift you want. Braided multifilament is buoyant and supple so it works well in cold to moderate water.

Back Country Mono Line

Back Country line is our softest monofilament with exceptional tensile and knot strength. It is designed for smaller light-tackle reels. It maintains very low memory and is formulated for those fishing conditions when you need spot-on casts and that little extra strength to bring your trophy fish to the boat.

J-Fluorocarbon Leader

J-Fluorocarbon leader is the true 100% Fluorocarbon Leader Material manufactured using the finest raw materials available. Made in Japan by the most precise line extruders in the world, the consistency of the J-Fluoro leader is impeccable. The Clear line is nearly invisible in the water, sensitive, yet abrasion resistant and tough. A Convenient Spool Band makes the leader material easy to dispense. The elastic band controls the tag end on the leader spool.

CXX X-Tra Strong Line

CXX X-Tra Strong is the toughest, strongest, most shock resistant line on the market. If you're looking to throw into nasty cover for largemouth or battle huge tuna with your drag locked down to some ridiculous setting, there is only one line to trust. Tournament anglers and guides alike choose CXX because of the abrasion resistance and it's high strength to diameter ratio.

CXX X-Tra Strong Line

CXX X-Tra Strong is the toughest, strongest, most shock resistant line on the market. If you're looking to throw into nasty cover for largemouth or battle huge tuna with your drag locked down to some ridiculous setting, there is only one line to trust. Tournament anglers and guides alike choose CXX because of the abrasion resistance and it's high strength to diameter ratio.

Premium Fluorocarbon Coated Line

CX Premium Fluorocarbon Coated Line is one of the most innovative lines available, combining copolymer and fluorocarbon technologies. With low memory and improved limpness, CX Premium eliminates the line nightmares of a spinning reel, and improves casting distance with a baitcasting reel. The fluorocarbon-silicone coating virtually eliminates water absorption, so cold water and weather have little effect on line performance. With as much as 30% less stretch than average lines, it has increased sensitivity to detect & react to even the most subtle strikes.

Tatsu Fluorocarbon Line

Tatsu™ is Japanese for dragon and delivers an amazingly strong, yet supple, fluorocarbon line unlike any other through a superior, state-of-the-art double-structure process. Tatsu has a softer exterior resin which enhances knot strength and a high-density interior resin that improves tensile strength. It fuses two custom, 100% fluorocarbon resins, creating the world's only double-structure main line.

101 BasiX Fluorocarbon Line

101 BasiX 100% Fluorocarbon Line gives you all the benefits of a quality fluoro without the high price tag. Constructed to be extremely supple, the BasiX Line casts like a dream for dramatically increased distance while simultaneously decreasing backlashes and casting noise. It is made with 100% Seaguar fluoro resins to ensure it stands up to the highest standards of quality and consistency. It slips into the water with virtually invisible performance to grant anglers a covert approach to finicky and pressured fish alike. Boasting incredible knot and tensile strength, the Seaguar BasiX 100% Fluorocarbon Line is an effective & economic way to present your favorite jigs, rigs, lures, and anything else you can throw at a bass.

Cancer and Reproductive Harm • www.P65Warnings.ca.gov

SuperBraid Line

SuperBraid Yellow is a great choice for finesse fishing situations as well as fishing for the wide variety of panfish in North America. Due to its Yellow color and high visibility, it is a great line to use when the bite is very subtle. SuperBraid Yellow is a 4 strand PE braided line specially coated giving it maximum abrasion resistance, extremely low stretch, and makes it super durable.

Cedar Plug

The Ahi USA Live Deception Cedar Plugs are based on the traditional design that has proven to be successful for generations. Constructed with natural cedar wood. Ready-to-fish out of the packaging, the Live Deception Cedar Plugs features the latest technology in laser printing to transfer real images of baitfish onto the cedar plug body. The finish is one of the most chip and peel resistant finishes on the market today. In addition to Tuna, The Ahi USA Live Deception Cedar plugs will catch a variety of predatory gamefish such as Dorado, Marlin, Sailfish, and Yellowtail. All Ahi USA Live Deception Cedar Plugs are hand balanced and include a notched tail for precise hook placement that ensures a perfect hook set when a fish strikes. The plugs come with 150 pound fluorocarbon leader and 10/0 Mustad Hook. Both Natural and Live Deception patterns are also available with a Daisy Chain rigging which mimics a school of fleeing baitfish.

Jointed Jitterbug 2.0

The Jointed Jitterbug 2.0 has a lower pull-point to ensure an intense action in the water, which leads to more heart-stopping blowups. Updated hook hangers allow free movement of hooks to not slow down forward momentum, while the black-nickel finish hides them from the wary eyes of the fish you're targeting. The feathered rear treble drifts when the lure is stopped for extra strike-inducing movement.

Outlaw Top Walker

Designed by BPT Pro Randall Tharp and Elite Pro Wes Logan, the Outlaw has the tungsten bead inside which produces a loud thump noise through the chamber on every twitch to attract fish in a long range. Sitting level on top of the water, it can be fished in skinny water on top of grass without any snag. Easily walk-the-dog retrieve combined with three Mustad TG76 treble hooks makes it pros' go-to topwater walking bait.

Outlaw Sidewinder

With the input from our pro anglers, this bait is designed for targeting the fish from long distance. It has very wide side to side action and does not “dive down” on the twitch, which is critical for fishing those herring lakes. The tungsten bead produces a low but loud thump noise on every twitch to draw more attention from distance. Three Mustad TG76 Treble hooks with the feathered tail help to boat more fish after hooking up.

Shad Assassin

The Bass Assassin Shad Assassins' unique "fat belly" design draws more strikes than conventional jerkbaits. Soft body texture delivers a fleshy feel that keeps fish hanging on longer. Bass love 'em, but the Assassin is also a killer for stripers, sea trout, redfish, and other saltwater fish.

Lit'l P&V Twitch Bait

The Bass Assassin Lit'l P&V FW is tube-style twitch bait that features an inviting compact profile and subtle ribbing throughout that gives the bait a sense of life. Ideal for a wide range of finesse fishing applications, the Lit'l P&V FW is poured with a flattened head shape that rigs perfectly flush to the head of a Ned jig, and its slender body also excels with dropshots and wacky rig presentations.

Saltwater Shad

The Saltwater Shad Assassin has become one of the most popular lures for gamefish; redfish and trout absolutely love this bait...and the best kept secret on the Gulf Coast of Florida is the Saltwater Shad for catching Snook! Tarpon, flounder, dolphin, stripers – you name it, the Saltwater Shad Assassin is one of the most productive lures on the market today.

Dime Crankbait

Berkley Dime Crankbait features a fat-rounded body that provides balsa-like action and the ability to be fished slowly or burned at high speeds without blowing out. Built with Berkley's patented Flash-Disc technology to improve tracking, stability, and casting accuracy, the Berkley Dime series is equipped with a durable ABS plastic bill that dives quickly to 10ft to deflect erratically off of rocks, wood, and heavy cover.

Frittside Biggun Crank

The Berkley Frittside 5 Biggun Crankbait creates the most flash out of any Berkley hard bait and is based on the balsa wood plug that helped him win the 1993 Bassmaster Classic. Featuring an upsized flat-sided profile that mimics larger forage, the Biggun-sized Frittside delivers tight balsa-like thumping action and flash that is deadly during tough conditions when fish are sluggish or heavily pressured.

Clickin' Frittside Jr.

Featuring a flat-sided profile that accurately mimics both crawdads and baitfish, the Berkley Clickin' Frittside 7 Crankbait delivers a tight balsa-like thumping action with enhanced clicking sounds that attract fish in stained or dirty water. Boasting tour-level victories and a stamp of approval by legendary angler David Fritts, the Frittside's proven performance is now enhanced with a single ceramic ball to create an attention-grabbing low-pitch rattle and draw fish in from great distances.

Clickin' Frittside Biggun

The largest profile in the Frittside family, the Berkley Clickin' Frittside 5 Biggun Crankbait is perfect for those times when you need a finesse action but maintain a big presence in the water to generate big bites. Great for clear water and cold water conditions, the Berkley Clickin' Frittside 5 Biggun Crankbait features a squarebill the helps it deflect off cover with ease and trigger aggressive reaction bites. Internally, it's equipped with a single ceramic ball that produces a subtle clicking noise and aggravates fish into striking.

PowerBait Power Switch

Purpose-built for use with forward-facing sonar, the Berkley PowerBait Power Switch hovers enticingly in the strike zone to give anglers the control to 'switch' or react to the fish and structure by providing the ultimate angler control. When a fish is located using live sonar, you need to present your bait quickly to take advantage of the moment.

PowerBait Nessie

Designed in collaboration with Elite Series angler Mike Iaconelli, the Berkley PowerBait Nessie Soft Glide Bait is an innovative soft-bodied glide bait built with a reinforced mesh joint that provides durability while allowing for free range of motion. The Nessie Soft Glide Bait has a slow-sinking rate-of-fall, upright horizontal posture, and stabilizing belly fins to encourage consistent S-shaped swim action.

PowerBait Speed Boss Worm

Designed by Bassmaster Classic® winner Skeet Reese. The Berkley® PowerBait® Speed Boss features the finesse profile of a worm with the proven wide action of the “Pit Boss style” legs for maximum water disturbance in a slender profile. The thick body adds durability for rougher grass applications and the legs provide the most action of any “grass style worm” on the market. Head is designed for Florida rig or Weightless EWG rigging and is a great bait for a Texas rig or Carolina Rig.

PowerBait Gilly SwimBait

The PowerBait® Gilly is Pro Designed by Bassmaster Classic® Champion Mike “IKE” Iaconelli. Japanese influenced design provides an unbelievably natural presentation in shape, color, and action. The hollow head allows for easy crushing on strikes and helps to orient the bait in an upright posture when swimming. Rig vertical with weightless rigging, sideways as a Texas rig, on a Jig Head, with a Weighted swimbait hook, Line-through Stinger Hook rig, or even on a Drop Shot.

PowerBait Grass Pig Swim

Swim the Berkley PowerBait Grass Pig Swimbait by clumps of weeds or on top of weed lines to entice violent strikes from bass lying in shallow areas, or in deeper water, slow your retrieve down to find suspended or bottom-dwelling monsters. Its specially designed body and tail allow you to fish it as slow as you want and still produce that irresistible wiggle.

Slobberknocker Blade Jig

Built to outperform any other bladed jig, the Berkley Slobberknocker combines innovative design and proven Berkley features in one fish catching package. The through head design features a durable dowel-eliminating blade break off. Additionally, the Slobberknocker excels at barreling through vegetation and traversing wood or other forms of hard structure. Topped off with a hand tied Power-Bait flavored skirt, Fusion19 hook, and intricate color options, we are raising the bar and delivering exactly what anglers need in a bladed jig.

Swim Jig

Berkley Swim Jigs are expertly designed by Bobby Lane to maneuver through thick vegetation and draw fish in with their detailed good looks. They start with a pointed head design that stays on keel whether they are being ripped through cover or swam through open water. In addition to their tapered shape, their heads also sport durable and detailed paint schemes with 3D eyes that add yet another layer of realism.

Hammer-Trap

The Hammer-Trap's name is derived from its incredible hammering action. This action, which will literally rock your rod tip, also activates the Tri-Tone sound chambers. In turn, this emits 3 distinct tonal frequencies as well as the next-level vibration. When stopped on the retrieve, the Hammer-Trap™ will fall with a fluttering action. These attributes, along with a very modern profile, culminate in a lure that draws vicious strikes from any fish in its vicinity.

Floating Rat-L-Trap

Bill Lewis introduced rattling sound into fishing lures over 50 years ago. This lure produces sound that is nearly identical to the sound made by distressed baitfish, which leads to attracting predator fish and stimulating an aggressive feeding response. This simple-to-use lipless crankbait is a must to have for locating and catching fish.

Original Rat-L-Trap

Bill Lewis introduced rattling sound into fishing lures over 50 years ago. This lure produces sound that is nearly identical to the sound made by distressed baitfish, which leads to attracting predator fish and stimulating an aggressive feeding response. This simple-to-use lipless crankbait is a must to have for locating and catching fish.

MR-6 Crankbait

The MR-6 has an internal weight transfer designed for long casting abilities. The MR-6 has the ability to carry large size 4 Mustad Triple Grip hooks while still maintaining superb action. The buoyancy is perfectly balanced with a slow rise when the lure retrieve is stopped. Recommended by elite anglers Boyd Duckett and Mark Daniels.

MR12 Crankbait

Designed to plunge to 12-feet and beyond with lighter fluorocarbon lines, the MR-12 is a smart solution to the challenge of targeting bass holding on deeper brush, boulders, and other cover. Featuring the same body profile as the MR-6, the MR-12 Crankbait also features the same casting abilities, extreme vibration, and tight wiggling action that is further made irresistible with their perfect level of buoyancy that slowly rises on the pause.

SB-57 Crankbait

Built with super thin walls that feature a unique honeycomb construction, the Bill Lewis SB-57 Squarebill produces a fast wobbling action that hunts through shallow water and aggravates fish to bite. It also features a hybrid coffin circuit board lip that increases sensitivity & causes erratic deflections off cover to trigger intense reaction strikes.

Scope Stik Jerkbait

With the rise of forward-facing sonar, we've set out to design a jerkbait that is made specifically to be better detected on screen. Featuring pronounced, flattened sides, and a lip that makes it flash sideways at the 'scope' - it'll practically wave at you on screen. It's equipped with premium Mustad-UltraPoint-Triple Grip hooks and is available in the colors fish bite. You won't have any trouble getting it to the fish either with a smooth transitioning cast-weight long-cast are easy.

Yum Runner

A lively baitfish imitation perfect for a wide range of multi-species applications, the Blakemore Yum Runner Underspin provides a wealth of flash and vibration to attract curious predators from great distances. Pre-rigged with a Yum Pulse Swimmbait, the hinged button paddle tail delivers intense kicking action, and the body of the swimmbait has heavy ribbing that creates downward pressure to keep it in the strike zone during the retrieve.

Itty Bit Slab Hunt'r

The Bobby Garland Itty Bit Slab Hunt'R Soft Bait series brings more finesse to your crappie fishing game with a proven profile in a smaller size! The Itty Bit Slab Hunt'R models a natural minnow shape. The tail alone appears to propel this Itty Bit soft bait through the water just like a live minnow uses only its tail to swim. The Itty Bit Slab Hunt'R is formed with a ribbed body for added vibration and scent-holding effectiveness.

Pile Diver

The Pile Diver is designed for tantalizing action in and around a crappie's favorite hideout – the brush pile. The Pile Diver's arms provide a subtle quivering action whether on the move or at rest. Its ribbed body vibrates upon contact with limbs. The lure's streamer-like legs tickle any crappie's fancy. 10-count bag.

Deep Flat A Crankbait

This OG flat side has been helping anglers cash checks for more than 20 years with its tight wiggle, similar to a balsa crankbait, and now features a weight transfer system to help anglers cast this lure a mile. Its oval lip design allows it to crawl through rocks in the 4- to 8-foot range on 10 lb. line, and its six pre-selected color patterns make matching a forage base as simple as can be!

Long Shot Minnow

The Bomber Saltwater Long Shot slender minnow bait was engineered to maximize four main characteristics that make up a fish-catching machine. It features an advanced casting system for super-long casts, heavy duty hardware & saltwater hooks, region-specific color patterns and a wide-wobbling swimming action that gamefish can't resist.

Clacker Buzzbait

The Boogerman Buzzbait's signature keeled head and adjustable blade makes the Boogerman the best topwater buzzbait on the market. Right out of the package the Boogerman's infamous "CLACK" is ready to call up the most aggressive fish for heart-stopping strikes. Or, if you want a more subtle and traditional buzzbait for those overly pressured and weary fish, simply adjust the blade wire to ease the strike on the keeled head.

One Knocker Lipless Crankbait

The One Knocker lipless crank bait sets itself apart from the crowd with a unique fish-catching sound and cutting edge color patterns. The One Knocker is famous for its single, oversized tungsten rattle that produces a “thump” unlike any other rattle bait.

Hard Knocker Lipless Crankbait

Combining an ear bursting acoustic with exacting detail, the Booyah Hard Knocker gives anglers the ability to trigger ferocious reaction strikes throughout the water column. Internally, the Booyah Hard Knocker features a powerful multi-ball rattle that imitates the sound of scattering baitfish and alerts bass to its presence from the moment it enters the water.

Pad Crasher Jr.

The BOOYAH Pad Crasher Jr. is a topwater hollow-body frog that sports a bass-boat-style belly that catches water for the easiest “frog-walking” action in open water and a nice finesse scooting action over the slop. The BOOYAH Pad Crasher Jr.’s flow-thru design drains the lure with every twitch, keeping it working flawlessly without sinking or catching weeds. A rugged double hook & interior weighting system ensure positive hookups. This bait works effectively in the slop and walks back and forth like a Spook in open water.

Pad Crasher

The BOOYAH Pad Crasher soft plastic hollow body frog features a plastic with just the right consistency to ensure solid, consistent hook-ups while remaining weed- and snag-free. The belly features 'chines' that make 'walking the frog' easy in open water, and it's just the right weight for pulling over slop or through the pads for big bass. Realistic decoration schemes and adjustable spinnerbait-style legs seal the deal for big bass.

A drain hole at the tail of the bait keeps it working flawlessly. Super-soft collapsible body increases hook-ups. Premium quality double 3/0 Hooks.

Poppin Pad Crasher Jr.

The Booyah Poppin' Pad Crasher is perfect for those times when you need more surface disturbance to get the fish to commit. It's great for fishing the slop, but with the cupped mouth

it also doubles as a popper/chugger in open water. Whether you want to work acres of surface scum, skip it deep under a boat dock or work a cover-strewn flooded shoreline, the Poppin' Pad Crasher is your go-to bait.

Moon Talker Spinnerbait

Catching whoppers at night is all about vibration. The Moon Talker brings a deep-cup, black nickel #5 or #6 Colorado blade to the table, which can thump out enough of a beat to enable any bass in the lake to close in fast!

Covert Spinnerbait

The head design is modified after a traditional BOOYAH spinnerbait and features a special raked-out gill to offset the blade torque and keep the bait running true. The Covert Series is also fitted with non-plated 17-7 stainless steel bronze wire for providing increased durability and aid in blade vibration. The specialized wire also helps protect against corrosion. A wire form trailer keeper holds any added soft plastics while the super sharp hook is ready for the big bite.

Covert Finesse Spinnerbait

The Oklahoma/Colorado configuration of the Covert Finesse Spinnerbait provides anglers with one of the most unique options for a compact spinnerbait that can excel in clear or dirty water! Built with the unique Oklahoma blade that provides flash and vibration and the Colorado blade for maximum added thump. In addition to the special blade combo, the Oklahoma/Colorado configuration comes equipped with all the top-notch components known to the Covert series such as a raked-out head, exquisite skirts, 17-7 wire, and stout hook. This model is ideal for clear or stained water and works perfectly when fishing pressured water due to the distinctive array of sound and flash!

Squelcher Buzzbait

The Squelcher features components that provides an action most anglers spend hours tuning on their traditional buzz baits to achieve. Components such as: extra-large cupped blade that allows the bait to be fished extra slow, nested rivet for optimum screech, keeled head, and an extra sharp hook with wire plastic keeper to eliminate the need for glue.

Mobster Swim Jig

The BOOYAH Mobster Swim Jig has been a mainstay among the anglers fishing the rugged waters of the Arkansas River that requires a jig to boldly come through cover and perform under harsh circumstances. Built with a unique tapered head that gives it a slight wag on the retrieve and prevents any cover from snagging it inadvertently.

G-Buzz Buzzbait

There is no denying that Gerald Swindle has had a ton of success throughout his career utilizing a buzzbait. Thanks to his mutual investment with Buckeye to give customers the best tools on earth, the infamous G-Buzz is now available to the world. G-Buzz has a unique bend to the wire frame that he has honed over the years to maximize hookups on every strike.

Buzzerk Buzzbait

The Double Bladed Buzzbaits are built with two busy prop blades that deliver twice the disturbance and twice the resistance as traditional, single-bladed designs. This added resistance allows anglers to slow down their presentation, so they can concentrate on hot spots and ambush points without sinking.

Red Fin Stick Bait

The Cotton Cordell Red-Fin is a legendary lure for a variety of gamefish, from bass and walleye in freshwater to specks and redbfish on the coasts. The Red-Fin can be twitched on top, runs erratically with a twitch-twitch-pause retrieve, provides a wide searching wobble on a straight retrieve and is one of the best wake baits ever made. Try retrieving it slowly on top for vicious topwater strikes from all types of bass, including giant striper.

Spoiler Shad

The bite-sized Creme® Lures Spoiler Shad Swimbaits have the look and action to hook jumbo-size crappie and bass. Designed with a molded-in weight and hook, these soft baits feature lifelike details including a holographic fin-
ish that shimmers in every direction like real baitfish. A high-action paddle tail gives the Spoiler Shads their tantalizing swimming action and vibration.

Shakin' Neko Craw

The Culprit Shakin' Neko Craw creates a whole new Shakin' category, the first of its kind for use in finesse applications of Neko rigging, Shakey Head, Wacky rigs, and even trimmed down for Ned rigs. There is even a built-in groove to securely hold an O-ring, popular with Neko and Wacky rigging. This slender crawfish imitation is specifically designed to mimic the natural movements and fall of a small crawfish. The unique profile allows for a reasonable fall rate even with light weights necessary for Neko rigging.

Flutter Craw

Bridging the gap between creature bait, crawfish bait and double tail grub, the new 4" Culprit Flutter Craw. This is a unique offering from Culprit that is sure to impress from the deep south, far north and out west, this bait's characteristics flat out attract bass. It produces subtle but noticeable fluttering action. When the bait stops the forward-facing legs look as if they are seeking sure footing on the bottom. This bait is never truly motionless. From Texas rig to swim jig to swinging football heads, this is one bad to the bone craw bait.

Yamamoto Neko Crawler

This Bait gives anglers unmatched performance.

Combining Daiwa’s precision detailing with Yamamoto’s legendary soft plastic, the Neko Worm features a thin body which provides a unique, quivering action. The Neko Rig is always a great option for finesse fishing. While most anglers use a weightless worm, the nail weight in the Neko Rig gives anglers the ability to use heavier gear and reach fish in deeper water, where weightless worms just aren’t practical to fish.

X-Over Shad / Crankbait

You can fish it by winding it and twitching it. Giving you options to combine winding, twitching and pausing techniques while moving the bait in the water. You can appeal to the middle-rise bass while just rolling the bank, twitch and pause on or beside the rocks, trees, and weed patches or retrieve at high speed. Since you can use both the crankbait and jerkbait functions without changing the lure, it will be a reliable bait for all types of anglers.

Zeruch Crankbait

After a daunting development test period of about 10 years, Morizo Shimizu's full-size shallow crankbait, Zeruch, embodies the ideal action that Morizo Shimizu seeks. The unique shape seen in each part is not strange at all, but the shape to create what Seizo calls "fishing action." Fixed center of gravity and completely silent specifications. Both the conflicting elements of bullet-like flight and high buoyancy required for shallow cranks. It is an absolutely confident work that you can believe and pull down regardless of open water, glass cover, wood cover, middle layer, bottom, which is not only absolutely catchable but also thoroughly focused on ease of use.

SB 105 Topwater Plug

The SB-105 was developed by Morizo Shimizu out of a desire to apply the overwhelming fish-luring talent of the original SB-125 – known as the big bass killer – to an expanded bass-fishing community. The ability to search the water surface and castability, top-of-the-class luring and casting distance capacity were all left untouched.

SB 125 Topwater Plug

Its unique bill produces powerful splatter, spit and bubbles that appeal to the fish. A body designed for air-resistance reduction, and tungsten weights at the very end of its tail guarantee incredible distance even against head winds. It can now search a much wider area with just one cast. Excellent body balance allows it to make quick consecutive turns without jumping out of the water, making it move much like agitated bait fish chased by a bass. The bait readily triggers the fish to bite. The feather hooks attached to the tail serve as “resonance” in the intervals between stillness and motion of an action, take those light bites of a fish unable to break above water into full-on bites, and help support the hook’s suction.

Load Buzz Buzzbait

The Evergreen LB Buzzbait creates an enticing topwater commotion that attracts fish from a great distance and triggers explosive strikes. Built with a stainless steel main shaft, an aluminum rivet, and a custom offset aluminum prop, the Evergreen LB Buzzbait aggressively churns the surface to generate maximum noise through the water, which stimulates the lateral line of bass and produces a strong reaction to feed. A hand-tied skirt made from the highest quality silicone also creates a natural flowing swimming action that will fool even the most discerning of bass. On the back end, the Evergreen LB Buzzbait is armed with a sticky sharp Japanese hook the provides lightning fast hook penetration with the slightest pressure and plenty of power to pull big fish away from cover with ease.

E-Z Squid

Just cut it, hook it and cast it. All you need is sharp scissors. How EZ is that? E-Z baits can be used on a bare hook or as a trailer on a jig or skirt. Each bait strip is 1/2" wide and about 12" long. Use them to catch a wide variety of saltwater species. The Fast Acting formula is made with a special fiber-infused gel that gets the flavor/scent dispersed quickly into the water column. There is no cloth mesh in center so once the bait is gone, you're ready to re-bait instantly without removing any residues.

Weedless Bio Spoon

The Bio-Spoon Weedless spoons are ideal for tight inshore waters and eel-grass. The weedless design keeps you from getting hung up on structure as you cast for big fish. The extra sharp, tournament-grade hooks are not plated keeping the hooks sharper and stronger. The weedless guard features a pre-bent wire so it does not poke a fish in the mouth increasing your hook-up ratios. The Bio-Spoon features a unique wobble on the straight retrieve.

Rad 60 Squarebill Crank

The Rad Squarebill Crankbaits feature super durable bills under the nose to not only plunge them quickly to their running depth but also impart wide hunting and wandering actions that drive bass surface-lurking bass into feeding frenzies. That shallow action is ideal for fishing over emergent vegetation, shallow rock flats, and deflecting off hard structure that lies just below the surface. Magnetic internal weight transfer systems are integrated into the squarebills to enable country-mile casts that make covering large swaths of water more efficiently than ever.

Lipless 60 Crankbait

The Rad Lipless Crankbaits rely on a super aerodynamic profile that sails through the air with minimal resistance to enable anglers to navigate large swaths of water quickly in search of the next big bite. Once in the water column, they deliver a radical, hyper-vibrating action that stays tight from the start to the end of the retrieve. They are also crafted with high-density alloy internal rattles for an acoustic property that hypnotizes bass and calls them in from greater distances. To create a more versatile bait, their construction keeps them upright when fished vertically.

Round Jig Head

The standard round head design makes Gamakatsu's Round 26 an extremely versatile jig head. The Round 26 features our 604 series jig hook which is very popular with salmon and steelhead anglers and also has two keeper type rings behind the head to hold soft plastic baits firmly in place.

Under Spin Head

The Under Spin Head features Gamakatsu Heavy Cover 60-degree hook. The heavy wire and wide gap design of the Heavy Cover gives anglers a better hook up ratio and retention when using bulky swim baits. Ideal for heavy braid or fluoro-carbon line. The head profile is streamlined to glide through cover. Gamakatsu Spring Lock holds swim baits and other plastics gently but firmly, keeping your presentation straight on the hook. Recessed lifelike eyes on the Under Spin provide a focal point for predators. The small chrome blade is attached to a quality ball-bearing swivel allowing it to spin freely, even at the slowest retrieves, to simulate baitfish & create a subtle trigger.

Under Spin Mini Head

The Under Spin Head Mini features Gamakatsu's premium size 1 Finesse Heavy Cover 60-degree hook, the wide gap design means you can still rig bulkier plastics and have plenty of bite. Ideal for smaller finesse presentations, the head profile is streamlined to glide through cover. The small chrome willow blade is attached to a quality ball-bearing swivel so it spins freely, even with slow retrieves to simulate baitfish and create a subtle trigger.

TKO Shrimp Double Rig

Here are two TKO shrimp pre-rigged on a double mono leader for twice the fish-attracting action. The TKO Shrimp boasts an internal weighting system that creates the perfect balance, allowing it to naturally suspend and drop slowly. Try rigging it with a sinker and hop along the bottom, or a float to work the sub-surface. This lure spells double trouble for redfish, speckled trout, snook and other shrimp-loving fish.

Slidog 105 Casting Bait

The Slidog 105 is the stickbait that brings versatility to a new level. Work it slow on the surface and wait for that boil. Work it fast with an erratic twitch and wait for your reel to start smoking! Or see what happens when you let it sink...the Slidog 105 has an irresistible shimmy on the way down meaning even demersal species love to swallow it.

Slidog 125 Casting Bait

The Slidog 125 is packed into a compact body profile that will be applicable in countless shallow and midwater situations. The lure will be in its element being belted out over bubbling bait schools to entice pelagics at pace, but just as deadly being slowly twitched amongst shallow bobbies, terrorizing territorial coral trout and spangled emperor populations. Featuring the ever-reliable 1/0 Mustad Trebles and our legendary ultra tough 4xx fish rings, the Slidog 125 is equipped to fight well above its weight class. The lure is 125 mm long and weighs in at 52g, allowing for epic castability with a medium casting outfit, inevitably covering more ground and finding more fish.

C-Gar 120 Weighted Stick Bait

The Halco C-Gar is a weighted stick bait. It is designed for use on the sub surface for tuna, mackerel and other predatory fish. The lure action is less splashy than a popper. The unique nose design and weighting ensures long casting ability with enough surface action to entice a strike from the wary fish looking for an easy meal. The heavy duty Mustad trebles combined with Halco's famously strong fish rings ensures the Halco C-Gar has the ultimate lure to hook connection.

Giant Trembler Trollbait

The Halco Giant Trembler is a virtually indestructible, bibless minnow. This lure has a nose-weight that produces an extremely life-like swimming action, plus the loudest noise and has the strongest body vibrations of all the Halco lures. This lure can be cast, jigged or trolled, making it ideal for targeting a wide variety of sportfish. The noise of the rattles and the tight, fast action make for awesome trolling for pelagic species. You can troll them from 3-15 knots, a great lure to use when you are traveling to one of your favorite spots. Comes with a pair of #5/0 Mustad 3XX treble hooks. With a weight of 125 grams, they are rapid sinking & casts a long distance.

Laser Pro 160 DD Trolling

This provides a slightly smaller profile when trolling for species like Mackerel, Tuna and Wahoo. The 160 is must have for pelagic predators! Of course we love all of our lures, but the Laser Pro 160 is one of our absolute favorites! On any filming trip, it's one of the first lures to be put in the spread. Perhaps it's the slightly smaller profile that does the trick, but when trolling for species like mackerel and tuna, the 160 goes off! If you haven't had a chance to try a Laser Pro 160, we recommend putting one in your spread. You won't be disappointed!

Laser Pro 190 DD Trolling

The Laser Pro 190 is widely recognized as one of the worlds best bluewater trolling lures. It can be trolled over a wide speed band, however its optimum speed for trolling for pelagics is around 6.5 knots. All Halco Laser Pro's feature Halco's unique Bullet Proof Bib securing system, ensuring that your lures stand the test of time, and continue to catch fish after fish. Try pairing the Laser Pro 190 with the Snap or Super Snap wire traces to ensure your chances of landing those sharp-toothed fish like Barracuda, Wahoo, and Mackerel. The Laser Pro 190 model has three diving depth options – Standard (1m), Deep Diver (2m+) and Crazy Deep XDD (6m) and can be trolled up to 11 knots.

Max 110 Cast / Trolling Bait

Introducing Halco's newest member to the Max family, this bibless minnow is suitable for both casting and trolling applications, in a smaller bite size offering. The lure is 110mm long and weighs a substantial 30 grams and its slender profile casts like a bullet into the strongest breezes. It has been designed to run straight and true several meters below the surface in the roughest of sea conditions. The streamlined design allows for high operating speeds and maximum hook exposure, so critical in lure design. Max's effective operating envelope is exceptional, ranging from a fast spinning retrieve to a racy 12 knots while trolling. Like all Halco lures, Max is constructed out of high tech polymers and has been built with strength and durability in mind. Heavy duty Halco Fish Rings and 2 extra strong Mustad hooks are standard equipment on Max and it is available in nine fish catching colors.

Max 130 Trolling Bait

This bibless minnow that can do the lot, be it jigging, casting or trolling. The Max has a highly streamlined design that gives this 80 gram winner unbeatable casting ability, while allowing trolling speeds up to 12 knots with minimal trolling resistance. The slender tail section is designed for maximum hook exposure on the strike. The Max 130 represents the lure of the future. It goes without saying that Max incorporates Halco's legendary toughness and durability that keep Halco ahead of the rest. Whether you're working feeding fish, prospecting around bommies, or casting from shore into wash, the Max is an excellent bibless minnow lure choice.

Max 220 Trolling Bait

This lure is a massive 220mm long and weighs a substantial 180 grams and its slender profile casts like a bullet into the strongest breezes. It has been designed to run straight and true several meters below the surface in the roughest of sea conditions. The streamlined design allows for high operating speeds and maximum hook exposure, so critical in lure design. Max's effective operating envelope is exceptional, ranging from a fast spinning retrieve to a racy 14 knots while trolling. Max is constructed out of high tech polymers and has been built with strength and durability in mind. Heavy duty Halco Fish Rings and 2 extra strong Mustad hooks are standard equipment on Max and it is available in nine fish catching colors.

Roosta Popper 80 Casting

The Roosta Popper 80 is an excellent choice for anglers targeting a range of saltwater and freshwater predators. The Roosta Popper 80 withstands Australia's toughest fishing environments, and prides itself on being a highly durable surface action lure. Boasting strong #3 Mustad 3XX trebles, your conversion rate will dramatically increase, helping you to land more fish, time after time.

The Halco Roosta Popper 80 Lure is a retrieve popper and blooper with the potential to alter the action the lure has underwater based on rod tip height.

Roosta Popper 105 Casting

The Halco Roosta Popper 105 Lure is a surface popper and blooper. Catch big salt water fish with this surface popping lure as it splashes about attracting nearby fish. By changing the height of your rod tip, you are able to change how the lure responds and swims underwater – a rod tip closer to the water surface produces a stronger bubble action and is ideal in rough conditions or strong winds. Rigged with strong #3 Mustad 3XX trebles, your conversion rate will dramatically increase, helping you to land more fish, time after time.

Roosta Popper 135 Casting

The Halco's highly durable Roosta Popper 135 will have you hooked on surface fishing in an instant.

This is a highly durable retrieve popper and blooper which comes standard with #2/0 Mustad 3XX Trebles to ensure you land more fish, time and time again. Alter the action of the Roosta Popper 135 by lowering your rod tip closer to the water surface. This will give the lure more bubble action, & is an ideal technique for rough weather conditions & strong winds.

Roosta Popper 160 Casting

The Roosta Popper 160 is designed and built to get the maximum noise and splash out of a medium sized popper, while retaining superior casting capability, excellent strength and high durability.

Excessive effort is not required when working this popper. For best results point the rod tip at the lure and sweep the rod down 50-60 degrees, allow the lure to pause momentarily, wind in any slack line & repeat at irregular intervals. The highly distinctive head shape of the Roosta 160 provides a long and extremely noisy bubble trail by alloying the cavitation bubbles and the subsequent noise to escape via the popper's contoured cup sides.

Roosta Popper 195 Casting

The Halco Roosta Popper 195 Haymaker is designed for catching some of the toughest fish that swim, from Giant Trevally to Dog-tooth Tuna. It is built with extra heavy duty, custom made 7x fish rings & is equipped with Mustad 5 extra strong 5/0 trebles. While designed with a blooping style retrieve in mind, the Roosta Popper 195 Haymaker can be simply wound in at speed or trolled for excellent results. The recommended method of retrieval for best results is to point the rod tip at the lure, retrieve any slack line and firmly sweep the rod tip in a downward motion approximately 45 degrees. Allow the lure to rest for several seconds and if a fish hasn't taken the lure repeat as necessary.

Twisty Spoon

The curved ends of the famous Twisty Chrome create an enticing action like no other metal lure. From a slow wobbling retrieve to a high-speed splashing retrieve, this lure is truly versatile. The Twisty Chrome has an incredibly realistic baitfish profile that has proven itself in both salt and freshwater, from pelagics like bonito and tuna, to tailor and Australian salmon. The smaller varieties have been proven to chase trout in rivers and dams, making this lure incredibly versatile.

Lucky 13

The concave face causes a loud chug as the lure is twitched. Using a steady retrieve the Heddon Lucky 13 will run just below the surface with a surfacing minnow action.

Tiny Torpedo

As it sputters across the surface, the legendary Heddon Torpedo creates a massive disturbance that has helped to build its reputation for drawing explosive surface strikes. Deadly at any rate of retrieval, the Heddon Torpedo is best utilized through varying your speed and cadence until you key in on a pattern that's the most effective. The aerodynamic shape allows anglers to perform long distance casts with ease and precision.

Super Zara Spook

The backbone of the famous Heddon Zara Spook family is the Super Spook. The feature setting these models apart from other Zaras is their super stout hardware system, from line ties to hooks, all designed to stand up to the most voracious species.

Super Zara Spook Boyo

The Heddon Super Spook BOYO proves to be another genius addition to the renowned Heddon Spook family!

Whenever schooling bass are reluctant to hit any of the larger bodied lures, then it's the BOYO's time to shine. The BOYO measures in just below the Super Spook Jr. at 3 inches long, but still packs a punch at 3/8 of an ounce. It carries inside of it the same construction as the other spook models with a single lead rattle in the tail to aid in walking and sound to bring fish to the surface, as well as the aesthetics which make a spook such a wonderful lure!

Super Zara Spook Jr.

The Heddon Super Spook Jr. features the tough construction and good looks of the full-sized Super Spook in a smaller, but still explosive, fish catching design.

Rugged line ties and hooks ensure the Super Spook Jr. will hold up to opportunistic charges from schooling fish. Realistic finishes provide the proper look for virtually any topwater fishing situation.

Go-Getter Spinnerbait

These short-arm style Hildebrandt® Go Getter™ Spinnerbaits are perfect for helicoptering down bluff walls, weed edges or vertical cover – and are particularly deadly at night. Go Getter Spinnerbaits sport durable, high-action silicone skirts and bright nickel or 24K gold plated blades which bass can feel thumping through the water.

Okeechobee Special

Proven to be a certified winner by tournament pro's everywhere, the Hildebrandt Okeechobee Special Spinnerbait is available with premium nickel-plated or 24-karat gold-plated Willow and Colorado blades for maximum performance in clear or stained water conditions. Also featuring a "no lead" construction, its head is molded from bismuth instead of lead for a more compact and fishery-friendly presentation. Details like a grub/trailer keeper behind the skirt keeper, Sampo ball-bearing swivels, XtraSharp Hooks, and premium silicone skirts also help put the Hildebrandt Okeechobee Special Spinnerbait in a class of its own.

Spinner Bait – Colorado / Willow

The Humdinger Colorado Willow Spinnerbait provides anglers with a lethal combination of flash and hard-thumping vibration. Perfect for stained waters and river systems, the Humdinger Colorado Willow Spinnerbait is constructed using a premium barrel swivel, low-profile .032 gauge wire, and a super-sharp Eagle Claw Lazer Hook. The streamlined head shape of the Humdinger Colorado Willow Spinnerbait also helps it move through thick cover with ease.

Spinner Bait – Colorado / Colorado

The Humdinger Colorado Spinnerbait gives anglers one hard thumping Colorado blade that delivers tremendous vibration and helps trigger bites from inactive fish. The single Colorado blade design means it can be crept along the bottom at very slow speeds because it produces minimal lift, while still providing stimulating vibration and flash. Built using high-quality components just like all Humdinger spinnerbaits, the Colorado Spinnerbait features a premium barrel swivel, thin .032 gauge wire, and a razor-sharp Eagle Claw Lazer Hook. Also equipped with a streamlined head design, this allows the Humdinger Colorado Spinnerbait through the thickest cover without snagging.

Spinner Bait – Willow / Willow

This Spinnerbait grabs bass' attention with a blinding flash generated by its two bright willow blades. Built using high-quality components, the Humdinger Double Willow Spinnerbait features a premium barrel swivel, thin .032 gauge wire, and a razor-sharp Eagle Claw Lazer Hook. The head of the Humdinger Double Willow Spinnerbait is also designed with a streamlined shape.

Buzz-Bait

Great for stained waters and river systems, the Humdinger Buzzbaits feature a premium delta-blade that creates lift and causes it to quickly rise to the surface. Once the Humdinger Buzzbait gets on plane, each rotation of the blade creates an attractive sputtering disturbance and causes the old-school rubber skirting to pulsate with a lively wiggling action.

Zig Zag Jig

The Humdinger Zig-Zag Bladed Swim Jigs are excellent devices for finding fish in a variety of water conditions. Built around Humdinger's new blade design, it is constructed to be retrieved at any speed without washing out. Not only do they run true whether they're being burned in or slowly crawled back to the boat, but the blades also provide exceptional deflection properties perfect for banging off of wood and other cover.

Ilander Flasher

One of the most popular offshore lures just got better. Iland Lures' tournament proven Ilander now features a prism mylar outer shell, which adds increased visibility and realism. The Ilander Flasher Series is offered in seven popular fish catching colors. Drop one back in your trolling spread and "light up" your next fishing trip.

Slab Bites

LELAND'S LURES Crappie Magnet™ Slab Bites Were designed with a denser substance that allows the bait to stay on the hook longer than other similar crappie baits. Slab bites are also longer pieces to provide more surface area to hold onto the hook. Adding bait between the tails of a Crappie Magnet body increases the amount of bites you can get when fishing with the Crappie Magnet. We created a more durable bait to increase hits but stay on the hook.

Eye Hole Round Jighead

The first jig head that holds your scent in place. Add scent and color by placing scent in the eye hole of the lure. Locking the scent in place, allowing you to catch multiple fish on just one scent. Any scent can be used, but we recommend using Crappie Magnet® Slab Bites as they last longer than other scents. Traditional round head design these heads are perfect for multiple techniques from long-lining to dock shooting and everything between.

Eye Hole Hammer Jighead

The Eye Hole Brandon Smith Hammer Head was designed by accomplished tournament angler, Brandon Smith this head has flat wider surfaces that not only hold more scent but give off a better return for the forward facing sonar users. The first jig head that holds your scent in place. Add scent and color by placing scent in the eye hole of the lure. Locking the scent in place, allowing you to catch multiple fish on just one scent. Any scent can be used, but we recommend using Crappie Magnet® Slab Bites as they last longer than other scents.

Comet Mino

The Comet Mino is one of Mepps most popular lures. It will catch just about any fish that swims. Bassmaster magazine named the Comet Mino one of the 10 best bass lures of all time. All Comet Minos are carefully airbrushed to ensure realism. Their erratic swimming action makes them appear to be a wounded bait fish. Comet Minos are perfect for casting or trolling. Silver blades are genuine silver plated. All Mepps Comet Minos run at mid-depth.

Heavy Dine Sinkin Twitch

This heavier version of the MirrOline, casts great, and has a sink rate that is the same as our famous 52M series. Features bright, reflective, luminescent inserts, "fish calling" rattles and natural 3-D eyes to enhance their realism, plus extra strong hooks. With a twitching retrieve, these baits dart from side-to-side, mimicking a wounded baitfish. Trout, Redfish, Snook, Striped Bass and Tarpon find the MirrOdines to be irresistible.

Lil John Soft Bait

The MirrOlure Lil John Twitch Bait has an unusual shape but is a proven favorite among many tournament professionals and guides. Infused with a special shrimp scent that's especially appealing to trophy fish, the Lil John has a tube-shaped body designed for great action and unmatched casting distance. Lil John's extreme durability makes it an outstanding soft plastic bait. Ideal for trout and redfish.

D Bomb Creature Bait

Pitching and flipping has a new go-to bait. D Bomb is a bulky 4" creature bait with a unique ribbed body that displaces lots of water resulting in a straight fall. The tails sail when left connected or flap wildly when separated. The body is thinner where the hook comes out for easy hook sets but has a thicker head so the bait stays on the hook.

Baby D Bomb Creature

The Baby D Bomb is the smaller offspring to the extremely popular D Bomb. The 3.65" Baby D has a smaller, yet bulky, profile to flip and pitch but it also has finesse applications. When Texas rigging, the bait has a thinner ribbed body that can still accommodate a 3/0 flipping hook. It also can be rigged on a shaky head or drop shot. As always, the hook sets are solid with the Baby D and its thin tails have the subtle action fish love.

Roboworm

Missile Baits has created the most versatile hand poured finesse straight worm & it is being made by Roboworm. At 6" long, the proportions of the Magic Worm allow for perfect rigging options on a drop shot, wacky rig, shaky head, Neko rig, Texas rig, or Carolina rig. Having one go to worm for many finesse presentations is fantastic. The Magic Worm has you covered in 12 custom color choices and come 14 worms per bag. There is no secret bait but there is a Magic Worm!

Bomba Worm

The Bomba 3.5 is a finesse, thick, craw body worm that casts and skips like a rocket. Think combination of a Ned Rig and Senko. The bait visually looks like a crawfish with no appendages and has a hook slot in the belly for easy hook sets. The Bomba 3.5 is mostly fished Texas rigged weightless to erratically fall to the bottom while gliding, rocking, and even going away from you at times. Many other bass catching techniques can be used with the Bomba..

Quiver Worm

The Quiver 6.5 is a 6.5" long straight worm that is designed specifically for the two hottest bass fishing techniques – the Neko rig and the Tokyo rig. Taking an extended look of the very popular Ned Bomb, the super soft, ribbed body has a blunted head on the front for inserting Neko weights and sturdy rigging on the Tokyo rig. The back of the Quiver 6.5 has a thin beaver like tail that quivers with the slightest touch and bass can't resist. The Quiver 6.5 is exactly what anglers need to learn and master the Neko rig and Tokyo rig with a larger profile.

Nedball Head

The Missile Baits NedBall Head is the solution for Ned Rig anglers looking for a simple yet different head design with a hook that locks fish on. The NedBall Head is a simple round ball head design with a flat spot on the bottom to keep it upright. It uses a 1/0, 90 degree VMC Techset jig hook on the business end. A cone shaped keeper keeps your soft plastic locked on the head.

Mini Flip Jig

Sometimes dynamite comes in small packages, and that has never been more true than with the Missile Jigs Ike's Mini Flipping Jig. The brainchild of Mike Iaconelli and John Crews, it has several design features that set it apart from any flipping jig you've ever fished. For one, it is extremely well balanced with the weight centered around the hook shank. This combined with its compactness & perfectly angled weed guard allow it to get in and out of the nastiest cover with ease 99% of the time.

Sassy Shad

Shad is the one bait fish almost all fish seek as a food source. The original Mister Twister Sassy Shad® is the closest imitation of this classic bait fish you'll find anywhere. The Sassy Shad® will out produce any other shad-type lures. It's classic tail design and supple body give the Sassy Shad® the natural shad action fish can't resist.

You can also add a spinner form for added flash and vibration. Mister Twister®'s 2 1/2" Sassy Shad® is perfect for all species of panfish including yellow perch. It's also an excellent lure choice for crappie or stream trout. Rig it with a 1/8oz. jighead.

BaitFuel Paca Slim Craw

Another great addition to the famed Paca™ line of baits, the NetBait Paca™ Slim delivers a thinned-down profile that really shines in-terms of raw attraction and versatility. Fitted with Net-Bait's patented claw design, the NetBait Paca™ Slim features a solid, round-ribbed body, which can easily be applied to light Texas-rigs and all sorts of jigs to produce a fluttering enticement. Scented & salted to perfection, the NetBait Paca™ Slim provides a slender, more active profile that will be a major player around craw-hungry bass.

BaitFuel C-Mac Worm

The C-Mac is dynamite either Texas or Carolina Rigged. Large ribbon tailed plastics have always been a favorite for catching big lethargic summertime bass and the NetBait

C-Mac is a great choice to entice bites from these big fish. Developed in a Lab and Proven on the water, BaitFuel is SUPERCHARGED with F.A.S.T. is Fish Active Scent Technology that was scientifically engineered to stimulate a fish's predator instinct. BaitFuel provokes key predator aggression habits in fish stimulating more bites and longer hold times for your bait.

BaitFuel Finesse Worm

Harnessing the attraction of BaitFuel, the Net-Bait BaitFuel Finesse

Worm builds on the proven fish-catching ability of NetBait's signature finesse worm to put more bass in the boat. Offering excellent action, flexibility, and ease of rigging on a jig head, it's a must-have for every angler's arsenal. A great choice for triggering bites on a tough day, the NetBait BaitFuel Finesse Worm's soft, ribbed body excels at tempting finicky fish, while remaining durable enough to withstand multiple fish catches. Effective on a shakey head, drop shot, or darter head, the NetBait BaitFuel Finesse Worm's flat head design provides seamless, flush rigging.

Featuring a long & slender worm profile with an oversized U-shaped tail, the NetBait BaitFuel Mega Big Bopper Swimming Worm delivers strong vibrations as it moves through the

water to excel with Carolina-rigs, Texas-rigs, or weightless presentations. Fueling every bite with the next generation of bass fishing scent technology, each lure is injected with BaitFuel's X55 Formula to enhance all the 'go-to' color patterns, shapes, and shimmering action anglers need to provoke a feeding response from predators.

BaitFuel Lizard

With a scent-packed lizard shape, the NetBait BaitFuel Lizard Creature Bait harnesses the power of BaitFuel for a presentation that bass won't pass up. A hard-thumping take on a classic reptilian profile, the NetBait BaitFuel Lizard Creature Bait has a slender, streamlined body that navigates vegetation with maximum efficiency. The key to the bait's action is its two slightly larger front legs, which along with the rear two legs offer a more noticeable presence in the water. At the rear, anglers will find an oversized curly tail generating a vibrating turbine action bass can feel in their lateral lines.

BaitFuel Super Twitch

With a healthy dose of BaitFuel, the NetBait Twitch Soft Jerkbait is a versatile soft plastic jerkbait featuring a split tail design that generates subtle, yet enticing action with each twitch. As a baitfish imitation bass just can't resist, it leaves a cloud of powerful BaitFuel scent behind to trigger predatory instincts, as well as, keep fish holding on longer. By itself, the NetBait BaitFuel Twitch Soft Jerkbait darts and glides with a realistic movement. When paired with a Texas-rig, drop shot, or vibrating jig, it provides an irresistible baitfish imitation reinforced by a wide-selection of forage-inspired colors.

BaitFuel Twin Tail

BaitFuel infused for maximum attraction, the NetBait BaitFuel Twin Tail Grub Trailer utilizes years of lab research to give anglers an edge against discerning fish and tough competition. Featuring NetBait's revolutionary bait scent, it offers a kicking effect on the swim that moves water to draw in bass and trigger aggressive reaction strikes. The fluttering appendages are a great match for a wide range of baits, including finesse jigs, finesse spinnerbaits, downsized buzzbaits, and vibrating jigs.

BaitFuel Paca Chunk

The NetBait BaitFuel Paca Chunk combines the action of its patented claws with the powerful scent technology of BaitFuel to deliver the ideal combination of action and attraction. Great when rigged on a jig head or back of a ballhead, its claws slow the descent with a parachuting effect, fluttering even at slow speeds. When at rest, it sits at a 45 degree angle to imitate the defensive posture of a crawfish. Perfect for pairing with the NetBait Paca Bug Football Jig, the Paca Chunk's solid body helps it stay securely locked in place.

BaitFuel B Bug

The B Bug is a versatile & legendary bait. It can be fished weightless in pads or on shallow weed lines to give an ultra slow fall rate and swimming action or on the back of a jig. Also try it on a Carolina-rig or even give it some chatterbait love. The bigger profile, texture and movement catch attention every cast. You can also Texas-rig the B Bug with a Freedom Tackle Tungsten Weight to change your fall-rate and dial-in to what the fish are looking for...right up to a punch-weight for heavy cover action. The B Bug is a compact bait, and the body has large rings that create a disturbance and the center of the body is recessed for better hookups. Guaranteed fish catching performance!

BaitFuel Little Spanky

The NetBait Spanky Swim-bait is a great addition to the already outstanding line of soft plastics that NetBait offers. It features a ribbed mid-section and a 5/8-inch paddle on the tail. These two features work together to create a vibration and movement that bass will search out and gobble up. Offered in a wide variety of colors, the NetBait Spanky works wonders as a swim jig trailer, on an A-rig or even on a drop shot.

BaitFuel BF Toad

Buzzing the new BF Toad across the water's surface will produce jarring strikes on its own or add it on to the back of a buzz bait for the ultimate vibrating/kicking trailer. The BF Toad is the ultimate search bait that will bring the bass to you with the perfect amount of action and noise. Rigged weedless the bait will come through any cover with ease from slop and cheese to lilies and grass. The BF in the name stands for BaitFuel which is infused throughout the body of the bait. BaitFuel is scientifically proven to trigger a predatory response in fish & will keep them holding on longer when they erupt on the Net-Bait BF Toad from American Baitworks.

Deep Divin N Crankbait

The Norman DD22 has been winning tournaments since 1987. It sets the standard for deep-diving crankbaits and is a must for ledge fishing in the 14-to-18 foot range. Like all Norman crankbaits, the DD22 is made of butyrate which creates a dull thud that helps fish hone in on it. Combined with a medium-wide wobble, the Norman DD22 is irresistible.

Super Gel

Pro-Cure "Super Gel" got even more effective with the addition of UV enhancement. It's like attaching a lit light bulb to your lure or bait. The visibility brings fish in to investigate, and the scent gets them to feed. Made from real bait and enhanced with powerful amino acids in a sticky base that sticks & sticks to lures, spoons, spinners, swim baits, soft baits, etc. for an exceptionally long time. Word of mouth has spread like wild fire, and in 26 years of making great products we've never had a product catch on like Super Gel.

PROTOTYPE LURES

Guerilla Buzzbait

The Prototype Lures Guerrilla Buzz Buzzbait delivers rambunctious topwater commotion that big bass can't resist. Featuring an oversized blade, which sits against a stainless steel retainer rivet and produces its loud squealing noise, its low profile design also allows the oversized blade to contact the head of the Guerrilla Buzz on every rotation to create its signature knocking sound. An elongated flat head helps it get on plane quickly.

Smasher Frog

The Prototype Lures Hollow Body Smasher Frog walks with ease so there is no need to work your frog aggressively to produce action. Made from incredibly soft yet durable plastic, the Smasher Frog is built to withstand the abuse of multiple fish catches with a body section that collapses effortlessly to expose Prototype's razor-sharp proprietary frog hook. Designed to drastically improve your hook-up ratios, this medium gauge hook is carefully positioned so the hook points ride cleanly over the back of the frog instead of digging back into the sides. Weighted at the belly so the body of the frog sits halfway underwater at rest, this frog moves a lot of water, is incredibly easy to cast, and has a higher tendency to ride down on the mat.

Smasher Pro Frog

The Smasher Pro Frogs rely on a new, taller head design that enables it to walk enthusiastically with a seductive side-to-side slashing motion with every twitch of the rod tip. Additionally, the improved heads sport a set of cupped eyes that enhance the Smasher Pro Frogs' action with generous splashing, spitting, and spraying to call up bass from the depths. The updated bodies house button weights in the rear to help the amphibian impersonator maintain the correct posture as well as cast longer distances to cover water more effectively.

Rabid Craw

A revolutionary and realistic crayfish imitation, the Rabid Craw is scientifically designed to capture more bites. Add the patented impregnated hair and scent, and you've got an irresistible temptation fish can't resist. The perfectly formed thorax is designed to fit with your Rabid Tungsten Ned rigs but also perfect as a trailer and even as a saltwater fiddler crab imitation, thanks to its buoyant claws that not only stand up but keep moving when the Rabid Craw is standing in a natural defensive posture.

Fox Shot

The Fox Shot is a drop shot style bait featuring a buoyant 1 inch rabbit fur tail and a sinking body to create the most versatile drop shot on the market with an action that simply cannot be matched. The buoyant tail and sinking body allow the fox shot to site horizontal in the water column but also to sink on a slack line giving you unmatched versatility with a drop shot.

Rab-Shad

The Rab-Shad puts some power fishing into our ordinarily finesse line-up. Precisely built to achieve a sweeping left to right hunting action when rigged as a weightless soft jerk bait. Loaded with salt for longer casts, a faster sink rate, and of course topped off with 1.5 inches of real fox fur to create an action that simply cannot be matched. The Rab-Shad was designed with versatility in mind. Tapered cuts in the mid-section accentuate the action as a soft jerk bait but also make this bait a great option for rigging as a vibrating jig trailer and is deadly when rigged on a scrunger head!

Jointed Floating Minnow

With a slight exaggeration of the unique Rapala “baitfish in distress” swimming action, the Jointed® gets the undivided attention of otherwise disinterested gamefish. This articulated, or “broken-back” bait can be fished top-to-bottom. Swimming action at the slowest of speeds makes this bait the perfect choice after a cold front. Balsa wood construction with VMC® black nickel hooks.

Ripstop Minnow

The RipStop® tail design creates a fast-ripping, flashing swim bait action. Hard-stopping, forward motion stops on a dime, with a subtle shimmy before coming to a rest, then ever so slightly lifts its head with a super slow-rise. Fish it your favorite way for all species.

Precision Xtreme Mavrik

Internally it features a unique weight transfer system that allows it to cut through the air like a bullet for longer casting distances. Once in the water the body shape, weight balance, and carefully shaped bill produce a hard-cutting action that suspends in a head down position when paused. The outside of the super durable plastic body also features molded external scales, gill plates, and large 3D eyes that will fool any fish into believing it's the real thing.

Skitter Walk Bait

Superior construction assures a perfect swimming bait right-out-of-the-box. Weighted tail keeps bait in natural position even at rest. Large internal rattles create a rhythmic side-to-side motion-and-sound combination that imitates wounded or fleeing baitfish. All feature 3D holographic eyes and you can choose from appetizing painted or chrome color patterns. All are equipped with VMC black nickel hooks.

Shad Rap Crankbait

The benchmark other crankbaits are measured by, the Shad Rap® closely resembles baitfish found the world over. Constructed of premium balsa, it is equally effective cast or trolled, performing from ultra-slow presentations to super fast without fail. Its precise action, detailed finish and proven fish-catching patterns make this a “must-have” bait for all anglers. Hand-tuned and tank-tested for perfection right out of the box. Features super sharp VMC® black nickel treble hooks.

OG Slim 6 Crankbait

The Rapala Ott's Garage Slim 06 Crankbait is born out of the sawdust from Ott DeFoe's Garage. Made from premium balsa wood, the Rapala Ott's Garage Slim 06 Crankbait is constructed with flat sides, which helps produce a medium wobble and tight side-to-side action that gets fish to bite. The lightweight circuit board lip is also extremely thin yet delivers the right action and attitude no matter how you fish it, making it the perfect choice for any species of gamefish.

OG Rocco 5 Crankbait

From a passion of bait building as a childhood hobby to customizing lures as a professional angler, the OG Series® is born of the sawdust from Ott DeFoe's Garage. The Rapala® OG Rocco™ is a buoyant, round balsa bait with a square circuit board lip. Highly castable with medium rolling action, deflects off cover and backs out of sticky situations.

OG Tiny 4 Crankbait

From a passion of bait building as a childhood hobby to customizing lures as a professional angler, the OG Series™ is born of the sawdust from Ott DeFoe's Garage. The Rapala® Tiny is a thin, flat-sided balsa bait with a tight wobble and finesse-like action. This thin design and lightweight circuit board lip moves less water and provides a sensitive feel of bottom structure.

REBEL®

Teeny Wee Crawfish

The ultra-light Crawfish is undoubtedly one of the most popular fishing lures in the world. Its small life-like profile entices and catches all sizes of game fish – especially bass, trout, and panfish. Deep, shallow, suspending, cast, or trolled for virtually any freshwater species, there's a Rebel Crawfish that's designed to get the job done.

Jointed Minnow

The Rebel Jointed Minnow, commonly referred to as a "broke-back" minnow, produces more action than a solid body lure, which can be key to getting strikes from stubborn or educated bass, walleye and other gamefish. Designed to be fished three ways – slowly reeled on top, retrieved at a steady pace or twitched erratically under the water – the Rebel Jointed Minnow gives fish that extra "something" that produces strikes.

Pop-R Topwater Bait

The Rebel Pop-R has been the standard by which all topwater poppers/chuggers have been judged for more than three decades. The profile and action of the Pop-R make it a favorite of anglers everywhere. It can be worked quickly across the surface like a panicked baitfish or slowly twitched to mimic a meal that's almost dead, and every speed in between.

Magnum Pop-R Topwater

The largest Pop-R in the Rebel line-up, the Magnum Pop-R creates tremendous surface disturbance to pull in bass and stripers from a long distance. The Pop-R is a legendary topwater bait that's won hundreds of thousands of dollars for anglers in bass tournaments because the bait produces two distinctly different sounds and actions depending on if the angler is holding the rod tip high or toward the water.

S-Waver Glide Bait 120S

The S-Waver will seductively wake the surface and call big gamefish in for a closer look. Hold your rod tip up and S-Waver is a surface lure, allow the bait to slowly sink and the S-Action continues under water. The S-Action swimming motion is created by River2Sea's exclusive Pin and Tenon Hinge and accentuated by her soft PVC tail. That seductive wake will only be interrupted by the explosion of a massive strike.

Fat Straight Tail Worm

The Fat Straight Tail Worm is the classic worm style but incorporating Robo's unique designs. Super sensitive, these baits give a ton of action with the slightest movement. Straight Tail worms incorporate Robo's Salt Release System which makes them heavier when you start fishing and lets you know when the salt is running out and it's time to change worms. The Salt release system also gives a burst of salt when a fish strikes which makes them hold on longer-for a better hook up.

ReBarb Gama Hook

The Robo ReBarb hook was specifically designed for fishing super soft plastic worms. The plastic barb is molded on the shank of the hook which holds the worm on straight and tight. The barb prevents the worm from pulling down on the hook when dragging over rocks or through brush. The Robo ReBarb hooks are available in light-wire or medium-wire hooks which allow for a variety of worm sizes to be fished. When split-shotting or finesse Texas-rigging the Robo ReBarb hook pays big dividends.

Worden's
ROOSTER TAIL®

Treble Hook Spinner

Since the 1950's Worden's original Rooster Tail has been and still is one of the most productive spinners around. Used to catch just about any gamefish, the Rooster Tail's pulsating hackle tail and attractive spinning action will make fish strike, many times when nothing else will work.

Reel Eel Jig

The Real Eel jig raises the bar for anglers who loved our Real Eel with the increased versatility of its jighead configuration. Lifelike movement and vibration generated by its oversized tail drives predatory fish crazy. Whether targeting lingcod, stripers, cobia or grouper, its durable saltwater-tough PVC body and heavy-duty jig hook make it ideal for tackling anything you encounter.

Launch Frog

The key to the Launch Frog's performance is the unique tungsten "parasite" weight system which adds weight without bulk to the hook shank. The Launch Frog gives you maximum distance in a top water frog while premium Owner hooks and high compression body deliver the highest hook-up rate possible in a hollow body frog. The Launch Frog delivers a super-soft high compression wide body design wrapped around a premium 5/0 Owner RED double frog hook for maximum water displacement and buoyancy. The Launch Frog also takes advantage of the famous Scum Frog brass button rear-weight to maintain a nose-up frog profile critical to frog performance.

Launch XS Frog

Extremely castable and heavy for its relative size, the Scum Frog Launch Frog XS features a proprietary tungsten "parasite" weight system along the shank of the hook and a brass button tail weight, which allows it to cast like a bullet & sit in a perfect nose up position when it lands on the surface. It is also perfectly balanced to make walking the dog extremely easy, which triggers vicious strikes from bass.

SMITHWICK®

Devil's Horse Topwater

The Smithwick Devil's Horse is legendary in certain regions of the country as the No. 1 topwater lure for giant prespawn largemouth, but it's also an effective lure for smallmouth in clear streams any time of year.

The propellers at the front and tail of the lure can be adjusted to throw more water and work slower, or bent back for a quicker, quieter retrieve. The Devil's Horse simply catches fish because it creates action without moving forward far, so you can work a fish a long time and simply tease it into striking.

Rattlin' Rogue Jerkbait

This Rattlin' Rogue uses short, "snappy" jerks of your road tip from light or hard, slow to fast, short to long, to catch fish! Ponds, creeks, rivers or lakes, this Rattlin' Rogue makes catching fish easier, wherever fish swim! The slow-rolling retrieve is very effective in making your Rogue "wallow" along or just below the surface.

Bobby's Perfect Frog

Designed to naturally expel any water infiltration while the frog is being fished for unbeatable buoyancy and consistent performance. Snag Proof's design is engineered to keep the frog heads-up when stationary and deliver maximum action when worked through sparse or the thickest of cover. Snag Proof's machine-welded line tie eliminates even the slickest braided lines from slipping through the eye of the two-piece through-wire hook system. The hollow cavity design of Snag Proof frogs works together with our super-soft injection-molded body & Water Evac System maximizing body compression and delivering higher percentage hook-ups.

SmashMouth Frog

Featuring a hollow body construction with a deeply cupped mouth, the Snag Proof SmashMouth Hollow Body Frog is completely weedless and can be worked through the thickest of slop with ease. Once it gets into open water anglers can pop it to create an aggressive popping and splashing action that calls bass from a great distance and triggers vicious strikes. It is also weighted for long distance casting but balanced so that it sits in a perfectly horizontal position to ensure consistent action cast after cast.

Zoo Pop Topwater Bait

A revelation in topwater popping lures, the Snag Proof Zoo Pop 3/8oz boasts an exceptional popping action combined with the ability to float at rest, seamlessly merging finesse fishing with the power of frog lures. Its soft, hollow body generates a distinctive popping motion, making it a standout choice in the finesse category, and it excels in provoking reaction strikes when larger frogs are often overlooked. With its fully integrated hook design, the Zoo Pop remains unfazed in the densest aquatic environments, conquering heavy grass, pads, and matted vegetation.

Speed Demon 55 Crankbait

Tipped with a premium computer chip bill, the Speed Demon Crankbait dishes out a super tight wobble that fish find irresistible all season long. Not only does the bill impart a tempting shimmy, but it also helps the plug to deflect erratically and elicit vicious reaction strikes. In addition to its mesmerizing action, the Speed Demon 55 also brandishes brilliant colorways and SPRO's signature Mean Eye design. Completed with razor-sharp treble hooks for premium performance right out of the packaging, the SPRO Speed Demon 55 Crankbait is perfect for burning the bank in search of a school of biters.

Little John MD Crankbait

The John Crews Little John MD Crankbait is designed to run deeper than the original Little John at approximately 7-9ft. The body is the same as the original Little John, but the dive bill is plastic, longer and at a different, downward angle. The longer lip helps the bait dive quickly, as well as, reduce hang-ups by helping flip the bait up and over branches. The Little John MD also features a tungsten weight transfer system that provides excellent casting and helps the lure swim true through open water without rolling over or tracking to the side. Equipped with sticky sharp Gamakatsu hooks and available in a variety of proven colors.

Aruku Silent Shad

The Spro Silent Aruku Shad is uniquely made to lock on to the bottom in a nose down position during the retrieve – making it look like an actual feeding shad moving along the bottom. Specifically designed for fishing thru aquatic vegetation, it's nose-down action makes it one of the most weedless lipless and Silent crankbaits on the market. Life-like finishes, including etched scale patterns and 3D eyes add to the Silent Aruku Shad's realistic presentation.

Blade D-Will Spinnerbait

The SPRO Blade Double Willow Spinnerbait calls to fish with generous flash and vibration. The Blade is crowned with a pair of premium gold and nickel-plated Willow blades that shower the water column in reflected light. The leading blade is anchored to the durable arm with an industry-leading ball bearing swivel that promises reliable and buttery-smooth rotation every time you cast a line. Situated below the blades, the SPRO Blade Double Willow Spinnerbait employs an aggressive head that is designed to pierce through grass and other vegetative cover efficiently. Armed with a Gamakatsu Nano Alpha Coated Hook that offers near instant penetration and reliable hook-ups.

Thumper Spinnerbait

The Thumper is topped with a pair of premium Colorado & Indiana blades that not only add heavy vibration but also reflect a generous amount of light to help fish visually locate your lure. A high quality ball bearing swivel fixes the peak blade to the durable wire arm & ensures it rotates with silky reliability from the moment it enters the water until the cast terminates. The SPRO Thumper Colorado/Indiana Spinnerbait also features a custom-designed head with SPRO's signature Mean Eyes that is built to bulldoze over rock, timber, and other hard cover. Concealed beneath that skirt is a razor-sharp Gamakatsu Nano Alpha Coated Hook that effortlessly pierces bass mouths for an optimal hook-up ratio anglers are sure to appreciate.

Kick Back Trailer

The Kickback Trailer relies on a dense body section up front that is perfect for threading onto a stout hook without splitting or tearing to aid in ensuring lasting performance. To help get your bait noticed by more fish, a dynamic pair of legs with aggressive ribbing extends from the body to add secondary movement to your preferred spinnerbait, vibrating jig, buzzbait, and more.

Bronzeye Blade Frog 65

Featuring two small Colorado blades instead of traditional skirted rubber legs, the Spro Bronzeye Blade Frog 65 is meant to be reeled across the surface, which produces a subtle buzzing action and bright flash like a baitfish trying to evade predators. Because of its hollow body design, anglers can also fish it over heavy cover or walk it like a standard hollow body frog, giving you the power of multiple lures in one package. Just like all the other Bronzeye Frogs, the Spro Bronzeye Blade Frog 65 is armed with a 4/0 Gamakatsu EWG double frog hook that delivers proven hook setting performance and the power needed to get big fish out of the heaviest of cover.

Essential Flappin Frog

The Spro Flappin Frog 65 delivers a kicking and buzzing action that triggers ferocious topwater explosions. Featuring a hollow body design and two large kicker legs, the Spro Flappin Frog 65 is completely weedless and gives anglers the ability to fish a buzzbait style action through heavy cover without getting snagged or interrupting the kicking legs. The hollow body design also allows it to float so anglers can pause the frog and work it slower than a soft plastic kicking frog, which would sink if paused during the retrieve. The Spro Flappin Frog 65 is made out of a super tough TPE material as well to increase the durability so that anglers can fish it through the heaviest of cover without having to worry about damaging their frog. Armed with a 4/0 Gamakatsu Nano Smooth Coat Double Frog Hook that provides effortless hook sets, the Spro Flappin Frog 65 allows you to cover water quickly and put big fish in the livewell.

Bronzeye Frog Jr. 60

The first unique feature you'll notice about the Rojas Bronzeye Frog is that it has been designed to utilize the full potential of Gamakatsu's EWG Double Frog Hook. The wire used in this hook is 2x strong, ensuring it can stand up to strong rods and braided line. When you press down on the Bronzeye body you won't believe the amount of hook that is exposed, thanks to the EWG Hook, and how soft the plastic is.

Bronzeye Spit Shad 60

The Bronzeye Spit Shad can be fished in areas where you could never dream of throwing a hard bait with a similar action. The Bronzeye Spit Shad has a spitting and gliding action unlike any other hollow body weedless bait. The unique actions are caused by a special "Spit Cup" on the front of the bait and vertical living rubber tails that give the bait a special gliding action.

Ribbit Frog

The Original Ribbit is one of the best all time lures for catching big bass on top. It combines the action of a topwater with a weedless design for those hard-to-fish spots. We recommend rigging it with a 4.0 or 5.0 Double Take Hook. However a standard 5.0 single hook will work.

Bull Ribbit Frog

Bigger bait means bigger bass, especially when that bigger bait is a Bull Ribbit Frog by Stanley Jigs. A bull frog sized Ribbit Frog, the Bull Ribbit's enticing swimming and kicking action really gets those big lunkers around thick pads worked up and ready for a big fat frog feast. For best action and hook sets, a 6/0 hook is a must.

Vibra Shaft Spinnerbait

Featuring a patented tapered wire design where the wire is thinner at the top, the Stanley Original Vibrashaft Willow Spinnerbait transfers all the vibration to the tip where the blades are located to create unmatched water displacement. The premium willow leaf blades also produce an abundance of flash to gain the attention of lurking bass from a great distance. The rounded shad shaped head design rolls over logs, brush, & rocks without getting snagged as well so that you can cover more water with great efficiency.

Arashi Glide SwimBait

Developed to sink slowly in a slight head down position, the Arashi Glide Bait responds to the slightest line movement. Swimming in an exaggerated "S" action that piques interest of large predators, a quick snap of the rod tip turns the AGB 180 degrees, triggering strikes from followers. Controlled sink rate provides the angler increased control of swimming depth keeping the Arashi® Glide Bait in the strike zone longer.

Mr. Crappie Joker

Strike King has teamed up with Wally Marshall, Mr. Crappie, to bring you a high-end line of crappie baits called the Mr. Crappie Joker. The Mr. Crappie Joker features a solid body with three appendages that look a lot like a joker's hat. A small ball on the end of each appendage increases their action. Using design cues accumulated over the years, the Joker draws crappie out of their cover to put more slabs at the end of your line.

Swimin Caffeine Shad

With its unique air-filled bubble tail, the Strike King® KVD Perfect Plastics Caffeine Shad flaunts an awesome set of moves never before seen in a topwater shad bait. Crafted with the world's best plastics, the Caffeine Shad is extremely soft and pliable, loaded with heavy salt, and strongly laced with real coffee scent. This deadly combination maximizes the Strike King Caffeine Shad's appeal by masking unnatural scents and giving fish a tasty reason to hold onto the bite longer, resulting in a healthy increase in positive hook-ups.

Game Hawg Creature Bait

The Strike King Game Hawg is a favorite creature bait among the Strike King Pro's. Designed to be fished using a Texas rig or a Carolina rig, the Game Hawg's legs and flappers move with the slightest twitch of the rod tip. The Game Hawg contains the world's best blend of soft plastic ingredients! This allows the use of large amounts of salt yet keeps the bait soft and pliable. The Coffee scent masks human scents & oils aiding in longer hold times increasing your hook-up chances.

Rage Tail Baby Craw

The Rage Baby Craw is the most action packed Craw design on the market. With the slightest movement of the rod tip, the claws start flapping back and forth and create terrific action and vibration in the water. This versatile design lends itself to a variety of popular rigging techniques that have proven effective at the highest level on the Pro Fishing Tour.

Rattlin Rage Craw

By far the undefeated champion of crawfish baits in the water, Strike King's soft plastic Rattlin' Rage Craw is a slender, 4" crawfish imitator, pre-rigged with a glass sound chamber embedded in the tail to emit a powerful rattle and attract fish. Designed with two Rage Flange pincers that wiggle and swim, imparting a life-like, natural action. It can be fished as a jig trailer, Texas rigged, or fished on a jig head like the Strike King Mark Davis Jointed Structure Head or the Strike King Tour Grade Football Jig Head.

Rage Tail Structure Bug

The Strike King Rage Bug was designed with the help of bass fishing legend, Denny Brauer. Made to be the ultimate flip bait, its streamlined body allows it to slip in and out of tiny holes in cover, and its precise composition and ribbing allow it to produce the classic crawfish glide that bass can't resist. Featuring unique Rage Tail claws and appendages, it produces a tremendous commotion any time it hits the water, and its also loaded with Strike King's exclusive Coffee Scent for added attraction. Available in a wide range of tournament-proven colors, the Strike King Rage Bug has what it takes to elevate your flipping game.

KVD Rodent

The Strike King Rodent is a heavy cover fishing dream.

Designed to make a major disturbance under the water, the Rodent searches out the big ones. The Rodents bubble tipped appendages and soft plastic tails have incredible action in the water. The Rodent is a great choice for heavy cover and works excellent on a Texas rig, Carolina Rig or as a Jig trailer.

Rigged Tidal Shrimp

Strike King's Tidal Shrimp has been reimagined to increase durability and performance.

Featuring a firmer material than standard plastics & mesh overlay on the tail, the new

Tidal Shrimp is built to withstand the wrath of vicious saltwater predators. Available in eight colors, this shrimp is pre-rigged with a 1/4 oz jig head.

Chick Magnet Crankbait

The thin body design of the Chick Magnet and the circuit board lip impart a tighter wobble and an exceptionally lifelike action to the lure. The subtlety of the Chick Magnet makes it ideal in the four to six foot depth range.

Chick Magnet Jr. Crankbait

Strike King's Chick Magnet Jr. is a 1/4 oz flat-sided crankbait that is designed with a circuit-board bill. The flat-sided build of the Chick Magnet Jr. displaces water & gives the lure a tight wobble that attracts fish. Built to dive 4-6 feet, the Chick Magnet Jr. is a downsized version of the award-winning Chick Magnet.

Hybrid Hunter Shallow

Just like its deeper diving brother, the Shallow Hybrid Hunter is a proven, fish-catching bait. With a distinctive L-shaped bill design, it excels around vegetation, and dives down to 1-3 feet. The Hybrid Hunter's key feature is its versatility. It can be fished like a traditional crankbait, jerkbait, topwater wake bait, on-and-on the list goes. This lure has a distinctive wobble, a rattle chamber that emits a powerful fish-attracting sound, and an added buoyancy that allows it to rise faster out of submerged vegetation.

Pro Series 6XD Hard Knock

The Strike King 6XD Hard Knock Crankbait provides anglers with a new deep thumping sound from a single hard knocker. Designed to attack those big ledge fish in the 18-20ft range, its unique curvature and streamlined body dives quickly to maximum depth, setting it apart from other deep diving crankbaits. Well balanced even in windy conditions, the Strike King 6XD Hard

Knock Crankbait casts like a bullet and has a super-steep dive angle so the bait stays in the strike zone longer with incredible deflection capabilities.

Pro Series 8XD Crankbait

Bass anglers on the hunt for monster bass should arm themselves with big baits. The Strike King® Pro Model® 8XD Deep Diving Crankbaits fit the big fish/big bait equation perfectly, and their free-floating rattle chambers create big sound as well. On 14-lb. fluorocarbon line, the 8XD can hit 20 feet on the retrieve, allowing you to present to fish you could probably never reach with a crankbait before. Yet surprisingly, these quick-diving baits cast and pull rather easily, considering their size. When the fish are hunkered down deep, these big cranks may be your only chance at triggering those big strikes.

KVD Wake Bait

The Strike King® KVD 2.5 Wake Bait sports a unique angled bill that, instead of diving, creates a huge surface wake on the retrieve. Unlike other wake baits, the KVD 2.5 won't blow out on a fast retrieve – and because it tracks true & is equipped with a loud, clacking internal rattle, it causes more underwater mayhem than any angler can imagine.

KVD Squarebill Crankbait

Designed to the specifications of BassMaster's Classic Champ Kevin VanDam. Perfect for shallow water power fishing. The square bill design and unique action will constantly wander with erratic action while still running true. It also helps deflect off cover to entice strikes. The KVD baits are designed with no internal rattles for a silent approach.

KVD Squarebill Hard Knock

The entire KVD line of crankbaits has been painstakingly designed and tested at the hands of Kevin VanDam himself. From the erratic action and chip-resistant finishes to the 3D "look alive" eyes – no detail has been spared in developing and delivering a lineup of crankbaits proven to produce results on the water. The introduction of the Hard Knock sound to the tried and true KVD 1.5 is an exciting addition to the KVD crankbait arsenal.

KVD 200 Jerkbait

Kevin VanDam spent close to two years designing & testing the Strike King KVD 200 Jerkbait before he got it just right. It's unlike any jerkbait on the market with a wilder action than any other jerkbait he's ever fished – and it flat gets bit. It has a really wide side-to-side travel on the jerk, and also has a lot of erratic wiggling and darting action. A weight transfer system means you can cast it a mile, and 3D eyes and incredible detailing only add to its appeal.

KVD 300 Deep Jerkbait

Designed by angling extraordinaire, Kevin VanDam, the Strike King KVD Deep Jerkbait utilizes the proven form and action of the original to effectively target a deeper section of the water column. Delivering an incredibly-wide side-to-side lunging movement, the Strike King KVD Deep Jerkbait provides a lethal combination of roll, flash, and wiggle that digs all-the-way down to 11-feet.

Bitsy Red Eye Shad

Emulating Strike King's Red Eyed Shad, the Bitsy Shad is built to resemble the famous shape and action of the original in a smaller package. This 1/8 oz. soon-to-be favorite has premium size 8 hooks, Strike King's most popular paint schemes, 3D eyes, and free-floating rattles. The Bitsy line up brings high quality baits into a Bitsy sized profile, perfect for catching all types of species in various bodies of water.

Red Eye Tungsten Shad

Featuring a specially designed tungsten sound chamber that emits a unique double tapping cadence, the Strike King Red Eye Shad Tungsten 2 Tap still delivers the same tournament winning features as the original Red Eye Shads. The unique sound that the Tungsten 2 Tap produces has been proven to trigger fish to bite that otherwise may not have.

Mark Rose Lil Ledge Spoon

The Patented Lil' Ledge Spoon by Mark Rose is a new type of jiggling / flutter spoon with a random erratic side to side, shimmering, spinning motion that drives fish wild. The built-in swivel eliminates line twist and the premium Mustad® KVD treble hooks up fish better than regular hooks for a better landing ratio than regular spoons.

Sexy Spoon

The Strike King Sexy Spoon is here and is large and in charge. Spoon fishing is nothing new to many fisherman but now it's quickly become a valuable tool for fishing deep structure. The Sexy Spoon is designed to emulate a dying baitfish, the flash, flutter and fall of the Sexy Spoon is unlike any other spoon on the market. Fished around submerged brush, deep grass or muscle beds there is no wrong way to fish the Sexy Spoon.

Bitsy Spinnerbait

Strike King's Bitsy Spinner is a new spin on a tried-and-true classic bait. The ultra-soft hackle feather tail used on the Bitsy Spinner maintains its integrity for a lively presentation and realistic action throughout the life of the lure. This in-line spinner spins true, providing strong vibration. The Bitsy Spinner is crafted with premium components and is available in all-new colors and four sizes, making it great for a wide range of species.

Tour Grade Competition Spinnerbait

Strike King's Tour Grade Compact Double Willow Spinnerbait is designed to fish the spinnerbait when you want to attract in the fish, but under clearer, pressured conditions where "less is more." The flashy-but-stealthy willow blades send off lots of flash and silent active skirt, but in a more compact size, making it look like a tasty morsel to an opportunistic bass.

Tour Bladed Umbrella

The Bladed Tour Grade Titanium Umbrella Rig is the same as our regular Tour Grade Titanium Umbrella Rig except with heavier (stiffer) wire for more stability and 5 willow leaf blades on ball bearing swivels to add flash and attract fish. The titanium wire enables increased pulsing action of the lures for better action & more strikes. The smaller diameter wire is less visible in clear water.

Hack Attack Jig

The Strike King Greg Hackney Hack Attack Jig was born to fish extremely heavy cover. The unique head design and heavy weed guard combine to help the Hack Attack Jig navigate in and out of cover easily. Built around an exclusive Gamakatsu black nickel heavy wire hook for extra bite and a 30 degree line tie, you can load it up with the heaviest braid you have & pull as hard as you want and it won't bend or flex. The 30 degree angle of the line tie also creates a better hook-up ratio than any other jig on the market.

Thunder Cricket Blade Jig

Strike King's Gold-Plated Thunder Cricket features a Gold-Plated blade for added visibility in stained water or low-light conditions. Like the fan-favorite original Thunder Cricket, the Gold-Plated model features a super-strong long-shank Owner Jungle Hook for powerful hooksets and durability. The eyelet is designed to pivot freely, which produces a superior action and allows for a stronger hookset. The Gold-Plated Thunder Cricket also features a hand-tied skirt for superior swimming action and an extra-durable trailer keeper to keep soft plastics firmly in place.

Tungsten Thunder Cricket

Built with a compact tungsten construction and Strike King's innovative recessed head design, the Strike King Tungsten Thunder Cricket Vibrating Jig creates a smaller profile without reducing weight for added effectiveness around pressured fish. Featuring the same constant hard-pulsing vibration as the original model, the tungsten Thunder Cricket is equipped with a unique vibrating blade to impart erratic action and provide trailers with enticing exaggerated movement.

Crappie Weapon

The Crappie Psychic 2 1/4" Crappie Weapon was designed to be used with our Scented Crappie Trailers and Ammo, but will also work as a stand alone bait. The bulbous eyes at the very top of the hard body was added to give it a slight wobble on the fall, which also creates just a lil bit more action. Notice those perfectly spaced rings on the hard body, this is very important because every time the bait is removed from the water it captures air. Then when put back into the water and twitched, it releases air bubbles that will definitely entice Crappie to strike.

Quiver Shad

The new Quiver Shad is made from "Tough As Hell" TPE. Just as all Vudu products, it's built to last. The name describes the action. It quivers, shakes, and wobbles through the water. It's wide body design along with the tapered boot tail, gives it that "quiver" as you retrieve it. Rigging TPE has always been a challenge, so we package the lures with a set of 2 jigs designed especially for rigging this durable material. Available in both 3 and 4 inch models. Great for Trout, Reds, Flounder, Snook, and Tarpon.

Shad

The new Vudu Shads Made from "TOUGH AS HELL" TPE, The serrated tail articulates, creating a life like swimming action and the boot tail adds lift and thump to the lure. The tail section is constructed with a durable mesh weave which gives it strength and durability. Perfect for shallow flats and bays. Great on trout, reds, and flounder. Recommended for 2-5 ft of water. We recommend using light inland salt tackle and 12-14lb test for best results.

Mullet

Rigged with a VMC Saltwater 4.0 hook and has an internal 1/4 oz weight for great casting distance. The Vudu Mullet is a medium sink lure and best with a medium retrieve. A stop n go retrieve is very effective. Crank a few times then let it fall for a second, then crank it again. Can be burned along the surface also.

Weedless Shrimp

From the makers of the Original Vudu Shrimp, Egret Baits announces a new "Weedless" version for anglers. Made from "TOUGH AS HELL" TPE, the new Vudu Weedless is designed for gliding through and over grass. It's perfect for the coastal marshes along the Gulf Coast. It can also be used in open water when a "gliding" action may be better suited. It allows a slower presentation. It has a wider tail to give it balance and buoyancy as you work it slowly through the shallows. The Vudu Weedless comes with a belly style hook configuration which makes it much more weedless than our traditional Vudu Shrimp. Rigged with a wide gap 3.0 hook, gives it plenty of bite in the hook.

Shrimp

You'll think it's magic the way the new Vudu Shrimp catches fish! The New Vudu Shrimp has a Kevlar weave through the body giving it strength and durability. We've caught up to 50 Trout on one Vudu Shrimp! It's unique tail gives it a natural swimming action. Comes pre-rigged ready to go out of the pack. We highly recommend a popping cork for best results, but it's just as deadly without.

WAR EAGLE CUSTOM LURES®

Jigging Spoon

Quick on the drop, precise in its movements, the War Eagle Jigging Spoon is widely regarded as the best spoon on the market for taking deep bass in clear water, especially during the tough cold-weather season. Stamped from premium brass with a hammered finish, the Jigging Spoon pumps out plenty of fish-attracting flash and vibration. Built-in quality swivel minimizes line twist.

Buzzbait

The War Eagle Buzzbaits feature a specially designed flat keel head that allows them to quickly rise to the surface and get on plane. The War Eagle Buzzbaits also feature blades in a variety of colors, including prism blades for maximum flash. The blades kick up a bubble trail fish can't resist and put off an instant squeaking that drives them crazy. Also equipped with custom slip-on skirts, light wire for better vibration, & super sharp Mustad Ultra Power Point Hooks, the War Eagle Buzzbaits churn up the competition.

Jiu-Jigsu Jig

The Jiu-Jigsu design began around an Owner ZO-WIRE hook – which is stronger than other hooks, has a Super Needle Point & frictionless finish to improve penetration and hookups. A modified Arkie-style head slides through cover and is powder-coated to withstand repeatedly being drug across rocks. The skirts come in 12 pro-driven colors and made with hole-in-one style skirts for added durability. A precisely-angled weed guard eliminates snags while a wire trailer keeper eliminates the need for glue.

Senko Worm

The Senko is a staple in the fishing world. Versatility is a key attribute of the Senko, allowing it to be fished in a multitude of ways that all end up putting more fish in the boat. The only wrong way to fish a Senko is to not fish with the original Senko.

Speed Senko Worm

Designed at the request from Yamamoto's pro-staff, the Yamamoto 7" Speed Senko was developed to be the

ultimate worm for cover water. Molded with the same legendary Senko body shape but with the addition of a large hook shaped tail, the Yamamoto 7" Speed Senko produces a heavy thumping action that feels like a Colorado blade spinnerbait coming through the water, which triggers aggressive strikes and makes it easy for bass to find in dirty water.

Swimming Senko

The Swimming Senko brings a whole new dimension to Senko fishing. When rigged weightless, the Swimming Senko falls horizontally with a seductive

side to side tail action, the tail action of the swimming senko has more vibration and movement than its brother, which can be extremely productive in stained water situations. The Swimming Senko works great when pitched or flipped when rigged Texas-rigged.

Zako Swimmbait

Designed by B.A.S.S. Elite Series Pro Brett Hite, the Zako Swimmbait joins the ranks of Yamamoto's legendary line of soft plastic baits. Its segmented body and forked tail allow it to excel as a vibrating jig trailer, and its split-belly makes it a great choice for weedless Texas-rigging. The Zako also features a large-belly baitfish profile that perfectly mimics bluegill & shad, while also giving you more plastic to feed onto a jig-hook.

Swimming Zako

The Paddle Tail Zako is everything you know and love about the Zako swim-bait, but with a little more action! Featuring the same durable body as the traditional Zako, the Paddle Tail Zako implements a rectangular tail to give it that hard-kicking swimming motion anglers desire. The Paddle Tail Zako shines brightest on the back of a swim jig, but it can be used as a trailer for anything an angler may desire.

Slink-O Floater Worm

Unlike any other bait in the Yamamoto line-up, the Yamamoto 5" Slink-O Floater provides a unique action that is great for multiple applications so that you can catch more fish. Featuring a heavily ribbed body while maintaining a classic Senko profile, the Yamamoto 5" Slink-O Floater traps air when it hits the water & releases an enticing bubble trail as it moves through the water column, giving it a more lifelike presentation. It is also made from Yamamoto's Mega Floater Formula, which allows the tail to stand up vertically and dance when rigged on jigheads, shakey heads, Ned rigs, and Neko rigs.

Yama Craw

Pro-tested, nature-inspired, and fish-approved, the Yamamoto Yama Craw perfectly fills out Yamamoto's irresistible soft plastic lineup. An unbeatable pairing for football jigs and beyond, the Yama Craw scoots along the bottom with an incredibly natural profile enhanced with micro lateral appendages, a pair of antennae, and two robust claws that feature precisely molded channels to impart a lively kicking action on even the slowest retrieve.

D-Shad

With Yamamoto's unique formula, the D-Shad has the density to stay down even when worked aggressively. That's huge, especially on lakes and rivers where bass respond best to erratic, high-speed retrieves. When paused, the D-Shad also sinks much like a Senko – with a very desirable wobbling action – perfect for fishing it on the fall.

Shad Shape Worm

Combining the elements of a ribbed Senko and a tiny shad-like bait, these finesse worms are an ideal choice for drop shooting and darter heading, as well as, a range of other applications. Popular in Japan prior to their release in North America, the Yamamoto Shad Shape Worms offer a killer bait fish presentation that won't overpower the situation if the fish get finicky.

Ichi Worm

A big worm that generates big bites, the Yamamoto 10" Ichi Worm was built with key features to set it apart from the rest of the pack & give you an edge against the competition. Utilizing a heavily ribbed body similar to the Slinko, the Yamamoto 10" Ichi Worm displaces a ton of water and releases a bubble trail that entices fish to bite. The large ribbon tail also produces a strong kicking action that is deadly on a Texas-rig or Carolina-rig. The Yamamoto 10" Ichi Worm is made from Yamamoto's Mega Floater Formula, which makes the tail stand up off the bottom, making it a great option to fish on magnum sized stand-up jigheads as well.

Yamatanuki Worm

Much like its 3.5" big brother, the 2.5" Yamatanuki is a power-finesse offering that fish can't resist. It weighs ¼ oz alone, is available in 8 colors, falls with the same tantalizing sway and shimmy, and allows for countless rigging opportunities to fit most any scenario. The smaller size allows for greater application in clear water, smallmouth, spotted bass, and other finesse scenarios. The 2.5" perfectly fits the bill as it can be fished on light line, rigged weightless, or on most any style of jig head. It can be cast, pitched, skipped, dropped, or presented however the situation calls for. Count Per Bag: 10.

Pin's Floating Minnow

The Pin's Minnow floating lures incorporate a durable ABS Resin lip to get down over the structure and in the strike zone. Made with Yo-Zuri's Weight Transfer System, these extremely versatile baits cast very well for their size. They are perfectly suited for stream and lake fishing. The Pin's Minnow Series can be cast or trolled producing a tight wiggling action that attracts a wide variety of gamefish to strike.

L-Minnow

Yo-Zuri's L-Minnnows Series™ is used for controlled depth fishing. This legendary lures sinks at a faster rate than most standard "minnow-style" hardbaits on the market. In a style similar to spoon fishing, the L-Minnow from Yo-Zuri is designed to sink while the anglers counts, establishing the depth once the lure reaches the bottom. The L-Minnow from Yo-Zuri can be cast as well as trolled for great fish producing wide wobbling action!!!

3D Inshore Twitch Bait

The 3D Inshore Twitch Bait is a slow sinking lipless hard bait with excellent balance for quick starting action around cover. Designed to be fished in shallow water the 3D Inshore Twitch Bait is an exceptional choice for fishing grass flats, oyster bars or working troughs along the beach. Yo-Zuri's patented 3D prism finish sends out flashes of light which fish can see from a great distance. The internal hologram sheet never wears off and keeps on flashing even when the clear body is scratched. The strategic weight position and flat sides give the 3D Inshore Twitch Bait an erratic darting action on a twitch and pause retrieve.

3D Inshore Surface Minnow

The 3D Inshore Surface Minnow is a wake bait with excellent balance for quick starting action around cover. Designed to be fished in shallow water the 3D Inshore Surface Minnow is an exceptional choice for fishing grass flats, oyster bars & other extremely shallow water areas where traditional minnow baits can be fished. The internal hologram sheet never wears off and keeps on flashing even when the clear body is scratched. The minnow shape mirrors a variety of the baitfish that top inshore predators prey on including Mackerel, Mullet & Sardines. The strategic weight position and round body gives the 3D Inshore Surface Minnow a rolling action on the straight retrieve that creates a "V" on the surface.

3D Inshore TopKnock Pencil

The TopKnock Pencil sits flat on top of the water instead of the tail pointing down, which makes it incredibly easy to “walk-the-dog.” The best feature of the TopKnock is the single one-knock cadence rattle. The single rattle is located in the tail, gives off a very loud knock, and also allows the TopKnock to fly tail first cutting through the wind for extreme casting distance when needed! It is equipped with #2 size saltwater grade treble hooks, and Stainless Steel Split Rings.

Hydro Monster Shot

The Hydro Monster Shot is the most versatile hard bait on the market. It can be fished from the surface to the bottom, and everywhere in between, in 100+ ft of water. It's a heavy weighted lipless stick bait, that falls in a horizontal posture, with a side-to-side wobble that perfectly mirrors a dying baitfish. On a straight retrieve it has wide wobble action, when jigged or twitched it has a sharp darting action and when burned across the surface, it has a skipping action that resembles a fleeing bait. Through wire construction, a durable lead filled body and triple strength saltwater grade treble hooks, quality throughout.

Hydro Minnow LC

The Hydro Minnow LC will cover an array of fishing situations from casting to stripers from the beach or hunting down inshore species all along the coastal regions. The all new Weight Transfer System was rigorously designed to help the Hydro Minnow LC cast like a bullet even into a stiff headwind, allowing the angler to remain far enough away from predatory fish to remain stealthy. This series also features the finest terminal tackle with 3X strength treble hooks & heavy duty split rings.

Floating Bull Pop

Perfectly weighted for long distance casting, the Bull Popper is ideal for surf casting for Striped Bass, Jack Crevalle or Roosterfish or for casting to breaking schools of Tuna and Dorado from the boat. Yo-Zuri has upgraded the new Bull with their patented Power Body, 3X treble hooks and through wire construction to give it the durability to handle any trophy inshore or offshore fish. The large cupped mouth creates extreme surface commotion that draws fish in from long distances.

Bonita

Yo-Zuri's new Bonita boasts our patented color change technology on the top of the bait and a smooth scale pattern on the sides. Featuring the patented Power Body, flat forged stainless steel hooks & stainless steel ball bearing swivels; this is most durable trolling lure on the market. Designed to be fished behind a trolling lead or straight off the rod tip, Bonita's are particularly deadly on Wahoo and Tuna. This versatile trolling lure can be pulled from 6-15 knots and features a tight swimming action. The Yo-Zuri Bonita comes in two sizes and seven color patterns to cover a variety of fishing conditions.

Dinger Worm

The Dinger became an instant bass fishing classic lure. One of the most versatile soft plastics on the market, the YUM Dinger can be Texas, Carolina and wacky rigged, weighted or weightless, and catches bass when other lures fail. This soft plastic bait presents a very subtle life-like action that even highly pressured fish can't resist. YUM Dingers have a unique hook slot that provides better hook-ups, and they're tougher than similar baits – so you get more fish per bait than any other.

Dinger Worm Bulk Pack

The Dinger became an instant bass fishing classic lure. One of the most versatile soft plastics on the market, the YUM Dinger can be Texas, Carolina and wacky rigged, weighted or weightless, and catches bass when other lures fail. This soft plastic bait presents a very subtle life-like action that even highly pressured fish can't resist. YUM Dingers have a unique hook slot that provides better hook-ups, and they're tougher than similar baits – so you get more fish per bait than any other.

Swim'n Dinger

The Swim'n Dinger is a heavily salted, slow-sinking bait with a swim-action paddle tail that swims with an exaggerated side-to-side action. The design of the Swim'n Dinger allows this bait to swim during the retrieve and while it's slowly sinking on a weighted Texas rig. Two sizes and 10 pro-selected color patterns are available.

Hellgrammite

The Hellgrammite is a small Ned style plastic shape that imitates a live Hellgrammite with all its thin appendages and sectioned body. It is a perfect option for fishing in creeks and rivers but shouldn't be limited because this is a favorite meal of bass everywhere! We love to fish the Hellgrammite on a small Ned jig and hop it near shoreline cover such as grass or wood for some vicious bites!

FF Sonar Minnow

Very seldom does a technique arise in the fishing world that completely changes the landscape of fishing. Forward facing sonar is this very technique, and not one angler knows it better than professional angler Jason Christie.

Christie has teamed up with YUM Bait Co. to create a soft plastic lure that will get the absolute most out of forward facing sonar, helping anglers to boat more fish and receive less "follow ups and retreats."

FF Sonar Jighead

The FF Sonar Jig Heads come in three sizes – 1/8, 3/16, 1/4 – and come in a standard ball head design with a vertical line tie. This design is meant to give the YUM FF Sonar Minnow a very static linear presentation in water, unlike any lure on the market. The most important detail however is the hook. It features a number 1 sickle hook that sets perfectly in the fish's mouth every time so more bass get in the boat! The YUM FF Sonar Jig Heads are here to provide the perfect system paired with the YUM FF Sonar Minnow for catching stubborn suspended bass on forward facing sonar.

Recon SwimBait Head

The Scottsboro Tackle Co. Recon SwimBait Head was developed to fit perfectly with the Scottsboro Tackle Co. Swimbaits, but will also work flawlessly with a wide range of other swimbaits. Built with a keeled head shape, which enhances the natural action of the swimbait, as well as, give it the ability to swim through a variety of cover without snagging. It is also fitted with a Mustad Black Nickel Hook for rock solid hook sets, and a durable screw lock keeper that holds your favorite swimbait securely in place.

Finesse TRD

The Finesse TRD is designed specifically for the finesse style of fishing, more commonly known as the Ned Rig. A softer ElaZtech formulation and custom salt content allow the TRD to exhibit the precise sink rate, lifelike action, and irresistible feel that expert finesse anglers have learned result in longer holds and increased hook-up ratios.

TRD CrawZ

An ultra-realistic crayfish imitation, the TRD CrawZ was designed for Ned-rigging but is also ideal for use as a finesse jig trailer and even as a saltwater fiddler crab imitation thanks to its buoyant claws that stand the bait up in a natural defensive posture when dragged along the bottom. Paired with the Finesse BulletZ Jigheads, the TRD CrawZ is an excellent down-sized option for pitching into cover when the bite gets tough & bass shun larger offerings.

TRD TicklerZ

The culmination of nearly a decade of testing and tweaking ElaZtech® finesse baits, the TicklerZ is arguably the most effective Ned Rig bait ever made. Sporting a thick, dimpled body that mates seamlessly with ShroomZ™ and Ned-lockZ™ jigheads, its buoyant construction and widely spread quad-tentacles cause this bait to come alive on the bottom. Designed for bass but equally effective for a variety of fresh- and saltwater species, the TRD TicklerZ is a must-have regardless of your target.

TRD TubeZ

Engineered with a solid nose for easy rigging on Finesse ShroomZ™ jigheads, the 2.75" TRD TubeZ exemplifies, quite simply, the perfect Ned Rig-sized tube bait profile that's ideal for both finesse bass and crappie fishing tactics. It's buoyant ElaZtech® makeup and thin, round tentacles cause the bait to stand up and come to life at rest, and its salted, super-soft, and dimpled body provides an incredibly natural feel.

Scented Jerk ShadZ

A super-lifelike, salt-impregnated soft jerkbait with a lively, split-tail design that perfectly emulates erratic baitfish

action, Jerk ShadZ can be rigged weightless to achieve a slow, flutter presentation, or bottom bounced on a weighted hook or jighead. The Jerk ShadZ is ideal for popular inshore targets like redfish, seatrout, flounder, and snook, while freshwater bass anglers have found it to be effective.

Scented PaddlerZ

A segmented body and thin paddle tail allow the PaddlerZ to be fished as twitch-, wake-, or swimbaits, on both fast and slow retrieve speeds. Perfect whether paired with a jighead or a weighted swimbait hook, the PaddlerZ is ideal for in-shore saltwater applications on either coast due to its subtle tail movement, side-to-side wiggle, and scent impregnation. For freshwater anglers, the PaddlerZ is ideal for top-water applications like buzzing through the grass and also is a perfect swim jig or umbrella rig trailer.

Mulletron SwimBait

Delivering realistic swimming action with a wedge-shaped tail and a wide range of retrieve speeds, the Z-Man Mulletron LT SwimBait features an ultra-realistic

mullet profile offered in highly detailed hand-painted and photo-printed color schemes. Built with a reinforced line-through harness to allow the bait to slide up the line following your hookset, the perfectly balanced harness and buoyant super-plastic material allow for an upright posture with slow retrieve speeds, on the fall, and even at rest on the bottom.

Bang StickZ

The Bang StickZ is a must-have when conditions call for a little bit of finesse! Designed for Neko rigging, its durable, buoyant ElaZtech construction makes for easy wacky rigging without the need for o-rings and allows the tentacled tail to float off the bottom at rest. Don't hesitate to try it on a shaky head, Texas rig, or Carolina rig as well!

Turbo FattyZ Worm

A beefed-up, bulked-up swimming worm, the Turbo FattyZ puts good vibes in the water with its

distinctive curved paddletail. It's an advanced tail design built with intel from Z-Man pro Miles "Sonar" Burghoff that swims and thumps at all retrieve speeds, including on the fall. Salt impregnation in the main body tickles bass taste buds and adds extra casting density, especially effective for fishing on an unweighted hook. The super adaptable Mag FattyZ fishes any way you want buzzing the surface, swimming, or wacky-Texas- or Carolina-rigging. Available in 8 distinctive Z-Man color patterns.

Mag FattyZ Worm

The Mag FattyZ is a scaled up version of the popular

5" FattyZ that is ideal for a variety of bassin' applications nationwide. Its thick, solid body can easily hide the point and barb of a 5/0 flipping hook, and the tail necks down thin before transitioning into a bulbous tail that swings on the shake, triggering strikes. This extremely versatile addition to the ElaZtech worm lineup can be rigged on a magnum shaky head, dragged along the bottom on a Texas or Carolina rig, or pitched around cover and is a go-to bait for our pros when a big bite is needed!

SMH WormZ

Sleek, simple and unceasingly active, the SMH WormZ mirrors what designed Brian 'B. Lat' Latimer calls that classic Coke-bottle shape. Sculpted for subtle yet unstoppable underwater movement, the SMH WormZ starts with a substantial but slender head and torso, ideally shaped for easy hook penetration. Gradually, it slims down to a wispy-thin midsection that helps activate the worm's bulbous, football shaped tail-kicking and undulating continuously as the angler shakes the line.

Goat ToadZ

Buoyant enough to float a standard 5/0 EWG hook, the 4-inch GOAT ToadZ features a wide, bulky body and streamlined profile which combine to greatly enhance castability. The customized cupped kicker tail design from the original GOAT™ bait series maximizes mobility and flow at slow, medium or fast retrieve speeds. Sculpted with a keel-shaped 'hull,' the bait's "V" belly yields stability and a quick-planning action on the retrieve.

Hella CrawZ

Flaunting flattened, monster-sized flapper claws, the Hella CrawZ is a versatile crawfish profile jig trailer & flipping bait with a real attitude. The bait's appeal lies in its 10X Tough ElaZtech structure, so buoyant the claws float up and wave like a crayfish's natural defensive posture. Put one onto a hook and it's there to stay, outlasting comparable soft plastic trailers by impressive margins. The compact Hella CrawZ sports a lifelike segmented crayfish torso and carapace, plus lively eyes, antennae and twin flapper claws.

Pop ShadZ

Z-Man Pop Shadz Constructed of high floating, 10X Tough ElaZtech™ material, this first-of-its-kind soft plastic surface popper sports a cupped face that pops, spits, and chugs along the surface for maximum fish-calling attraction. What's more, the Pop ShadZ can be rigged weedless on a wide gap hook, making it ideal for fishing through pads, grass, stumps, and laydowns. Buoyant enough to float even a heavy gauge hook, its bait-fish profile accurately mimics a number of fresh- and saltwater species.

Chatterspike

The Z-Man Chatterspike has pronounced V-shaped ridges on the top & bottom tail surfaces to increase water displacement and maximize its quivering motion. Constructed from Z-Man's 10X tough Elaztech super plastic for extreme durability, the Chatterspike has a segmented body and tapering tail with pyramidal cross-sections that increase energy transmission from a vibrating jig to greatly enhance bait action.

TroutTrick

The TroutTrick is absolutely deadly not just on spotted seatrout, but also redfish, flounder, stripers, bass, and more! To fish the TroutTrick, simply give the rod two sharp twitches, then allow the bait to fall vertically to the bottom on a semi-slack line.

Trout Trick Jerk ShrimpZ

The Z-Man Trout Trick Jerk ShrimpZ is made to mimic movements of a fleeing shrimp. Ideal for rigging on a jighead and made to be fished with short, sharp jerking of the rod. Allow the shrimp to settle to the bottom on a semi-slack line for frantic fleeing motion. Great for rigging on EZ keeperZ weighted hooks or other similar swimbait hooks. Ideal for targeting strikes from redfish, snook, seatrout, small tarpon, and flounder species.

SMH Jig Head

Made to match the SMH™ WormZ™ and accentuate tail motion, the SMH Jighead was built to aid its ability to slide cleanly through grass & brush, pivot smoothly on the bottom, and walk over rocks and other obstructions. The jighead features a pointed nose and angled eyelet. The hook-eye itself is slightly recessed for further snag-resistance. Its medium-lightwire construction fits the finesseful nature of the worm and a specially made welded wire keeper is easy to rig and excels at holding ElaZtech baits tightly.

ChinlockZ SWS Jig Head

Designed to pair perfectly with ElaZtech® swimbaits and jerk baits of all sizes, ChinlockZ SWS (Snagless Weight System) weighted hooks are built on heavy-duty Mustad® UltraPoint® hooks and feature a molded chin keeper that holds softbaits securely and prevents them from sliding out of place on hard casts and missed strikes. Each ChinlockZ features a precision molded lead weight affixed to the rear of the hook for perfect balance and to provide an enticing flutter on the fall.

ZWG Weighted Swim bait Hook

The Z-Man ZWG Weighted Swim bait Hook is a custom heavy-duty weighted EWG hook designed to hold soft plastic ElaZtech swimbaits securely in place. Featuring a conical molded plastic bait keeper positioned on the neck of the hook, the ZWG Weighted Swim-bait Hook makes it easy to rig and lock the nose of swimbait in place while enhancing hook-up ratios by preventing baits from sliding down after missed bites.

HeadlockZ HD Jig Head

Built around extra heavy-duty Mustad® UltraPoint® hooks, anglers now can pair the toughest plastics around with equally tough jigheads. Available in a wide range of sizes and weights, HeadlockZ HD are ideally suited for everything from inshore flats fishing to bluewater jigging and are engineered to be rigged easily with and to securely hold ElaZtech plastics.

Redfish Eye Jig Head

Designed around the knowledge that gamefish target the eyes of baitfish, these jigheads sport the largest eye of any jighead in their class. Built on heavy-duty 4/0 Mustad® UltraPoint® hooks, the 30 degree neck bend of the hook places the eye at the front of the jighead, reducing snagging and fouling on shallow grass and oyster laden flats that redfish inhabit.

Trout Eye Jighead

The Trout Eye Jighead is the ideal jighead for inshore saltwater fishing. Scientific research has shown that gamefish key in on the eye of a baitfish and that a visible eye is a critical determining factor in their decision whether or not to strike. Built with the largest eye possible for this jig size, the Trout Eye Jighead allows inshore anglers to capitalize on gamefish's instinctive feeding habits.

Weedless Eye Jig Head

Like the popular original, the Z-Man Weedless Eye Jighead is totally focused on catching trout, reds, snook, tarpon, and just about anything else swimming in the inshore waters (plus many freshwater species as well). No other jighead sports a bigger, more natural-looking 3D eye than the Trout Eye and no other jighead is so precisely balanced to maintain a natural profile in shallow water.

Texas Eye Jig Head

Melding a weedless Texas rig with a free-pivoting jighead and the prominent strike target of oversized 3D eyes, the Texas Eye Jighead gives anglers an unbeatable one-two punch. Designed to easily shed grass and prevent fouling or snagging on wood, rock, or shell, the flat sided head and up-turned line tie eyelet creates a stable jighead with a spoon-like swimming quality when paired with either paddle-tail swimbaits or straight-tail baits. The Texas Eye Jighead features beefy construction that makes it ideal for a variety of applications that require a snag-resistant presentation in fresh- or saltwater, from pitching baits to laydowns for trophy largemouth to plying the Louisiana marsh for bull redfish.

Texas Eye Finesse Jighead

A dynamic, exclusive Z-Man / Eye Strike Fishing design, the Texas Eye Finesse Jighead activates downsized ElaZtech softbaits, such as the Slim SwimZ, StreakZ 3.75 and TRD series, via its swinging hook-to-jighead construction. Built with a light-wire 1/0 VMC wide gap hook, the special pivoting jig eases weedless rigging while maximizing bait action. Vivid, oversized 3D eyes present a prominent strike target for gamefish. Molded bait keeper locks ElaZtech and other baits snugly to the hook.

CrosseyeZ ChatterBait

The CrossEyeZ ChatterBait leverages the weedless, oversized eye design of Z-Man's CrossEyeZ jig series. A custom 5/0 O'Shaughnessy hook bolsters hookup and landing percentages. For optimal snag resistance around wood and grass, an adjustable, v-shaped, coated multi-strand wire weedguard deflects cover and prevents snagging and fouling, while folding back during hooksets. A dual trailer keeper, with molded lead and wire spikes, offers the ultimate in trailer security.

Original ChatterBait

The Z-Man ChatterBait combines the flash of a spinnerbait, the vibration of a crankbait and the snag resistance of a jig. The patent-pending blade design creates an intense vibrating action, which is the key to this incredible bait and the reason it consistently entices explosive reaction bites. The Z-Man ChatterBait is also extremely weedless because the hook always remains in an upright position. This allows you to put the bait in heavy cover where fish live.

Project Z ChatterBait

This entry into the ChatterBait product line features a new head design that allows the blade to swing more freely, resulting in more vibration, whether you're ripping the bait through grass or employing a more methodical stop-and-go retrieve. Chemically-sharpened, heavy-duty Mustad UltraPoint black nickel hook. Unique, stainless hex-shaped ChatterBlade, stamped and electroplated in the USA. New, super-strong quick clip attached to the blade for an incredibly secure connection.

CrossEyeZ Flipping Jig

CrossEyeZ Flipping Jigs are built around heavy duty, 4/0 VMC® flipping hooks, wire trailer keepers and copper wire-tied 100% silicone skirts not found on other widely available jigs. Their unique head design performs flawlessly around all types of shallow-water cover, & their durable, color-matched head paint schemes and hallmark 'cross eyes' elicit close-combat strikes when other 'ordinary' jigs simply won't.

ChatterBait WillowVibe

Z-Man's ChatterBait WillowVibe links a hardened, stainless steel willow leaf shaped blade with an aspirin-shaped jighead, for an intense, rapid-fire vibration that is ideal for targeting schooling fish. Jighead sports lifelike 3D eyes, a super-sharp 2/0 black nickel hook & a wire keeper for pinning soft plastic trailers tightly in place.

EyeStrike ChatterBait

The EyeStrike ChatterBait marries a distinctive hexagonal ChatterBlade® with an ultra-attractive EyeStrike Redfish Eye™ jighead using Z-Man's patented and proven direct head-to-blade connection. Oversized 3D eyes create a prominent strike target, while the jig's sharp keeper barbs snug soft plastic trailers securely. Custom 4/0 or 5/0 Mustad® UltraPoint® hooks stay sharp and fit a variety of popular swimbaits and trailers, tailor-made for bass, redfish, stripers, walleye and other fresh- and saltwater species.

Mag U-Tail Worm

Zoom Mag U-Tail Worm is a 7.5 inch model that features the same u-shaped backside in a package just about an inch longer than the beloved original Zoom U-Tale worm. Popular demand for “Mag” versions of popular lures like the UV Speed Craw, UV Speed Worm, & U-Tail has grown as America’s fisheries have flourished. Perfect with a Texas Rig, Carolina Rig, a Magnum Shaky Head or a Tokyo Rig.

Trick Worm

Fishing the floating worm technique is a fun and effective way to catch post spawn fish or bass suspended in brush or other cover. The Zoom Trick Worm works wonders for these fishing conditions. The bright, clear colors bring savage strikes as the Trick Worms drift and twitch in front of bad-tempered bass. Try them rigged ‘straight’ or Tex-posed without any weight. Wacky rig them & twitch them quickly with short strokes for a lively looking presentation. Try them on a Carolina-rig when you want long, swooping slow-fall drifts from your bait.

Mag Trick Worm

The Magnum Trick Worm is a key choice for anglers who want to present a slightly beefier package to fish that might be spooked by something with more appendages. Rigged alone on a wide gap hook or wacky rigged, its sashaying action will tempt even the wariest bass, or put it behind a tungsten weight and watch it slither through logjams and holes in your favorite grass bed without hanging up, ready to tempt the biggest bass in the lake.

Finesse Worm

The original Finesse Worm is a smaller version of the popular Zoom Trick Worm and can be rigged in a variety of ways, including wacky style on a small hook, on a darter head, splitshot or on a shakey or finesse jig head. Its subtle action and natural undulations attract bass anywhere they swim.

Magnum Finesse Worm

The Magnum Finesse worm is about twice as thick as the standard Zoom Finesse worm, but only about a quarter inch longer, so it pushes lots of water in a compact package, making it a favorite when the bite is tough on big bass factories. Rig it weightless, on a Texas rig, or on a jumbo shakey head and you'll be surprised at the quality that finesse can produce day after day.

Magnum II Worm

The Mag II is an upsized worm perfect for flipping and pitching into heavy cover when the water heats up. But it's also a killer out of ledges and other deep structures, crawled across the bottom where big fish let the current wash bait past. The curled tail waves seductively and calls bass from a distance.

Old Monster Worm

The Ol' Monster has been the go-to big worm of tournament anglers for years, fished on a Texas rig, a Carolina rig or even a mag shakey head. This monster worm is known to produce both a kicker to fill out your limit or the hawg of a lifetime. Its considerable length, slender profile and curled tail are great for targeting large bass, but don't be surprised if the alluring action generated by Zoom's soft, supple plastic tempts bass of every size to strike.

Mag Old Monster

The Ol' Monster, the big worm by which all other big worms are judged, now has an even bigger brother, the Magnum Ol' Monster, 12 inches of big fish tempting, tail waving appeal. Fish it on a Texas rig, a Carolina rig or even a mag shakey head any place that big fish inhabit & the alluring action of the soft, supple tail will out-produce other worms by a large margin.

Centipede Worm

The Zoom Centipede is the ultimate Carolina-rigging dynamite, the finesse option that everyone else has unsuccessfully tried to copy. It looks like it shouldn't have much action, but it darts and glides with a simple twitch of the rod. In addition to fishing it on the Carolina rig, you can dropshot it or put it on the back of a shakey head. In fact, with its flat bottom, on a jighead it'll skip a mile under docks and overhanging brush.

Shakey Head Worm

The Shakey Head Worm was built to maximize your success when fishing the ultimate limit getter, the shakey head. It features a flat head

that makes rigging effortless and a body that is tapered to give it optimal action with the lightest twitches. On a shaky head jig, the tail stands straight up and dances across the bottom, inviting bass to an early dinner.

Mag Shakey Head Worm

Like its smaller counterpart, the Magnum Shakey Head Worm has a tapered tail and flat head. With its larger profile and additional movement in the water, it's great for lakes with clear water and giant, yet finicky fish. Try fishing it on offshore structure, such as river ledges or rock piles on the tops of humps or even around boat docks.

Dead Ringer Worm

The four-inch Dead Ringer is a masterful take on the original ring worm, with segmented rings that trap and hold water for a presence far greater than its small body. The addition of a curly tail that flutters on the fall and when twitched is often too much for bass to resist.

Ultra Vibe Speed Worm

The Zoom Ultra Vibe Speed Worm was designed to trigger the predatory instinct in bass, combining the realistic look and action of a worm with the unique sound profile of the Ultra Vibe Tail for maximum water disturbance. You can buzz it on top, swim it below the surface or rig it Texas or Carolina style – the tail will elicit strikes when others don't.

Speed Worm

The Original Speed Worm features a thick paddle tail that throbs on the fall or when retrieved horizontally. It can be flipped and pitched into thick cover because the design allows them to slip through even small openings in a thick mat or brushpile. You can also swim it weightless or with a light bullet weight and the tail will pulse like a spinnerbait blade.

Fat Albert Grub

The Zoom Fat Albert Grub offers a chunky profile and high action tail, which make it a great choice as a beefed-up trailer for your jigs, buzzbaits or spinnerbaits. The curly tail generates a bass-calling, fluttering action as soon as it hits the water, and the Fat Albert Grub's ribbed body offers an increased profile and texture bass love.

Mag UV Speed Craw

This offering joins other "Mag" plastics in Zoom's lineup, including the Mag Finesse worm, Magnum Shakey Head Worm, Magnum Swamp Crawler, Magnum Trick Worm and Magnum Ultra-Vibe Speed Worm. When fish are chasing larger prey, all of them will help you put bigger bass in the boat. The Mag Ultra-Vibe Speed Craw will initially come in eight of Zoom's proven colors to meet a wide variety of water colors and forage bases.

Z-Craw Jr.

The Z-Craw Jr. is effective on the back of swim jigs and vibrating jigs, as well as structure-hugging wobble heads. This smaller version will handle all of those same applications as the larger Z-Craw and will quickly turn into your favorite lure for tempting finicky bedding bass as well. It's smaller than its predecessor, and while it has finesse applications, you'll be surprised at how many big bass it fools.

Z-Craw Worm

The new Z-Craw Worm combines the body of Zoom's Mag Finesse worm with the tail of the ultra-popular Z-Craw. This provides exactly the right combination of bulk and finesse to create a profile that will lure fish under any conditions. It's thick body holds any hook and stands up to the abuse of multiple fish.

Mag Super Fluke

The deep belly of the Super Fluke causes it to dart, glide and knuckleball through the water, while its universal baitfish size allows it to tempt both limit-sized bass and the biggest fish on your lake. Rigged weightless, it skitters across the surface like an injured shad, but a belly-weighted hook or some insert weights allow you to employ it as deep as necessary.

Swimmin Super Fluke Jr.

All of the great characteristics of the original Super Fluke, now with a hard-pounding paddle tail and in a downsized package. You can fish it like its predecessor, with a swoop and glide motion, or wind it steadily and feel it pulse like a spinnerbait. It's great by itself or on the back of a swim jig or vibrating jig, where it calls fish from a distance with its sizable acoustic footprint. The Jr., can also be used on back of a fish head spin or under spin style bait.

Fluke Stick

Soft plastic stickbaits and jerkbaits are two of the most popular items amongst bass fishermen, with nary a respectable tackle box being caught without one or both year-round. The reason for their popularity is simple: soft plastic stickbaits and jerkbaits catch fish, and lots of them.

Brush Hogs

The creature bait that started it all, the Zoom Brush Hog has tempted big bass from coast to coast for decades and it continues to be the standard-bearer for this category. It'll hold a big hook but you can vary the weight to keep it slowly fluttering through the strike zone or plummeting into the depths where big bass lurk.

Midsize Brush Hogs

Introducing the new Mid-size Brush Hog...to split the difference when the Baby is too small and the Standard is just a bit too large. It has the same proportions and action as both its little brother and big brother, just in an in-between size that'll attract both numbers of tournament-sized fish and the kicker needed to seal the deal. Don't just flip it – it excels on a magnum shakey head, on the back of a jig, and on off-shore structures as well.

Uni-Toad Swimbait

The Uni-Toad has a single leg protruding from a flat toad-like body with a boot tail that creates a ruckus, along with ample plastic to keep the hook in place and weed free. It has a little of that Horny Toad sound, but it's more of a sight thing. It rolls and swims with a little bit of body wobble. Just like the toads, it's good over grass, but it also really looks like a blueback herring or a shad in open water.

Horny Toad

The ultimate heavy cover buzz toad, the pitter-patter of the Horny Toad's ultra vibe feet cause bass to chase it from long distances, producing some of the best strikes of your life. Paired with a weedless hook, it comes through lily pads & grass like a charm, but don't hesitate to throw it in open water as a search bait.

Hollow Body Frog

The Hollow Body Frog has a third tail between the two skirted legs that provide for a more methodical walking action and make it easy to walk. The Hollow Body Frog weighs 7/8 oz & is 3.5 inches long. It can easily replicate bluegills, shad, and of course amphibians, and with its larger profile and "big solid hooks," it will allow anglers to tempt the largest bass around.

Grande Hook Resist nets are designed for gentle landings and catch-and-release style fishing. Outfitted with the latest in fish-friendly & hook-friendly netting, these nets minimize the risk of damage to fins, gills, & fish skin. The flat bottom design allows fish to lay flat in the net for minimal fish handling & easy releases.

400 Series Mono Cast Net

The Ahi USA 400 Series Cast Nets feature our Green Premium UBE Chip Monofilament Netting. This series of nets is ideal for targeting those larger bait fish ranging from 6"-12" in size. Along with the Green Premium UBE Chip Monofilament Netting, each net features $\frac{5}{8}$ " Square Mesh, 90 lbs test braille lines, & 1.15 lb of Actual Lead Weight per foot of lead line. Due to its heavier weight & capability of sinking faster, each net comes together at a commercial grade anodized swivel that includes a 30 foot poly rope headline.

Collapsible Wire Trap

These multipurpose traps are quite popular simply because they are very effective and easy to use. Unlike bulkier, more traditional style traps, the collapsible design of this particular series of traps easily folds flat and keeping it out of the way, making it easy to store. If you are limited with space and in need more room in your storage area or small boat this trap is for you. This allows fisherman to carry more traps while eliminating any excessive bulk on board their boats. All traps include a bonus drawstring bait bag, wire secure clamps, and easy carry handle.

Mag Bait Station Replace

This replacement aerator connects to the lid of any Frabill Magnum Bait Station model. The secret of these bait coolers is that the installation port for the aerator is integrated directly into the lid. Keep bait lively and fresh with one complete system that's easy to use and easy to open. This replacement aerator installs in just seconds to begin pumping in oxygen, instantaneously turning your cooler into a live well.

Pro Latch Open Utility Box

From bags of soft plastics to jars, small tools and other bulky items, there are times when subdivided storage just isn't the right solution. That's why our ProLatch® Storage Box is designed as a single, deep compartment. It's transparent so you can easily see its contents without opening the lid. And secure ProLatch® closures prevent its contents from accidentally spilling out.

Edge Frog Box

The EDGE Frog box stores a variety of topwater frogs by utilizing the line tie to vertically hang the baits. This allows the legs of each bait to quickly dry off and maintain their shape for long-term usage. Gone are the days of jumbled up, dry-rotted rubber resulting in unusable baits. The EDGE Frog Box will maintain the quality of each frog from the moment you take it out of its package and place it in the box to the moment it's tied on.

New Haven Oyster Knife

The Dexter Sani-Safe® oyster knife has a textured polypropylene handle that provides a secure grip, reducing the risk of it slipping in the user's hand. The shape of the handle creates leverage that makes it easier to efficiently open oysters. The knife is perfect for oysters on the half shell with its short, wide blade. The blade's convex tip travels high in the oyster, keeping away from the meat so it will not tear it. The knife is durable enough for commercial use thanks to its high-carbon DEXSTEEL™ blade that is strong enough to hold a sharp edge through heavy use and is specially formulated to be stain resistant.

Plier Kit

The Baker plier kit comes with a slim 8" pair of pliers, a 5½" pair of forceps, and super-convenient line clippers that double as a punch tool for line-ties. The pliers and the forceps are both built using rust-resistant stainless steel, and have slim profiles with serrated teeth that are ideal for digging out hooks that have been deeply inhaled by fish. Additionally, the "power" handle on the line clippers/punch tool also works as a hook disgorger for popping hooks out of fish's mouth. The patented jig-eye punch is perfect for removing paint, or dried vegetation from line-ties, especially on smaller finesse lures.

TEXAS TACKLE

Executive Split Ring Pliers

Made with an exclusive triangular-wedge tip specifically designed to accommodate split rings, the pliers are constructed from high quality surgical-grade stainless steel for excellent corrosion resistance and a dependable long life. To use – simply insert the wedge into the center of the split ring and the ring will open, but unlike other pliers, the elongated lower nose will hold the split ring in place – making it easy to remove/fasten split rings or change out hooks.

INNER PACK QUANTITY: 12 MINIMUM QUANTITY: 1

T30102	SR-4 MIRROR FINISH	F10B54I	\$17.59

Split Ring Pliers

If you've torn your thumbnail or cut yourself with your knife trying to pry open a stubborn split ring, then you'll really appreciate these great split ring pliers from Texas Tackle. Texas Tackle used top grade surgical stainless steel for precision and durability, & they completely covered the handles with a slip-resistant, textured plastic grip to ensure maximum control – even when your hands are wet. Best of all, a spring automatically opens the pliers, so all it takes is one hand on the lure & one hand on the tool to easily remove any split ring. The handy 5" size will fit in any tackle box.

Split Ring Pliers

With all of the monstrous swim-baits and magnum crankbaits on the market, sometimes the standard-sized split ring pliers just won't cut it. Now, with the Texas Tackle Large Split Ring Pliers you can easily remove or replace beefy hooks and large split rings that come with these beastly baits. Built with surgical-grade stainless steel, these Pliers are incredibly durable and will provide a long-lasting rust-free performance. The handles are also made with a slip-resistant, textured plastic grip that ensures maximum control – even when your hands are wet. Best of all, a spring automatically opens the pliers, so all it takes is one hand on the lure and one hand on the tool to easily remove any split ring. The handy 5-inch size will fit in any tackle box. .

Stubby Guide Glove

Fish Monkey Stubby Guide Gloves are half finger guide gloves with shortened fingers. These gloves are ideal for those not used to wearing gloves on the water. These gloves are great for releasing fish and casting, among other things. These gloves have a "second skin fit" making them comfortable for all day wear.

Polarized Inlet Sunglasses

An inlet is an indentation of a shoreline, usually long and narrow, such as a small bay or arm, that often leads to an enclosed body of salt water, such as a sound, bay, lagoon, or marsh. It is usually the means of travel from a harbor out to sea. Once you've reached the inlet, your there - to the wide open waters and your fishing excursion gets a little closer in sight. Take along these glasses with you as you pass through the inlet and see what is out there.

All anodized aluminum construction, low glare finish. Great for salt or fresh water. Smooth and easy pole angle adjustment. Easy two knob removal. Mounting plate is flush with carpet – no more stubbed toes. No tools necessary for use Our patented Spyderlok technology insures tight secure locking angles. Mounts with either the R-101 or TS series track system. Useful ridge in rod holder bottom to prevent rod turning. Stainless steel hardware. Durable rubber boot to protect rod handle. Large tubes make it easy to remove the rod, even with a fish. Swivels 360 degrees and 180 degrees vertical. Makes pulling planer boards a breeze. 1 year warranty.

SpyderLok Rod Pod

Perfect solution for a hands-free hold on a single rod. The inventive SpyderLok design keeps the rod in place with secure locking angles, whether you're on a freshwater lake or cruising the salty ocean. It swivels a complete 360 degrees and 180 degrees vertical for ultimate versatility and adjustability. No tools necessary. The anodized aluminum construction, coupled with the low glare finish and stainless steel hardware, makes this product lightweight and durable additions to any boat. A durable rubber boot protects the rod handle, while the large tubes makes it easy to remove the rod. The design makes pulling planer boards a breeze for anglers alike.

Track System

Available in multiple lengths, the system allows anglers to quickly and easily attach multiple rod holders and accessories with fewer mounting bolts. The convenient rod holders can slide to the angler's desired location. Easily move the rod holders to facilitate stowage of the trolling motor. Once installed, the SpyderLok Track System requires no tools in order to remove rod holders and accessories. It can be mounted on the gunnels or the deck for ease and convenience. Great for both salt and fresh water fishing, the SpyderLok Track System comes with stainless steel hardware, easily removed plastic end caps, and one R-110 track system mount. The Track System can be utilized with the existing R-100, R-400, R-401, R-200 and R-300 products, as well as future SpyderLok product options.

Steer Stop Steering Lock

T-H Marine Steer-Stop – Steering Lock 4" For Hydraulic Steering BLUE. With our 4" Steer Stop Outboard Hydraulic Steering Lock in place, boaters can center their outboard motor equipped with hydraulic steering and keep it from wandering when trailering. Similar to the original Steer Stop, units clip onto hydraulic steering rams on either side of outboard to keep engine straight and prevent damage to motor supports. The cord then keeps units together when stowed and aids removal.

Prop Wrench

This 1-1/16" six point socket style prop wrench is made of high tensile strength, indestructible nylon. It is totally resistant to fuel, sun, salt water, & other chemicals. The Prop Master™ is less expensive than metal wrenches which rattle & can cause damage to your boat. However, it has plenty of brawn to get the job done. The Prop Master™ will tighten all 1-1/16" propeller nuts without slipping or stripping. (OMC, Johnson and Evinrude, – over 40 HP, Mercury – over 50 HP.) High visibility color makes it easy to locate in dark boat compartments. The Prop Master™ also has a 9/16" garboard drain plug socket on the reverse side. Will not corrode in the salt water environment.

Junior Cooker

The Can Cooker Jr. is a unique outdoor cooking device that allows you to cook a lot of food without a lot of work. Can Cooker makes a complete meal, that will feed a group of hungry people, in about one hour. Best of all, Can Cooker works on any heat source—campfire, camp stove, propane stove, charcoal or gas grill, turkey fryer, stove top, etc., and it's easy to clean up. This makes Can Cooker ideal for camping, hunting, fishing, tailgating, family gatherings, picnics or any outdoor get-together. Can Cooker cooks with steam so it's healthy. Can Cooker's revolutionary one-piece "shouldered" design creates convection which circulates the steam for faster cooking. The circulating steam also helps keep food from sticking to the inside of the Can Cooker which makes clean up remarkably easy. The food that comes out of Can Cooker is fresh and very flavorful and it maintains its natural flavor better than other forms of cooking. This is because the steam does not leach away the flavors and nutrients. Everything comes out tender and tasty. Nothing comes out dry. Because Can Cooker is so easy to use (load it, place it on the heat source and wait about an hour) you'll be able to play or socialize instead of cooking the meal.

INNER PACK QUANTITY: 6 **MINIMUM QUANTITY: 1**

ITEM NO.	Over Size	FBI	Sug. Retail

Maxi Deet Spray

Ideal for use on exposed skin in areas of extreme bug density, low-odor MAXI DEET bug-repellent from Sawyer Products offers up to 10 hours of protection against mosquitoes, ticks, chiggers, fleas, and gnats and the diseases they carry. In addition to applying to your skin, MAXI DEET can be used on mosquito nets, head nets, and clothing. Use in combination with Sawyer Permethrin Spray for full body repellency. Offering DEET in its pure form (98.11 percent active ingredient), Sawyer MAXI DEET gives you more control on how much you apply and requires fewer re-applications (compared to other lower-dosage DEET aerosol sprays). MAXI DEET is also less bulky and weighs less than other DEET aerosol sprays.

Microblast Flashlight

A small, high output white LED light with a hat/pocket clip. Runs on one standard AAA battery (included).

INNER PACK QUANTITY: 12 MINIMUM QUANTITY: 1

ITEM NO.		FBI	Sug. Retail
B3712114	BLACK 1AAA	F14B09I	\$21.99

Microblast Pen Light

Certainly, the Microblast is no ordinary pen light of the past. It offers a brightness that rivals full-sized flashlights from just a few years ago. And with its aluminum body, it is plenty tough. You will never regret having one any time you are surprised with a job to do in the dark. And the slim size lets you illuminate in places that others won't fit. One Triple-A battery may not be enough, but the Microblasts 2 AAA batteries give you the runtime you need. Lastly, it comes with a bore light adapter which is pretty much essential when checking and cleaning your firearm's bore.

PX20 Flashlight

Coast Flashlight PX20 3-AAA 315 Lumens. You can be safe and secure with the Coast LED Flashlight, PX20. This item combines five bright white LEDs with one red LED. Each color is controlled with its own switch. The white light is for general flashlight use, while the red LED is good to use when you only need minimal light, such as when reading a map. Coast's Max Beam Optic System, combined with the five high-quality white LEDs, gives you a broad diffused beam. It will illuminate a large area with no dark spots.

G450 Flashlight

Go bold. The G450 flashlight packs big lighting power into a frame just over 8 inches long – a rock-solid solution for when life or work needs illumination. Shining an impressive 1630 lumens on high, the beam on this three-mode dynamo reaches up to 280 meters (918 feet) and runs 35 hours on a single set of batteries. COAST-patented PURE BEAM® optical technology with TWIST FOCUS™ enables seamless transitions between Ultra View Flood Beam and BULLS-EYE™ Spot Beam – giving you ultimate control of the beam shape. Built from top-grade aluminum and available in two colors – black and gunmetal gray – the G450 is IP54 storm proof and dust resistant. With Coast's commitment to quality, the G450 Flashlight is impact resistant, weather resistant and its LED is virtually unbreakable. The G450 Flashlight is backed by Coast's lifetime warranty against defects in materials and workmanship. Tested and rated to ANSI/FL1 standards.

JR F-Stop Flashlight

The JR F-Stop is yet another outstanding addition to the line-up. This light is designed with simplicity in mind, it has everything you need and nothing you don't. The light is fueled by 2 AA alkaline or lithium batteries. The batteries feed the white LED bulb. This combination is able to produce 220 to 250 lumens, as well as 360 to 5,600 candela. It has two built in light modes which include spot and flood. Spot will give you a more defined beam, while flood will illuminate a wider area. You can expect 10 hours of battery life out of this light. It is constructed out of a machined aluminum which keeps the overall weight down to just 4.4 ounces. The light spans a length of only 6.5 inches, a great pocket sized option.

TLR-4 Tactical Light

The TLR-4 features a three position selector switch which allows operators to select between: laser only, LED only, or both laser and LED. Activation is with the standard Streamlight momentary/steady rocker switch found on all of the TLR series of lights. The C4 LED has a 50,000 hour life and emits a 170 Lumen beam and the textured reflector keeps the beam as smooth as possible. The laser is adjustable for windage and elevation.

TLR-6 Tactical Light

Streamlight Tactical Light TLR-6 Universal Kit. The TLR-6 features a three position selector switch which allows operators to select between: laser only, LED only, or both laser and LED. Activation is with the standard Streamlight momentary/steady rocker switch found on all of the TLR series of lights. The C4 LED has a 50,000 hour life and emits a 100 Lumen beam and the textured reflector keeps the beam as smooth as possible. The laser is adjustable for windage & elevation. Windage and elevation adjustment screws are mounted in brass bushings for long life and dependable zero retention of laser. Batteries can be replaced while light remains mounted on gun so there is no need to re-sight laser after battery change.

Lithium Batteries

Streamlight 85175 CR123A Button Top Batteries are powerful and can now be purchased in a 2 or 12 pack. Lithium CR123A batteries are the way of the future. Many flashlights run using dual fuel and are capable of running on 2 x CR123A batteries. EDC flashlights, tactical flashlights, & many more can run on CR123A batteries. Now available in packs of 2 or 12, you will always have the perfect amount of batteries to run your flashlight to its fullest extent.
